Rich in fictional delights, this complete collection of Woolf's shorter fiction ranges from 1906 until the month before she committed suicide in 1941. It offers a valuable insight into the writer's development, demonstrating her evolving characterizations, narrative methods and themes.

From Starting Handle to Microchip Diamond Farm Book Publications

From pan seats to quiet cabs. Ploughs and cultivators. Sowing and planting. Crop care. Combines and balers. Hay and silage. Sugar beet and potatoes. Farmyard and estate machinery.

Tidskrift Springer Nature

This open access book on straw management aims to provide a wide array of options for rice straw management that are potentially more sustainable, environmental, and profitable compared to current practice. The book is authored by expert researchers, engineers and innovators working on a range of straw management options with case studies from Vietnam, the Philippines and Cambodia. The book is written for engineers and researchers in order to provide them information on current good practice and the gaps and constraints that require further research and innovation. The book is also aimed at extension workers and farmers to help them decide on the best alternative straw management options in their area by presenting both the technological options as well as the value chains and business models required to make them work. The book will also be useful for policy makers, required by public opinion to reduce greenhouse gas emissions and air pollution, looking for research-based evidence to guide the policies they develop and implement.
