As a five-year-old, George Alagiah emigrated with his family to Ghana - the first African country to attain independence from the British Empire. A PASSAGE TO AFRICA is Alagiah's shattering catalogue of atrocities crafted into a portrait of Africa that is infused with hope, insight and outrage. In vivid and evocative prose and with a fine eye for detail Alagiah's viewpoint is spiked with the freshness of the young George on his arrival in Ghana, the wonder with which he recounts his first impressions of Africa and the affection with which he dresses his stories of his early family life. A sense of possibility lingers, even though the book is full of uncomfortable truths. It is a book neatly balanced on his integrity and sense of obligation in his role as a writer and reporter. The shock of recognition is always there, but it is the personal element that gives A PASSAGE TO AFRICA its originality. Africa becomes not only a group of nations or a vast continent, but an epic of individual pride and suffering.

Student Book Evan-Moor

This workbook is designed to build proficiency in algebra for students who want to progress beyond algebra at Level 2, or achieve a GCSE Mathematics Grade A or A*, or move with confidence into AS Mathematics.

Edexcel Chemistry Coordination Group Publication

Revise for AS & A2 Biology with confidence! Providing complete study support throughout the two A Level years, this Edexcel Chemistry study guide matches the curriculum content and provides in-depth course coverage. Written by experienced AS and A2 examiners this book includes invaluable advice on how to get the best results in the exams. Providing plenty of exam practice and frequent progress checks and questions to consolidate learning, this AS & A2 Edexcel Chemistry study guide

contains invaluable advice and preparation for the exam. Extensive coverage of the Edexcel course:

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural

sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

When Ellen finished the Vendee Globe, yachting's toughest race aged just 24 the nation took her to it's heart. The depth of the affection for Ellen is extraordinary - she makes people feel like they can do anything! This is her story, written in true Ellen style, in her own words, without the help of a ghost writer. Passionate, dramatic and and deeply affecting, her story will move and inspire all who read it.
