Forensic artist Fiona Glass is the best in the business -- which is precisely why she's quitting. Her skill at mining victims' memories to re-create the faces of sadistic criminals has left her haunted and wary, and only Jack Bowman's

dogged persistence convinces her to help him. The rugged police chief is hunting a serial killer who's targeting teenage girls. But what seems like a simple assignment is fraught with complications, including a searing attraction to Jack that's tempting Fiona to let her guard down in potentially dangerous ways. Jack never intended for Fiona to become so deeply involved in the case -- or in his life. But every instinct tells him she's his best hope for finding a psychopath who's lurking in plain sight, growing more ruthless with each passing day. And now that Fiona is

right in the killer's crosshairs, the only way to keep her safe is to unravel a small town's darkest secrets, one terrifying thread at a time....

*The Jewelers' Circular and
Horological Review* Trans
Tech Publications Ltd

The book discusses
traditional and non-
traditional machining
methods. For each
method, it provides the
theory, describes the
equipment available,
explains the process and
gives a large amount of
practical data. The
traditional metal cutting
processes covered are
turning, boring, planning,
slotting, shaping, drilling,
reaming, deep-hole
drilling, trepanning,
milling practice,
broaching, grinding
processes, gear cutting
practice, thread
production, honing,
lapping, super finishing
and burnishing. The non-
traditional processes
include EDM, ECM, CHM,
USM, AJM, LBM, EBM, PAM
and IBM. Over a hundred
of the latest ISI and ISO
standards related to the
processes discussed are
included.

This edition of the most
comprehensive reference
devoted exclusively to
U.S. currency issues has
been fully updated and
expanded. With more
than 5,500 listings and
over 14,000 valuations,
collectors get the latest
pricing information for all
known U.S. paper money
printed since 1813. In this
respected guide,
collectors will find a
number of items not listed
anywhere else, such as
large and small size
notes, national bank
notes, encased postage
and fractional currency. It
also features coverage of
error notes, military
payment certificates, and
an extensive guide to
authentication of U.S.
currency. Listings are
arranged by logical
denomination-date
according to issue style.
Major sections provide
essential historical and

economic background information allowing collectors and students to understand each issue.- Updated pricing information and note photos for U.S. currency printed since 1813- Expanded coverage with more than 5,500 listings and over 14,000 valuations- Includes listings for items not found in any other reference
The Railway Review
The book analyses the differences between the mathematical interpretation and the phenomenological intuition of the continuum. The basic idea is that the continuity of the experience of space and time originates in phenomonic movement.

The problem of consciousness and of the spaces of representation is related to the primary processes of perception. Conceived as an interplay between cognitive science, linguistics and philosophy, the book presents a conceptual framework based on a dynamic and experimental approach to the problem of the continuum. Besides presenting the primitives of a theory of cognitive space and time, it presents a theory of the observer, analyzing the relationship among perspective, points of view and unity of consciousness. The book's chapters deal with the dynamic elaboration and recognition of forms from

the lower to the higher processes in the various perceptual fields. Experimental analysis from visual, auditory and tactile perception outline the basic structures of intentionality and its counterpart in language and gesture. (Series B)
