The powerful images of Egyptian art span over 3000 years. These ancient artists took their inspiration from the Nile valley and its people, the awesome majesty of the pharaohs, and the mysterious world of the gods. Much of the material that has survived was intended to serve a deceased man or woman in the afterlife. This volume includes some of the more famous images: the gold mask of Tutankhamun, the haunting face of the enigmatic pharaoh Akhenaten, and the striking tomb painting of the beautiful Nefertari, wife of Ramesses II; the magical burial rites illustrated in the papyri known as the Books of the Dead and the tomb paintings that reflect the expectations for the afterlife; and finally statues of Osiris and the other deities that controlled every aspect of life--and rebirth. --back cover.

An Introduction Evans Brothers

Protected on two sides by wide deserts and on another by the sea, the narrow strip of land watered and fertilized by the Nile was an ideal location for the development of the great civilization of Egypt. From its beginnings below the first cataract of the Nile to its long and legendary magnificence at the Nile Delta, ancient Egypt grew ever more prosperous and powerful, first as two kingdoms, then as one. A Short History of Ancient Egypt provides a concise, authoritative, and richly illustrated overview of ancient Egypt from its rise from the marshes to its submission to Rome. T. G. H. James describes how, in about 3100 B.C., the Egyptians first forged a unified administration and established a dynasty of kings. He follows the development of Egypt's greatest achievements: the organization of a national irrigation system, learning to write, and the construction of cities and tombs out of mud brick. As their art became more distinctive and expressive and their beliefs were shaped into religion, Greek philosophers came to Egypt to study. Tourists came to gape. At first, James explains, the chief adversaries of Egyptians were themselves. Civil strife could arise from floods or famines, or from ambitious factions of the royal family. But in time, the bounty of Egyptian agriculture, the grandeur of Egyptian art and buildings, and the ostentation of Egyptian wealth excited the envy and aggression of other nations. Although Egypt fought to retain its independence, it succumbed at last under the conquests of Persia, Greece, and Rome.

Egyptian art is perhaps the most impersonal that exists. The artist effaces himself. But he has such an innate sense of life, a sense so directly moved and so limpid that everything of life which he describes seems defined by that sense, to issue from the natural gesture, from the exact attitude, in which one no longer sees stiffness. His impersonality resembles that of the trees bowing in the wind with a single movement and without resistance, or that of the water which wrinkles into equal circles all moving in the same direction. From afar, Egyptian art seems changeless and forever like itself. From nearby, it offers, like that of all the other peoples, the spectacle of great evolutions, of progress toward freedom of expression, of researches in imposed hieratism. Egypt is so far from us that it all seems on the same plane. One forgets that there are fifteen or twenty centuries, the age of Christianity — between the “Seated Scribe” and the great classic period, twentyfive or thirty centuries, fifty, perhaps — twice the time that separates us from Pericles and Phidias — between the pyramids and the Saite school, the last living manifestation of the Egyptian ideal. Egypt died of her need of eternity.

From the earliest times the Egyptians used bold, bright colours to decorate their buildings, sculptures, papyri, coffins and funerary chests. The large tomb-paintings in the British Museum are the most brilliant examples of their artistry but their love of colour shows also in the small vignettes of painted papyri. This book surveys the whole range of Egyptian painting, illustrated chiefly by the wealth of material in the British Museum. T.G.H. James examines the material used by the ancient painters and explains the conventions and methods which governed some great artists, whose work should be valued in its own right as well as for its incomparable record record of Egyptian life 3000 years ago.

Remains to be Seen is a fascinating series which looks at the past through the archaeological evidence that remains today. Ancient Egypt looks at who the Egyptians were, and their everyday life, what Gods and Goddesses they believed in, and their religion. Also discussed is the history of Egypt during the reigns of the two Pharaohs - Akhenaten and Tutankhamun, the history behind their writing and art (hieroglyphs, papyrus, painting and sculpture), and finally the history of Egypt under the Greeks and Romans, and how the past is discovered today. There are fact boxes which highlight

key facts and the text is supported by a wonderful array of photographs and maps. Ancient Egypt also features a time-line, glossary and full index.

"Egyptian Wall Painting focuses on two-dimensional depictions in ancient Egypt, examining them as part of an elaborate code designed to maintain the so-called Maat - or Cosmic Order, Truth-Justice, and Universal Harmony - and thus integral to Egyptian lives and beliefs. It conducts this study through two different lenses: that of Western rational analysis, with its emphasis on methods and techniques, and that of ancient Egyptian spirituality, which these complex works have handed down to our own time." "Illustrated with 350 color plates, including numerous full-page details printed on a special matte paper designed to simulate the feel of the stuccoed limestone on which the original images were painted, Egyptian Wall Painting illuminates an art, language, and culture of extraordinary richness. The definitive treatment of its subject, it is sure to appeal to art historians, Egyptologists, linguist, and connoisseurs interested in one of history's most complex and influential civilizations."--BOOK JACKET.

In the years following Egypt's 1952 revolution, wealthy patrons of the arts disappeared from Egypt's cosmopolitan world and were replaced by the state, which by the 1960s exercised full control over all cultural activities, including the arts. Against this background, Liliane Karnouk analyzes and assesses the development of the visual arts in Egypt over the past forty years. Examining the work of those who are important cultural indicators and those whose works will have lasting value, she describes and illustrates in full color paintings, prints, and sculpture by fifty artists whose combined oeuvres illuminate the development of contemporary art in Egypt.

A Short History of Ancient Egypt University of Texas Press

An insightful volume delving into the enduringly compelling art of ancient Egypt, from a new historical perspective The art and architecture of Egypt during the age of the pharaohs continue to capture the imagination of the modern world. Among the great creative achievements of ancient Egypt are a set of constant forms: archetypes in art and architecture in which the origins of concepts such as authority, divinity, beauty, and meaning are readily discernible. Whether adapted to fine, delicate jewelry or colossal statues, these forms maintain a human face—with human ideas and emotions. These artistic templates, and the ideas they articulated, were refined and reinvented through dozens of centuries, until scenes first created for the earliest kings, around 3000 BCE, were eventually used to represent Roman emperors and the last officials of pre-Christian Egypt. Bill Manley’s account of the art of ancient Egypt draws on the finest works through more than 3,000 years and places celebrated masterpieces, from the Narmer palette to Tutankhamun’s gold mask, in their original contexts in the tombs, temples, and palaces of the pharaohs and their citizens.
