"Unusual and illuminating . . . will appeal to all who are moved by and curious about Frank's story and legacy, and everyone interested in humanitarian activism" (Booklist). Although many books and literary analyses have been written about Anne Frank's life and diary, none have explored the surprising influence she has had on young people in countries all over the world, helping to shape their moral framework and giving them critical life skills. This is due in part to the merits of a traveling exhibition created by the Anne Frank House in Amsterdam in 1985, which has so far been seen by over nine million people. The Anne Frank exhibition, along with its innovative educational and cultural activities, has circumnavigated the globe many times. In this fascinating study, Gillian Walnes Perry explores the various legacies of Anne Frank's influence. She looks at the complex life of Anne Frank's father and the motivations that powered his educational philosophy. She shares new insights into the real Anne Frank, personally gifted by those who actually knew her. Global icons such as Nelson Mandela and Audrey Hepburn relate the influence that Anne Frank had on shaping their own lives. This book presents—all in one place and for the very first time—the inspirational stories of a diverse variety of people from all over the world, brought together by the words of one particularly articulate and inspiring teenage victim of the Holocaust.

Frieda Ekotto, Kenneth W. Harrow, and an international group of scholars set forth new understandings of the conditions of contemporary African cultural production in this forward-looking volume. Arguing that it is impossible to understand African cultural productions without knowledge of the structures of production, distribution, and reception that surround them, the essays grapple with the shifting notion of what "African" means when many African authors and filmmakers no longer live or work in Africa. While the arts continue to flourish in Africa, addressing questions about marginalization, what is center and what periphery, what traditional or conservative, and what progressive or modern requires an expansive view of creative production.

Roaming the Mediterranean Sea on sailboats and hunting down monsters is the only life seventeen-year-old Indi and his siblings have ever known. He never loved it, but now that his parents are gone—vanished during a hunt three months ago—it's harder and harder to fight his desire to escape. He's constantly battling his ferocious love for his siblings and the temptation of his parents' journal, which contains directions to a treasure that their parents hinted at. Maybe it's something valuable enough to distract Beleza from her mission to hunt down the monster that killed their parents. Something that would take the little kids away from the sea that's turning Oscar into a pirate and wasting Zulu's brilliant six-year-old mind. Something that could give Indi a normal life. Acclaimed author Hannah Moskowitz has reinvented yet another genre in this ridiculously propulsive epic that is part seafaring epic, part coming-of-age tale, and a totally warm-hearted story of a boy who loves his family and just wants to figure his own self out—if only the fate of the world weren't on his shoulders.

This handbook brings together an international team of scholars from different disciplines to reflect on African popular cultural imaginaries. These imaginaries - in the sense of cultural productions, contexts, consumers, producers, platforms, and the material, affective and discursive resources they circulate - are influential in shaping African realities. Collectively, the chapters assembled in this handbook index the genres, methods, mediums, questions and encounters that preoccupy producers, consumers and scholars of African popular cultural forms across a range of geohistorical and temporal contexts. Drawing on forms such as newspaper columns, televised English Premier League football, speculative arts, romance fiction, comedy, cinema, music and digital genres, the contributors explore the possibilities and ambiguities unleashed by the production, circulation, consumption, remediation and critique of these forms. Among the questions explored across these essays are the freedoms and constraints of popular genres; the forms of self-making, pleasure and

harm that these imaginaries enable; the negotiations of multiple moral regimes in everyday life; and, inevitably, the fecund terrain of contradictions definitive of many popular forms, which variously enable and undermine world-making. An authoritative scholarly resource on popular culture in Africa, this handbook is an essential read for students and scholars of African culture, society and media.

The militarized legacy of the digital cloud: how the cloud grew out of older network technologies and politics. We may imagine the digital cloud as placeless, mute, ethereal, and unmediated. Yet the reality of the cloud is embodied in thousands of massive data centers, any one of which can use as much electricity as a midsized town. Even all these data centers are only one small part of the cloud. Behind that cloud-shaped icon on our screens is a whole universe of technologies and cultural norms, all working to keep us from noticing their existence. In this book, Tung-Hui Hu examines the gap between the real and the virtual in our understanding of the cloud. Hu shows that the cloud grew out of such older networks as railroad tracks, sewer lines, and television circuits. He describes key moments in the prehistory of the cloud, from the game "Spacewar" as exemplar of time-sharing computers to Cold War bunkers that were later reused as data centers. Countering the popular perception of a new "cloudlike" political power that is dispersed and immaterial, Hu argues that the cloud grafts digital technologies onto older ways of exerting power over a population. But because we invest the cloud with cultural fantasies about security and participation, we fail to recognize its militarized origins and ideology. Moving between the materiality of the technology itself and its cultural rhetoric, Hu's account offers a set of new tools for rethinking the contemporary digital environment.
