**Mechanics of Fluids SI Version** Cengage Learning  
 In this eye-opening book, psychologist Jesse Bering argues that we are all sexual deviants on one level or another. He introduces us to the young woman who falls madly in love with the Eiffel Tower, a young man addicted to seductive sneezes, and a pair of deeply affectionate identical twins, among others. He challenges us to move beyond our attitudes towards 'deviant' sex and

consider the alternative: what would happen if we rise above our fears and revulsions and accept our true natures? With his signature wit and irreverent style, Bering pulls back the curtains on the history of perversions, the biological reasons behind our distaste for unusual sexual proclivities and the latest research on desire. Armed with reason, science and an insatiable appetite for knowledge, he humanises deviants while asking some provocative questions about the nature of hypocrisy, prejudice and when sexual desire can lead to harm. A groundbreaking look at our complex relationship with our carnal urges and the ways in which we disguise, deny and shame the sexual deviant in all of us, Perv brings hidden desires into the spotlight.

"Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life.

**Case Studies in Abnormal Psychology** John Wiley & Sons Drawing from the latest research, this innovative resource helps you understand your fear of public speaking--and develop a plan to overcome it. The CD-ROM includes both audio relaxation exercises and techniques for overcoming your anxiety. *Abnormal Psychology* SAGE Publications

Balancing biological, psychological, social, and cultural approaches, this book's ground-breaking integrative approach is the most modern, scientifically valid method for studying abnormal psychology. Updated with leading-edge research findings, the eighth edition draws on the expertise of David H. Barlow, V. Mark Durand, and Stefan G. Hofmann, three internationally recognized experts in clinical psychology. In *ABNORMAL PSYCHOLOGY: AN INTEGRATIVE APPROACH*, the authors successfully blend sophisticated research with an accessible, engaging writing style. They go beyond simply describing different schools of thought on psychological disorders, exploring the interactions of the various forces that contribute to psychopathology. This comprehensive resource includes integrated case studies (95 percent from the authors' own files) and additional study tools. *An Introduction to the History of Psychology* Open University Press

*Abnormal Psychology: Perspectives* exemplifies its subtitle by cohesively presenting the numerous individual perspectives of its expert contributors. It presents the differing psychological perspectives by discussing various relevant paradigms with emphasis on the conceptual approaches and therapeutic interventions that have garnered the most empirical support in research literature. As a ground-up Canadian text, it features indigenous case studies, legal and ethical issues, prevention programs, and ground-breaking research, as well as the history of abnormal psychology in this country. KEY TOPICS: Concepts of Abnormality Throughout History; Theoretical Perspectives on Abnormal Behaviour; Classification and Diagnosis; Psychological Assessment and Research Methods; Anxiety, Obsessive-Compulsive, and Trauma-Related Disorders; Dissociative and Somatic Symptom and Related Disorders; Psychological Factors Affecting Medical Conditions; Mood Disorders and Suicide; Schizophrenia Spectrum and Other Psychotic Disorders; Eating Disorders; Substance-Related and Addictive Disorders; The Personality Disorders; Sexual and Gender Identity Disorders; Neurodevelopmental Disorders; Behaviour and Emotional Disorders of Childhood and Adolescence; Aging and Mental Health; Therapies; Prevention and Mental Health Promotion

in the Community; Mental Disorder and the Law MARKET: Appropriate for Abnormal Psychology.

**Abnormal Psychology** Cengage Learning

Emile Durkheim is often referred to as the father of sociology. Along with Karl Marx and Max Weber he was a principal architect of modern social science and whose contribution helped established it as an academic discipline. "The Division of Labor in Society," published in 1893, was his first major contribution to the field and arguably one his most important. In this work Durkheim discusses the construction of social order in modern societies, which he argues arises out of two essential forms of solidarity, mechanical and organic. Durkheim further examines how this social order has changed over time from more primitive societies to advanced industrial ones. Unlike Marx, Durkheim does not argue that class conflict is inherent to the modern Capitalistic society. The division of labor is an essential component to the practice of the modern capitalistic system due to the increased economic efficiency that can arise out of specialization; however Durkheim acknowledges that increased specialization does not serve all interests equally well. This important and foundational work is a must read for all students of sociology and economic philosophy.

*Abnormal Psychology (Custom Edition)* Pearson

Provides readers with an understanding of the Human Services Profession. *Introduction to Human Services: Through the Eyes of Practice Settings, 3/e* explores human services through the lens of the most common practice settings where human service professionals work. This title also provides information about social problems within a socio-political context allowing readers to think about ways in which culture and ideology influence people's perspectives. Standards for Excellence series -- Each chapter highlights the national standards set by the Council for Standards in Human Service Education (CSHSE). Critical thinking questions throughout reinforces this integration. Learning Goals Upon completing this book, readers will be able to: Understand the issues pertinent to human services from new perspectives. Challenge the status quo of human services. Recognize their own stereotypical thinking that may create barriers to becoming

effective helpers.

*The Wiley Encyclopedia of Personality and Individual Differences, Models and Theories* Oxford University Press

The Princeton Guide to Evolution is a comprehensive, concise, and authoritative reference to the major subjects and key concepts in evolutionary biology, from genes to mass extinctions. Edited by a distinguished team of evolutionary biologists, with contributions from leading researchers, the guide contains some 100 clear, accurate, and up-to-date articles on the most important topics in seven major areas: phylogenetics and the history of life; selection and adaptation; evolutionary processes; genes, genomes, and phenotypes; speciation and macroevolution; evolution of behavior, society, and humans; and evolution and modern society. Complete with more than 100 illustrations (including eight pages in color), glossaries of key terms, suggestions for further reading on each topic, and an index, this is an essential volume for undergraduate and graduate students, scientists in related fields, and anyone else with a serious interest in evolution. Explains key topics in some 100 concise and authoritative articles written by a team of leading evolutionary biologists. Contains more than 100 illustrations, including eight pages in color. Each article includes an outline, glossary, bibliography, and cross-references. Covers phylogenetics and the history of life; selection and adaptation; evolutionary processes; genes, genomes, and phenotypes; speciation and macroevolution; evolution of behavior, society, and humans; and evolution and modern society.

*Abnormal Psychology, Books a la Carte Edition* Addison-Wesley Educational Publishers

The title that the authors have chosen for this book, *The Causes and Cures of Criminality*, suggests that it may be just another book speculating on the sociological evils that need to be put right for "everything in the garden to be lovely." If this is the expectation, the reader could not be more mistaken. The recurrent theme, in fact, is a strong accent on psychological experiments. Both authors have tackled the theoretical and practical side of crime through an exhaustive literature review of past experimental work. Hans J. Eysenck has concentrated on the constitutional and biological theory of criminality, whereas Gisli Gudjonsson has concerned himself more with a review of ongoing research into therapy and possible prevention of antisocial

behavior. Part I goes into considerable detail on the causes of criminality, stressing much of the strangely neglected area of individual differences in personality. Research studies point to a very heavy involvement of heredity in the causation of criminality, but the authors are careful to acknowledge that much can be done environmentally to discourage a life of crime once those persons who are at risk have been identified.

**Abnormal Child Psychology** Pearson

Through a thoughtful and accurate balance of developmental, clinical-diagnostic, and experimental approaches to child and adolescent psychopathology, Eric Mash and David Wolfe's *ABNORMAL CHILD PSYCHOLOGY* remains the most authoritative, scholarly, and comprehensive book in its market. Accessible to a broad range of readers, the book traces the developmental course of each disorder and shows how biological, psychological, and sociocultural factors interact with a child's environment. Case histories, case examples, and first-person accounts are at the heart of the text, illustrating the categorical and dimensional approaches used to describe disorders and bringing life to the theories discussed. The authors also consistently illustrate how troubled children behave in their natural settings: homes, schools, and communities. Up-to-date and forward-looking, the text covers the DSM-IV-TR and dimensional approaches to classification as well as evidence-based assessment and treatment, contemporary research, and the latest theories related to the predominantly inattentive ADHD subtype, early-onset and the developmental propensity model of conduct disorder, the triple vulnerability model of anxiety, the tripartite model in children, depression, and autism. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

In this brilliant work, the most influential philosopher since Sartre

suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

**Conquer Your Speech Anxiety** SAGE Publications

*Death in the Afternoon* is a non-fiction book written by Ernest Hemingway about the ceremony and traditions of Spanish bullfighting, published in 1932. The book provides a look at the history and what Hemingway considers the magnificence of bullfighting. It also contains a deeper contemplation on the nature of fear and courage. While essentially a guide book, there are three main sections: Hemingway's work, pictures, and a glossary of terms.

**Perv** SAGE Publications

*Personality Theory* is a lively and accessible introduction to the major theoretical perspectives that inform contemporary research on personality. Tracing the work of individual theorists within the context of the eight overarching paradigms used to explain the origins and organization of human behavior, author Douglas Crowne provides an even-handed overview of each theorist's contributions to the field. Students are encouraged to think critically by assessing the theorists' strengths and weaknesses, while pointing to what remains valuable and groundbreaking in their work. This second edition has been thoroughly updated and boasts new pedagogy, a new chapter on personality disorders, and new part divisions reflecting the basic paradigms. Engaging with a lucid narrative, *Personality Theory* is an exceptionally fascinating and readable text.
