**Family Law: The Essentials** Integrity Registry Press, LLC

This book deals with a subject that has recently been the focus of debate and law

reform in many jurisdictions: how much scope should spouses have to conclude agreements concerning their financial affairs - and under what circumstances should such agreements be binding and enforceable? These marital agreements include pre-nuptial, post-nuptial and separation agreements. The book is the result of a British Academy-funded research project which investigated and compared the relevant law of England and Wales, Australia, Austria, Belgium, France, Germany, Ireland, the Netherlands, New Zealand, Scotland, Singapore, Spain, Sweden and the jurisdictions of the United States. In addition to chapters on these jurisdictions, the book includes a chapter on the 'English practitioner's view'. It also provides a comparative analysis of the different matrimonial property regimes and the rules on marital agreements that explores underlying themes and principles and makes recommendations for regulating marital agreements. A key theme is the function and effect of marital agreements in the different jurisdictions. Thus, each chapter first explains the underlying 'default' rules for ancillary relief/matrimonial property and

maintenance. It then analyses the current rules for marital agreements, and gives a brief account of the private international law rules. The book provides a comprehensive source of reference on ancillary relief/matrimonial property and maintenance and the rules on pre-nuptial, post-nuptial and separation agreements in 14 jurisdictions. It offers guidance for academics and practitioners dealing with international matters, and a basis for discussions on law reform. 'I applaud the vision and perseverance of Jens Scherpe in having conceived this book and, with so much distinguished help, in now bringing it to birth. I will be using it for many years and I warmly invite my fellow family lawyers across the world to do likewise.' This is the first book to explore the canonical narratives, stories, examples, and ideas that legal decisionmakers invoke to explain family law and its governing principles. Jill Elaine Hasday shows how this canon misdescribes the reality of family law, misdirects attention away from actual problems family law confronts, and misshapes policies.

*Family Law and Practice* LexisNexis Having trouble in your marriage? This book is for you. Tom Gardiner, a Chicago lawyer, explains how post-nuptial agreements can address marital problems effectively. Unlike counseling that often is no more than a temporary fix, this book talks about agreements that will result in long-term change. If your spouse drinks too much, for instance, you both agree in a legally binding document about the changes that need to occur—and the consequences if they don't. There is another huge advantage to post-nups. If the behavior is not changed and divorce is

triggered, the terms are set when the parties both seek to save the marriage—not when they're going through an acrimonious break-up. These terms are usually reasonable and fair—who gets the kids and when, a fair amount of alimony for a fair term, division of the property—all because the spouses are seeking a solution at the time. This book covers all of the human frailties that can cause problems in a marriage: financial problems, drinking, drug use, cheating, stepchildren, in-law problems, inheritance, religious issues, and so on. It is a book not just for couples, but for therapists, religious leaders, and others who seek to make marriages stronger and divorces civilized and fair.

Drafting a premarital or marital settlement agreement is a delicate process. The final document must not only reflect the intent of the parties but be clear enough to withstand future efforts to modify it and to avoid the assorted tax pitfalls and consequences. *Drafting Marriage Contracts in Florida* guides the practitioner through this potential minefield with

chapters discussing general standards for drafting and review, drafting and defending a premarital agreement, what to include in, and how not to arrive at, a marital settlement agreement, tax consequences of alimony, support, and property settlement provisions, use of agreements in estate planning, and challenging, modifying, and enforcing agreements.

"... describes and analyzes three types of agreements: premarital agreements, postmarital agreements, and domestic partnership agreements. A premarital agreement is a contract between prospective spouses, including same-sex couples, made in contemplation of marriage. A postmarital agreement is a contract executed by parties to an ongoing marriage and not incident to a divorce or marital separation. A domestic partnership agreement, sometimes known as a cohabitation agreement, is a contract executed by a couple whose domestic arrangements may not be state-sanctioned. However, the term also includes such an agreement executed incident to a civil union or registered

domestic partnership. Generally, all of these agreements are used to define the property and support rights of the parties upon termination of the marriage or other relationship by death or dissolution. Some parties also opt to include financial obligations during the marriage or other relationship. This Portfolio does not cover separation agreements that settle property rights, spousal and child support obligations, and child custody matters incident to a separation or divorce"-- Portfolio description.
