'We're trying to do things differently' Vintage

Includes a foreword by Major General David A. Rubenstein. From the editor: "71F, or "71 Foxtrot," is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists "do for a living." In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the "grey-beards" of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families."

The Young Readers' edition of the bestselling adult non-fiction title *Many critics believe Adam Gilchrist is the greatest wicketkeeper/batsman to have played the game, but Adam's huge popularity does not rest solely on his incredible track record. To his millions of fans around the world, it is the way he plays the game - rather than simply the sum of his achievements - that marks him out as one of the best-loved cricketers of his generation. He is both a swashbuckling batsman and record-breaking wicketkeeper, yet perhaps his true impact has come from the manner in which he plays his cricket - with an integrity and sense of values that many thought had departed the game forever. True Colours is his autobiography, and like the man himself it's incomparable. With unflinching honesty, intelligence, compassion and humour, Adam takes you into the world of cricket that few outside of the Australian team have ever seen. From his early struggles to establish himself, through to the giant achievements of the Australian test and one-day sides, True Colours offers an extraordinary window on Adam, on cricket's major stars and on the game itself.*

Students and staff from KCL's Social Sciences BA programme turn the research lens back on their own world and together explore the many challenges of 'trying to do things differently' in Higher Education. In doing so, they grapple with fundamental questions in education such as: how to meaningfully foreground democracy, partnership, and emotional care; the role and limits of free speech; and how to deconstruct enduring inequality and marginalisation. In a period of considerable change and challenge for education, there is surely no better time to be critically analysing the principles guiding our universities through the lens of real-life practice. "In a period when university arrangements are being rethought in the wake of COVID-19 and the resurgence of Black Lives Matter, this compelling text is both timely and forward looking. 'We're trying to do things differently' successfully brings together first year undergraduates and lecturers to research, analyse and document how students and staff co-create meaningful educational experiences. The authors offer a nuanced picture of the centrality of relationships and recognition to the degree course. It shows how the students foreground love, kindness and social justice, rather than curriculum and outcomes, while being alert to the politics of difference and absence in higher education classrooms. The book draws on well-worn and innovative writing styles to produce analyses and arguments that are eye-opening, persuasive and raise difficult questions for future educational practices. This book is a must for anyone interested in championing excellence and social justice in higher education." Ann Phoenix, Professor of Psychosocial Studies, UCL Institute of Education "This is a book with a difference. It is based on critical scholarship and draws on reflexive analysis but - and this is the important and unique part - it is a book written mainly by university

students about how to enact meaningful relationships in the academy. It takes as its substantive focus one new undergraduate programme but the agenda is about change, social justice and the hard work of real inclusion. This book stands as a wake-up call to all of us who care deeply about socially just education and democracy in our institutions of higher education. It is also a wonderful example of how to write something that really matters!" - Meg Maguire, Professor of Sociology of Education, King's College London

Michel Foucault examines the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity.

A new edition of the bestselling classic - published with a special introduction to mark its 10th anniversary This pioneering account sets out to understand the structure of the human brain - the place where mind meets matter. Until recently, the left hemisphere of our brain has been seen as the 'rational' side, the superior partner to the right. But is this distinction true? Drawing on a vast body of experimental research, Iain McGilchrist argues while our left brain makes for a wonderful servant, it is a very poor master. As he shows, it is the right side which is the more reliable and insightful. Without it, our world would be mechanistic - stripped of depth, colour and value.

A PBS Great American Read Top 100 Pick *Celie* has grown up poor in rural Georgia, despised by the society around her and abused by her own family. She strives to protect her sister, Nettie, from a similar fate, and while Nettie escapes to a new life as a missionary in Africa, *Celie* is left behind without her best friend and confidante, married off to an older suitor, and sentenced to a life alone with a harsh and brutal husband. Jack and his fourth wife, Babette, bound by their love, fear of death, and four ultramodern offspring, navigate the rocky passages of family life to the background babble of brand-name consumerism. Then a lethal black chemical cloud, unleashed by an industrial accident, floats over their lives, an "airborne toxic event" that is a more urgent and visible version of the white noise engulfing the Gladneys—the radio transmissions, sirens, microwaves, and TV murmurings that constitute the music of American magic and dread.

He was the greatest batsman of his generation and, as captain, possessed the sharpest tactical mind in the game. Bursting onto the scene in 2004 with a Test century on debut, Michael Clarke was Australian cricket's golden boy. And the batting prodigy they nicknamed 'Pup' certainly fulfilled his destiny in a stellar 11-year international career of 115 Tests, 8643 runs and 28 centuries. Clarke's rollercoaster four-year reign as Test captain was marked as much by bravery as brilliance - a 5-0 whitewash of England in 2013-14, the 2015 World Cup triumph, and a ten-hour unbeaten 161, batting with a broken shoulder to lead Australia back to the #1 world ranking in 2014. Yet Michael Clarke also sparked fiercer debate than any other Australian sports star. For a decade his personal life, career fortunes and controversies - real or imagined - were splashed across front pages and scrutinised. Was he simply a hard-working, western suburbs kid living every Aussie boy's dream? Or a 21st century cricketer mired in all the trappings of celebrity? In the echo chamber of social media, the truth about Michael Clarke was warped, then lost. Clarke's enigma deepened but he kept his mouth shut and his dignity intact, knowing the chance to tell his extraordinary story would finally come. And now it has. *My Story* is the real Michael Clarke, standing up and speaking out for the first time. Bucking the conventions of traditional biography to go hard at the big issues, Clarke speaks fearlessly and poignantly about the scandals, rumours and explosive moments of his life; revealing the amazing truths, private pain and personal

triumphs that no one realised. It's the incredible story of a remarkable Australian you never really knew. Until now.

The greatest run-scorer in the history of cricket, Sachin Tendulkar retired in 2013 after an astonishing 24 years at the top. The most celebrated Indian cricketer of all time, he received the Bharat Ratna Award - India's highest civilian honour - on the day of his retirement. Now Sachin Tendulkar tells his own remarkable story - from his first Test cap at the age of 16 to his 100th international century and the emotional final farewell that brought his country to a standstill. When a boisterous Mumbai youngster's excess energies were channelled into cricket, the result was record-breaking schoolboy batting exploits that launched the career of a cricketing phenomenon. Before long Sachin Tendulkar was the cornerstone of India's batting line-up, his every move watched by a cricket-mad nation's devoted followers. Never has a cricketer been burdened with so many expectations; never has a cricketer performed at such a high level for so long and with such style - scoring more runs and making more centuries than any other player, in both Tests and one-day games. And perhaps only one cricketer could have brought together a shocked nation by defiantly scoring a Test century shortly after terrorist attacks rocked Mumbai. His many achievements with India include winning the World Cup and topping the world Test rankings. Yet he has also known his fair share of frustration and failure - from injuries and early World Cup exits to stinging criticism from the press, especially during his unhappy tenure as captain. Despite his celebrity status, Sachin Tendulkar has always remained a very private man, devoted to his family and his country. Now, for the first time, he provides a fascinating insight into his personal life and gives a frank and revealing account of a sporting life like no other.
