*Macmillan Directory of Technology in  
Global Financial Markets* Routledge

This volume explores papal communication and its reception in the period c.1100–1300; it presents a range of interdisciplinary approaches and original insights into the construction of papal authority and local perceptions of papal power in the central Middle Ages. Some of the chapters in this book focus on the visual, ritual and spatial communication that visitors encountered when they met the peripatetic papal curia in Rome or

elsewhere, and how this informed their experience of papal self-representation. The essays analyse papal clothing as well as the iconography, architecture and use of space in papal palaces and the titular churches of Rome. Other chapters explore communication over long distances and analyse the role of gifts and texts such as letters, sermons and historical writings in relation to papal communication. Importantly, this book emphasises the plurality of responses to papal communication by engaging with the reception of papal messages by different audiences, both secular and ecclesiastical, and in relation to several geographic regions including England, France, Ireland, Italy and Switzerland. The chapters in this

book were originally published as a special issue of the *Journal of Medieval History*. [International Finance and Accounting Handbook](#) John Wiley & Sons  
Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses

in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Australian Books in Print Routledge

*Atlantic Childhoods in Global Contexts* explores childhood and youth in the Global South. The term childhood often conjures images of innocence, vulnerability and the need for protection, but this book suggests that, in colonial contexts, these images need to be re-examined. In fact, as the articles in this collection demonstrate, deviance, culpability, and a presumed autonomy were the more popular notions of childhood in the colonial context. These notions were held by the various actors in the colonial drama, not only colonial officials but interestingly enough often by the colonized people themselves. Furthermore, traditional notions of childhood as a period of total dependency

are challenged in this collection, as the various authors explore the ways in which children were pro-active agents who shaped notions of childhood and therefore our understanding of the history of childhood. This collection provides in-depth analysis and offers new perspectives on how children were imagined and constructed (both legally and informally) in the colonial context. The contributions cover a broad geographic range that spans the Caribbean, Latin America, Africa, and India. Each of the authors explore the ways in which the interplay of Atlantic and Global influences shaped young people's experiences, as well as the discourses that were used to articulate concerns about youth. The themes explored in this collection include the pathologization of childhood, juvenile delinquency, cultural creativity, and the use of child labour. The book ends with an interview by Sara Austin of World Vision Canada who discusses the ways in which the UN Convention on the Rights of the Child neglected to include the voices of children until 2014. This book was originally published as a special issue of *Atlantic Studies: Global Currents*.

*1961-1971* BoD – Books on Demand

This book discusses and summarizes the revived interest in reality issues (ontology) within accounting, economics, and the information sciences, with a view to informing scholars from these different disciplines about each other's endeavours in ontological research. Even more importantly, the book aims at familiarizing scholars from various disciplines with an evolutionary approach for examining questions about reality in the social sciences. The book is based on a partly pluralistic approach that assures unity in diversity. Unity, because all existence arises from physical reality; diversity, because emergent properties create biological and social realities that cannot be reduced to physical phenomena. Hence, the book recognizes not only concrete but also abstract entities. It shows, however, that the actualization of these abstract entities requires objectification and concrete manifestation. This pluralistic approach is central to this book. It also is a challenge to those who reject abstract entities as socially real, as well as to those who defend a non-realist position. The major task of this book is to

explore proposals towards a uniform ontological basis. This uniform and universal presentation extends beyond traditional ontology (asking 'what is real?') to such questions as 'on which reality level is something real?' and 'in which (temporal and modal) way is it real?'. Such an extended analysis is relevant to accountants, economists, information scientists, other social scientists as well as philosophers.

*Research Methods in Accounting* SAGE  
Trotman's Financial Accounting: An Integrated Approach incorporates comprehensive coverage of financial accounting in Australia and includes new issues in sustainability, as well as current and emerging issues, while building upon the approachable, user-friendly, Australian-focused style of previous editions. This new edition continues to provide students with a detailed understanding of the accounting framework in a balanced and engaging approach that provides non-accounting majors with enough detail to understand and analyse company financial statements, and provides accounting majors with a sound basis for future

studies in accounting. Drawing on topical source documents and newspaper articles, Financial Accounting: An Integrated Approach, 7e makes accounting interesting and relevant.

**The Papacy and Communication in the Central Middle Ages** SAGE

The fourth edition of Psychopathology is the most up-to-date text about the etiology and treatment of the most important psychological disorders. Intended for first-year graduate students in clinical psychology, counseling psychology, and related programs, this new edition, revised to be consistent with the DSM-5, continues to focus on research and empirically-supported information while also challenging students to think critically. The first part of the book covers the key issues, ideas, and concepts in psychopathology, providing students with a set of conceptual tools that will help them read more thoroughly and critically the second half of the book, which focuses on specific disorders. Each chapter in the second and third sections provides a definition, description, and brief history of the disorder it discusses, and outlines theory and research on etiology and

empirically-supported treatments. This edition also features a companion website hosting lecture slides, a testbank, an instructor's manual, case studies and exercises, and more.

**The Economics of Finance Capital Domination** Springer

We have spent a great deal of time on the continued development of accounting and auditing standards, which are used as a primary component of corporate reporting, to reach today's financial reporting framework. However, is it possible to say that, currently, financial statements provide full and prompt disclosure? Or will they still be useful as a primary element with their current structures in corporate reporting? Undoubtedly, we are deeply concerned about these issues in recent times. This volume contains chapters to discuss the today's and tomorrow's accounting and corporate reporting phenomena in a comprehensive and multidimensional way. Therefore, this book is organized into six sections: "Achieving Sustainability through Corporate Reporting", "International Standardization", "Financial Reporting Quality", "Accounting Profession and

Behavioral Aspects", "Public Sector Accounting and Reporting", and "Managerial Accounting".

*Australian national bibliography* Routledge

This research monograph critically examines convergence of financial reporting in Germany by taking into account the influence of political, social and economic factors on accounting. This study makes an original and significant contribution by examining issues and biases in the convergence process that may challenge the assumption of superiority,

#### **Introduction to Information Retrieval**

Financial Accounting: An Integrated Approach This fifth edition of Trotman's Financial Accounting: An Integrated Approach incorporates comprehensive coverage of new issues in sustainability with a new chapter dedicated to current and emerging issues, while building upon the approachable, user-friendly, Australian-focused style of previous editions. examples and case studies

**Ontological Explorations in the Economic and Social Sciences** John Wiley & Sons

Auditing has been a subject of some controversy, and there have been repeated attempts at reforming its practice globally. This comprehensive companion surveys the state of the discipline, including emerging and cutting-edge trends. It covers the most important and controversial issues, including auditing ethics, auditor independence, social and environmental accounting as well as the future of the field. This handbook is vital reading for legislators, regulators, professionals, commentators, students and researchers involved with auditing and accounting. The collection will also prove an ideal starting place for researchers from other fields looking to break into this vital subject.

**Corporate Financial Reporting** Cengage AU

Training across borders is complicated. The advent of large and diverse global organizations, and the opening of markets and opportunities right around the world have introduced a whole new level of challenge for management trainers. You

may be trying to roll-out programmes to sites in different countries or perhaps you need to bring together managers from different cultures on one site; how do you do this most cost-effectively, and how do you design and deliver a programme that will reflect their cultural and communication styles and their learning needs? Alan Melkman and John Trotman's **Training International Managers** mixes a variety of cultural and learning models with anecdotes and examples from 30 years' experience of working with organizations and cultures in every continent. There's advice on cross-cultural issues; learning design, delivery and evaluation as well as the practical issues around the economics and administration of training international managers. You'll find advice to prepare you for what to expect from different groups and different cultures in the training room and how to adapt your own training styles to the groups that you are working with. Management training can be a challenge at the best of times; read **Training International Managers** and use the models, ideas, tools and techniques advocated by the two authors and you can

be reassured that geographical distance, culture and even language need not derail your best efforts as a trainer.

*Implications from the South Pacific Region*  
Routledge

The Internet bubble has collapsed and the largest bankruptcy in US history, Enron, has made the call for greater transparency in financial reporting more important than ever. Andrew Higson draws attention to what is a 'true and fair view' in reporting and critically examines accounting theory and modern practice.

### **Achieving Global Convergence of Financial Reporting Standards**

McGraw-Hill/Irwin

The term financialization is a term that has become popular to describe developments within the global economy, and particularly within developed industrialized economies, over the past thirty years. The book is divided into four sections, which together give a comprehensive treatment of the economics and political economy of financialization.

*Books in Print Supplement* Routledge

Drawing on topical source documents and newspaper articles, Financial Accounting: An Integrated Approach, 6e makes accounting interesting and relevant. This edition features more management accounting topics as well a new online Management Accounting supplement available separately.

*Introduction to Accounting* Cengage Learning

First published in 1981 as the Offshore Information Guide this guide to information sources has been hailed internationally as an indispensable handbook for the oil, gas and marine

industries.

*Business Accounting and Finance* CRC Press

As adults, we are all continually involved in learning, with increasing numbers of us engaged in more formalized forms of learning; that is, in education or training. All those involved in the broad field of adult education and training will come into contact with many specialist ideas or concepts. It is often assumed of students that they already have a general understanding of these concepts, their meanings, applicability and inter-relationships. This is not always the case. This book examines in detail over forty of these key concepts, ranging from community education and experiential learning to competence and access. It presents a clear, analytical discussion in jargon-free language. It is, therefore, indispensable to all students and practitioners of adult education and training.

*EBOOK: Financial Accounting Theory: European Edition* Cambridge University Press

A detailed 10-stage roadmap for investors to achieve stock market mastery with their

own consistently profitable, high-probability investment system Tensile Trading provides a complete, step-by-step roadmap for investors of all levels, and coaches them on how best to organize the routines and strategies necessary to identify the market's strongest trading opportunities. History is proof that true mastery of the market begins with basic money management protocols, asset protection policies, and organized analysis techniques. With these crucial foundations in place, you can embrace a proven investment methodology, execute an effective trading plan, and develop a reliable system for profitable investing. Consistent, long-run investing success is a result of well-defined goals, carefully-constructed routines and an accurate understanding of the psychological challenges that all investors face. Set yourself up for success by implementing prudent money management and asset protection strategies Build a personalized Asset Allocation Profile—your own personalized investment methodology Construct a properly diversified portfolio using tools and techniques tailored for the modern market Learn to take control of

your "Investor Self," limiting the impact of mental hurdles and emotional baggage Supercharge your financial analysis by employing proven routines and strategies A clear and proven approach easily tailored to fit your specific investing style, Tensile Trading distills the vastness of the financial markets into ten essential stages. It is designed to provide a comprehensive structure to your financial management efforts—helping you make smarter investment decisions, trade more efficiently, and consistently earn greater returns.

*Financial Accounting* National Library Australia

Stages of Loss supplies an original and deeply researched account of travel and festivity in early modern Europe, complicating, revising, and sometimes entirely rewriting received accounts of the emergence and development of professional theatre. It offers a history of English actors travelling and performing abroad in early modern Europe, and Germany in particular, during the sixteenth and seventeenth centuries. These players, known as English Comedians, were among the first

professional actors to perform in central and northern European courts and cities. The vital contributions made by them to the development of a European theatre institution have long been neglected owing to the pre-eminence of national theatre histories and the difficulty of researching an inherently evanescent phenomenon across large distances. These contributions are here introduced in their proper contexts for the first time. *Stages of Loss* explores connections real and perceived between diminishment of

national value and the material wealth transported by itinerant players; representations of loss, waste, and profligacy within the drama they performed; and the extent to which theatrical practice and the process of canonization have led to archival and interpretive losses in theatre history. Situating the English Comedians in a variety of economic, social, religious, and political contexts, it explores trends and continuities in the reception of their itinerant theatre, showing how their incorporation into modern theatre history

has been shaped by derogatory assessments of travelling theatre and itinerant people in the seventeenth and eighteenth centuries. *Stages of Loss* reveals that the Western theatre institution took shape partly as a means of accommodating, controlling, evaluating, and concealing the work of migrant strangers.
