Volume 2** McGraw-Hill
Education

This superb book will guide the reader through the key issues and practical aspects of international tax practice. It demonstrates how different global tax systems interact and how to prevent paying more tax than necessary. The basic principles of each

aspect of international taxation are outlined and then examined in greater depth and detail. This updated third edition includes coverage of both UK and EU legislation and regulation, as well as the key cases and rulings. Complicated double taxation concepts are clearly illustrated with examples and diagrams to help the reader quickly understand how they'll apply in practice. Examples of policies adopted in other countries are included, along with specialist commentary

and guidance. *Hospitality Management Accounting* Wiley 'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts. *Problem Solving Survival Guide to Accompany Financial Accounting, 8th Edition* McGraw-Hill Education This Valencia College edition of Fundamental

Financial Accounting Concepts 8th Edition by Edmonds/McNair/Olds is designed for the undergraduate introductory financial accounting course, specifically for those wanting to focus on the relationships between business events and financial statements. This text is also appealing to those instructors looking for a shorter text that focuses more on key financial accounting concepts rather than procedural details, and to those

desiring a stronger user orientation in their course. Overview: Students are often overwhelmed by the amount of information presented in the introductory financial accounting course. By focusing on fundamental concepts in a logical sequence, students are able to fully comprehend the material rather than memorize seemingly unrelated terms and topics. The goal of Fundamental Financial Accounting Concepts is to enable students to understand how any given

business event affects the financial statements. The financial statements model is a highly praised feature because it allows students to visualize the simultaneous impact of business events on all of the key financial statements (the income statement, the balance sheet, and the statement of cash flows). -- provided by publisher.

Managerial Accounting
Wiley
Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is

inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short successfully implements a

real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. Libby/Libby/Short believes in the building-block

approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting. And yet all other financial books introduce and develop transaction analysis in one chapter, bombarding a student early in the course with an overload of new concepts and terms. The authors believe that most faculty take more time with the accounting cycle, but other financial accounting textbooks don't. By slowing down the

introduction of transactions and giving students time to practice and gain mastery, this building-block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries.
