From 2001 to 2011,  
the International  
Accounting Standards  
Board (IASB) and its

International Financial  
Reporting Standards  
(IFRSs), acquired a  
central position in the  
practice and regulation  
of financial reporting  
around the world. As a  
unique instance of a  
private-sector body  
setting standards with

legal force in many jurisdictions, the IASB's rise to prominence has been accompanied by vivid political debates about its governance and accountability. Similarly, the IASB's often innovative attempts to change the face of financial reporting have made it the centre of numerous controversies. This book traces the history of the IASB from its foundation as successor to the International Accounting Standards Committee (IASC), and discusses its operation, changing membership and leadership, the development of its standards, and their reception in jurisdictions around the world. The book gives particular attention to the IASB's relationships with the European

Union, the United States, and Japan, as well as to the impact of the financial crisis on the IASB's work. By its in-depth coverage of the history of the IASB, the book provides essential background information that will enrich the perspective of everyone who has to deal with IFRSs or the IASB at a technical or policy-making level.

Carol Newsom illuminates the relation between the aesthetic forms of Job and the claims made by its various characters. Her innovative approach makes possible a new understanding of the unity of the book that rejects its dismantling in historical criticism and the flattening of the text that characterizes many final form readings. Additionally, she rehabilitates the moral perspectives represented by certain voices of the book that modern critics have treated with disdain.
