### **Hacks for Minecrafters: Redstone** Del Rey

The world of video games has long revolved around a subset of its player base: straight, white males aged 18-25. Highly gendered marketing in the late 1990s and early 2000s widened the gap between this perceived base and the actual diverse group who buy video games. Despite reports from the Entertainment Software Association that nearly half of gamers identify as female, many developers continue to produce content reflecting this imaginary audience. Many female gamers are in turn modifying the games. "Modders" alter the appearance of characters, rewrite scenes and epilogues, enhance or add love scenes and create fairy tale happy endings. This is a collection of new essays on the phenomenon of women and modding, focusing on such titles as *Skyrim*, *Dragon Age*, *Mass Effect* and *The Sims*. Topics include the relationship between modders and developers, the history of modding, and the relationship between modding and disability, race, sexuality and gender identity.

With 1 in 59 children being diagnosed with Autism Spectrum Disorder (ASD), odds are that students on the spectrum will be in many classrooms across every subject area. Seeing the Spectrum argues that secondary English teachers are uniquely equipped to prepare students with autism for future success, both in school and in life. Writing for preservice and current English language arts teachers, Robert Rozema offers practical, evidenced-based strategies for teaching literature, informational texts, writing, and communication to students on the spectrum. These strategies are appropriate for inclusive classrooms with both neurotypical students and students with autism. The final chapter includes a complete unit plan on Of Mice and Men, illustrating how curriculum focused on commonly taught literary works can be reimaged to accommodate the needs and draw on the strengths of students on the spectrum. "I appreciate this book. I appreciate the gift Robert Rozema has given me. My thinking and teaching will now be more diverse, more consciously competent, more compassionate, and

therefore more vital.” —From the Foreword by Jeffrey D. Wilhelm, distinguished professor of English Education, Boise State University, and author of “You Gotta BE the Book”

“Seeing the Spectrum examines real young people and daily classroom interactions to help teachers better understand the mental and emotional processing of their autistic spectrum students and devise assignments to scaffold their success. Rozema knows what matters in English: reading literature, developing empathy, understanding complex ideas and interpersonal relationships, writing to express complicated ideas. The diverse tools, strategies, and ideas he describes foster inclusiveness, compassion, and success for all students.” —Allen Webb, professor of English, Western Michigan University
