**Engaging Men in the Fight against Gender Violence** Taylor & Francis

Making Market Women tells of the initial success and failure of a liberationist Catholic women's cooperative in central Ecuador. Jill DeTemple argues that when gender and religious identities are capitalized, they are made vulnerable. Using archival and ethnographic methods, she shares the story of the women involved in the cooperative, producing cheese and knitted goods for local markets, and places their stories in the larger context of both the cooperative and the community. DeTemple explores the impact of gender roles, the perception of women, the growing middle class, and the changing mode of Catholicism in their community. Although the initial success of the cooperative may have been due to the group's cohesion and Catholic identity, the ultimate failure of the enterprise left many women less secure in these ties. They keep their Catholic identity but blame the institutional church in some ways for the failure and are less confident in their ability as women to compete successfully in market economies. Because DeTemple examines not only the effects of gender and religion on development but also the effects of development, successful or unsuccessful, on the identities of those involved, this book will interest scholars of international development, religious studies, Latin American studies, anthropology, and women's studies.

[The Encyclopedia of Theoretical Criminology](#) Cambridge University Press

Criminology is a discipline that is constituted by its subject matter rather than being bound by an agreed set of concepts or way of

thinking. This fully updated third edition of *Criminology: The Basics* is a lively and engaging guide to this compelling and complex subject. Topics covered include: the history and development of criminology myths about crime and offenders the search for criminological explanation victims of crime and state crime crime prevention, cybercrime, and the future of crime control criminology and intersectionality This edition also includes new sections on genocide, terrorism, cultural victimology, and Westo-centric thinking. Concise and accessible, this book utilises chapter summaries, exercise questions and lists of further reading to provide a perfect introduction to this subject.

**Criminological Perspectives** Routledge

This volume provides researchers and students with a discussion of a broad range of methods and their practical application to the study of non-state actors in international security. All researchers face the same challenge, not only must they identify a suitable method for analysing their research question, they must also apply it. This volume prepares students and scholars for the key challenges they confront when using social-science methods in their own research. To bridge the gap between knowing methods and actually employing them, the book not only introduces a broad range of interpretive and explanatory methods, it also discusses their practical application. Contributors reflect on how they have used methods, or combinations of methods, such as narrative analysis, interviews, qualitative comparative analysis (QCA), case studies, experiments or participant observation in their own research on non-state actors in international security. Moreover, experts on the relevant methods discuss these applications as well as the merits and limitations of the various methods in use. Research on non-state actors in international security provides ample challenges and opportunities to probe different methodological approaches. It is thus particularly

instructive for students and scholars seeking insights on how to best use particular methods for their research projects in International Relations (IR), security studies and neighbouring disciplines. It also offers an innovative laboratory for developing new research techniques and engaging in unconventional combinations of methods. This book will be of much interest to students of non-state security actors such as private military and security companies, research methods, security studies and International Relations in general.

**Theory and Practice** Oxford University Press

Recent events such as 'Iran's Green Revolution' and the 'Arab Uprisings' have exploded notions that human rights are irrelevant to Middle Eastern and North African politics. Increasingly seen as a global concern, human rights are at the fulcrum of the region's on-the-ground politics, transnational intellectual debates, and global political intersections. The *Routledge Handbook on Human Rights and the Middle East and North Africa*: emphasises the need to consider human rights in all their dimensions, rather than solely focusing on the political dimension, in order to understand the structural reasons behind the persistence of human rights violations; explores the various frameworks in which to consider human rights—conceptual, political and transnational/international; discusses issue areas subject to particularly intense debate—gender, religion, sexuality, transitions and accountability; contains contributions from perspectives that span from global theory to grassroots reflections, emphasising the need for academic work on human rights to seriously engage with the thoughts and practices of those working on the ground. A multidisciplinary approach from scholars with a wide range of expertise allows the book to capture the complex dynamics by which human rights have had, or could have, an impact on Middle Eastern and North African politics. This

book will therefore be a key resource for students and scholars of Middle Eastern and North African politics and society, as well as anyone with a concern for Human Rights across the globe.

*The Voice of Breast Cancer in Medicine and Bioethics* Springer Nature

This book presents the effects of integrating information and communication technologies (ICT) and economic processes in macroeconomic dynamics, finance, marketing, industrial policies, and in government economic strategy. The text explores modeling and applications in these fields and also describes, in a clear and accessible manner, the theories that guide the integration among information technology (IT), telecommunications, and the economy, while presenting examples of their applications. Current trends such as artificial intelligence, machine learning, and big data technologies used in economics are also included. This volume is suitable for researchers, practitioners, and students working in economic theory and the computational social sciences.

**Transgressing Feminist Theory and Discourse** Routledge

This book provides an in-depth analysis of the influence of public policy on sex selection. Three Asian countries were chosen for the comparative policy analysis, namely South Korea, India and Vietnam that share in common a historical legacy of son preference, high levels of sex imbalances and active policy response to curbing the growing demographic masculinization of their nations. The research based on the data collected from field work in the three countries shows that despite the adoption of very similar anti-sex selection policies the outcomes have been markedly different for each of the three countries. These unexpected diverse outcomes are explained partly by their different historical and cultural contexts, and partly to the different social, political and economic institutions and dynamics. This monograph offers careful and detailed explanations of both within and across country diversities in policy outcomes, pointing to the importance and the limits of cross-national policy learning and adoption, and raising questions about the efficacy of international organizations' current approaches to global policy and knowledge transfer.

*Situation and Socialization* Springer Nature

Gender-sensitive policy and programming have an integral role to play in fostering inclusive agricultural growth to meet the

commitments of African countries to the Malabo Declaration goals. The 2019 Annual Trends and Outlook Report from ReSAKSS applies a gender lens to key issues that must be addressed to fully achieve these goals. Chapters examine the intersections between gender and (1) the context and institutions within which rural people operate; (2) the natural resources that men and women depend on for agriculture, sources of vulnerability, and resilience to shocks; (3) assets and income; and (4) livelihood strategies and well-being. The report serves as the official M&E report for the Comprehensive Africa Agriculture Development Programme (CAADP), tracking progress on over 30 CAADP indicators.

**Decision-Making Process around Teenage Motherhood**

Palgrave Macmillan

2013 Outstanding Book Award Winner from the Division of International Criminology, American Society of Criminology Every year, thousands of Chinese women travel to Asia and the United States in order to engage in commercial sex work. In *Selling Sex Overseas*, Ko-lin Chin and James Finckenauer challenge the current sex trafficking paradigm that considers all sex workers as victims, or sexual slaves, and as unwilling participants in the world of commercial sex. Bringing to life an on-the-ground portrait of this usually hidden world, Chin and Finckenauer provide a detailed look at all of its participants: sex workers, pimps, agents, mommies, escort agency owners, brothel owners, and drivers. Ultimately, they probe the social, economic, and political organization of prostitution and sex trafficking, contradicting many of the 'moral crusaders' of the human trafficking world.

*Gender-Based Violence in Latin American and Iberian Cinemas* rethinks the intersection between violence and its gendered representation. This is a groundbreaking contribution to the international debate on the cinematic construction of gender-based violence. With essays from diverse cultural backgrounds and institutions, this collection analyzes a wide range of films across Latin America and the Iberian Peninsula. The volume makes use of varied perspectives including feminist, postcolonial, and queer theory to consider such issues as the visual configuration of power and inequality, the objectification and the invisibilization of women's and LGBTQ subjects' resistance, the role of female film-makers in transforming hegemonic accounts of violence, and the subversion of common tropes of gendered violence. This will be of significance for students and scholars in Latin American and Iberian studies, as well as in film studies, cultural studies, and gender and queer studies.

*Theory, Gender, Context* University of Notre Dame Press

The objective of this study is to understand the perceptions, beliefs, and influencing factors that may lead to different fertility outcomes among young women in Nicaragua, a country with one of the highest adolescent fertility rates in Latin America. The results are based on qualitative data collected in urban areas. Miriam Müller reveals that two structural constraints affect women's choices and their capacity to actively participate in defining their life paths: poverty and traditional gender norms. This book contributes to the discussion of intergenerational

transmission of poverty by disentangling the mechanisms behind decision-making around teenage motherhood and by describing the consequences of these decisions.

*Assessing the Influence of Public Policy* ANU Press

Traditional explorations of war look through the lens of history and military science, focusing on big events, big battles, and big generals. By contrast, *The SAGE Encyclopedia of War: Social Science Perspective* views war through the lens of the social sciences, looking at the causes, processes and effects of war and drawing from a vast group of fields such as communication and mass media, economics, political science and law, psychology and sociology. Key features include: · Approximately 700 entries organized A-to-Z, authored and signed by key academics in the field · Entries conclude with cross-references and further readings, aiding the researcher further in their research journeys · An alternative Reader's Guide table of contents groups articles by disciplinary areas and by broad themes · A Glossary and helpful Resource Guide directing researchers to classic books, journals and electronic resources for more in-depth study This important and distinctive work will be a key reference for all researchers in the fields of political science, international relations and sociology.

Fairness of wage distribution – or the perception of such – is a phenomenon crucial for the stability of new democracies. While theories exist about how change of the political system trickles down to the attitudinal level, the systematic analysis of the effect of economic transition on public attitudes has been neglected to a large extent. *Wage Distribution Fairness in Post-Socialist Countries* proposes a conceptual framework to measure the fairness of wage distribution. Indeed, looking particularly at wage distribution fairness in three post-socialist societies (Hungary, East Germany, Czech Republic) since the transition in 1989, this challenging monograph also aims to understand if, and to what extent, the experience of a socialist regime motivates individuals to consider wage distribution as fair. Contributing to our understanding of the relevance of socialization and other situational factors influencing economic legitimacy, *Wage Distribution Fairness in Post-Socialist Countries* will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, interested in fields including: Sociology, Eastern European Studies and Political Economics.

*Contemporary Perspectives* SAGE Publications
