The Effect of Coronavirus Disease (COVID-19) on Business Intelligence CRC Press

The European Journal of Tourism Research is an interdisciplinary scientific journal in the field of tourism, published by Varna University of Management, Bulgaria. Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism. Publications from all fields, connected with tourism such as management, marketing, sociology, psychology, geography, political sciences, mathematics, statistics, anthropology, culture, information technologies and others are invited. The journal is open to all researchers. Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions. Regular Articles in the European Journal of Tourism Research should normally be between 4 000 and 20 000 words. Major research articles of between 10 000 and 20 000 are highly welcome. Longer or shorter papers will also be considered. The journal publishes also Research Notes of 1 500 – 2 000 words. Submitted papers must combine theoretical concepts with practical applications or empirical testing. The European Journal of Tourism Research includes also the following sections: Book Reviews, announcements for Conferences and Seminars, abstracts of successfully defended Doctoral Dissertations in Tourism, case studies of Tourism Best Practices. The European Journal of Tourism Research is published in three Volumes per year. The full text of the European Journal of Tourism Research is available in the following databases: EBSCO Hospitality and Tourism Complete, CABI Leisure, Recreation and Tourism, ProQuest Research Library. Individual articles can be rented via journal's page at DeepDyve. The journal is indexed in Scopus and Thomson Reuters' Emerging Sources Citation Index. The editorial team welcomes your submissions to the European Journal of Tourism Research.

Organizational & Customer Factors Influencing Adoption of Electronic Banking IGI Global

This book includes recent research works on how business around the world affected by the time of COVID-19 pandemic. The impact of recent technological developments has had a tremendous impact on how we manage disasters. These developments have changed how countries and governments collect information. The COVID-19 pandemic has forced online service companies to maintain and build relationships with consumers when their world turns. Businesses are now facing tension between generating sales during a period of severe economic hardship and respect for threats to life and livelihoods that have changed consumer preferences.

Factors Affecting the Adoption of Electronic Tolling Tags in South Africa IGI Global

The COVID-19 pandemic has increased the focus on health informatics and healthcare technology for policy makers and healthcare professionals worldwide. This book contains the 110 papers (from 160 submissions) accepted for the 18th annual International Conference on Informatics, Management, and Technology in Healthcare (ICIMTH 2020), held virtually in Athens, Greece, from 3 – 5 July 2020. The conference attracts scientists working in the field of Biomedical and Health Informatics from all continents, and this year it was held as a Virtual Conference, by means of teleconferencing, due to the COVID-19 pandemic and the consequent lockdown in many countries around the world. The call for papers for the conference started in December 2019, when signs of the new virus infection were not yet evident, so early submissions were on the usual topics as announced. But papers submitted after mid-March were mostly focused on the first results of the pandemic analysis with respect to informatics in different countries and with different perspectives of the spread of the virus and its influence on public health across the world. This book therefore includes papers on the topic of the COVID-19 pandemic in relation to informatics reporting from hospitals and institutions from around the world, including South Korea, Europe, and the USA. The book encompasses the field of biomedical and health informatics in a very broad framework, and the timely inclusion of papers on the current pandemic will make it of particular interest to all those involved in the provision of healthcare everywhere.

Factors Affecting Adoption of Electronic Health Record (EHR) Systems in United States Hospitals Springer Nature

This book aims to study the factors effecting the adoption and diffusion of Health Information Technology (HIT) innovation. It analyses the adoption processes of various tools and applications, particularly Electronic Health Records (EHR), highlighting the impact on various sectors of the healthcare system, such as physicians, administration and patient care, while also identifying the various pitfalls and gaps in the literature. With the various challenges currently facing the United States healthcare system, the study, adoption and diffusion of healthcare technology innovation, particularly HIT, is imperative to achieving national goals. This book is organized into three sections. Section one reviews theories and applications for the diffusion of Health Care Technologies. Section two evaluates EHR technology, including the barriers and enablers in adoption and alternative technologies. Finally, section three examines the factors impacting the adoption of EHR systems. This book will be a key source for students, academics, researchers, practitioners, professionals and policy-makers.

Proceedings of the 14th European Conference on e-Government Academic Conferences Limited

In today's increasingly connected business world, there is new pressure for local brands to go global, and a need for already global corporations to cater to new audiences that were previously ignored. *Islamic Perspectives on Marketing and Consumer Behavior: Planning, Implementation, and Control* brings together the best practices for entry and expansion of global brands into Islamic countries. This book is an essential reference source for professionals looking to incorporate the laws and practices of Islam into the global presence of their company and presents a cutting edge look at worldwide retail for marketing researchers and academics.

E-Business in the 21st Century Varna University of Management

These proceedings represent the work of authors at the 13th European Conference on e-Government (ECEG 2013). The Conference this year is hosted by the University of Insubria in Como, Italy. The Conference Chair is Professor Walter Castelnovo and the Programme Chair is Professor Elena Ferrari, both are from the Department of Theoretical and Applied Sciences at the University of Insubria. The opening keynote address is given by Dr Gianluca Misuraca from the European Commission, Joint Research Centre, Institute for Prospective Technological Studies, Seville, Spain and Gianluca is addressing the topic "eGovernment: Past, Present & Future: A policy-research perspective for renewing governance in the digital age." The second day of the conference is opened by Dr Antonio Cordella from the London School of Economics, London, UK, who will talk about "Public value creation: the new challenge for e-government policies." ECEG brings together, researchers, Government officials and practitioners in the area of e-Government from around the world. Participants are able to share their research findings and explore the latest developments and trends in the field which can then be disseminated to the wider community. With an initial submission of 153 abstracts, after the double blind, peer review process there are papers published in these Conference Proceedings from 40 countries including Australia, Austria, Belgium, Brazil, Canada, China, Costa Rica, Croatia, Denmark, Egypt, Germany, Greece, India, Iran, Iraq, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malaysia, Netherlands, New Zealand, Norway, Pakistan, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, UK and USA. This will ensure a very interesting two days.

Emerging Markets and E-Commerce in Developing Economies Springer Science & Business Media

The proliferation of entrepreneurship, technological and business innovations, emerging social trends and lifestyles, employment patterns, and other developments in the global context involve creative destruction that transcends geographic and political boundaries and economic sectors and industries. This creates a need for an interdisciplinary exploration of disruptive technologies, their impacts, and their implications for various stakeholders widely ranging from government agencies

to major corporations to consumer groups and individuals. *Disruptive Technology: Concepts, Methodologies, Tools, and Applications* is a vital reference source that examines innovation, imitation, and creative destruction as critical factors and agents of socio-economic growth and progress in the context of emerging challenges and opportunities for business development and strategic advantage. Highlighting a range of topics such as IT innovation, business strategy, and sustainability, this multi-volume book is ideally designed for entrepreneurs, business executives, business professionals, academicians, and researchers interested in strategic decision making using innovations and competitiveness.

Disruptive Technology: Concepts, Methodologies, Tools, and Applications Springer

This third global survey of the WHO Global Observatory for eHealth (GOe) investigated how eHealth can support universal health coverage (UHC) in Member States. A total of 125 countries participated in the survey? a clear reflection of the growing interest in this area. The report considers eHealth foundations built through policy development funding approaches and capacity building in eHealth through the training of students and professionals. It then observes specific eHealth applications such as mHealth telehealth electronic health records systems and eLearning and how these contribute to the goals of UHC. Of interest is the extent to which legal frameworks protect patient privacy in EHRs as health care systems move towards delivering safer more efficient and more accessible health care. Finally the rapidly emerging areas of social media for health care as well as big data for research and planning are reported.

Electronic Government: Concepts, Methodologies, Tools, and Applications DIANE Publishing

E-based systems and computer networks are becoming standard practice across all sectors, including health, engineering, business, education, security, and citizen interaction with local and national government. With contributions from researchers and practitioners from around the world, this two-volume book discusses and reports on new and important developments in the field of e-systems, covering a wide range of current issues in the design, engineering, and adoption of e-systems.

Structural Equation Modeling Approaches to E-Service Adoption IGI Global

"This book provides researchers readers with a synthesis of current research on developing countries experience with e-commerce"--Provided by publisher.

Critical Factors Affecting Electronic Health Records Adoption in Private Hospitals in Amman East African Publishers

Electronic Banking is relatively a recent technology that enables customers to perform many financial services with no need to visit bank branches. It is internet based technology that can be accessed through a PC (Internet banking) or a wireless network and mobile phone (Mobile banking). This technology is adopted by almost all the banks worldwide for many years now and still there is high potential for growth. Many past studies have examined the benefits of diffusion and adoption of this banking alternative channel to both customers and banks. However, the uptake of this technology in Egypt is still slow and still many Egyptian customers are relying on bank branches to perform financial transactions. This paper explores some organizational and customer factors that influence the diffusion and adoption of electronic banking in Egypt towards increasing the rate of usage by both Egyptian banks and customers. The study also proposes some guiding strategies for Egyptian banking sector based on the explored factors. These strategies are change management, Building bank-customer relationship (trust), creating awareness and removing the risk and security customer concerns of technology. The study also recommends that the Egyptian banks should consider the demographics variables, specially age, education and income level when setting strategies for electronic banking as an alternative channel to traditional banking. The importance of customer and employees past experience in using technology also was highlighted in this research.

A Study of Factors Influencing Electronic Commerce Adoption by Small & Medium Enterprises in Brunei Darussalam LAP Lambert Academic Publishing

"This book is a collection of knowledge on contemporary experiences on technological, societal and legal setups of e-Government implementation in emerging economies"--Provided by publisher.

E-Business Issues, Challenges and Opportunities for SMEs: Driving Competitiveness IGI Global

With the modernization of services offered through the internet, many traditional face-to-face services have adopted new e-service phenomena. Especially prevalent among the younger generations, this change in service has promoted many industries to rethink how to best reach their consumers using modern technology. Structural Equation Modeling Approaches to E-Service Adoption is a pivotal reference source that aims to share the latest empirical research findings within technology acceptance, information systems, information technology, human-computer interaction, and management information systems. While highlighting topics such as e-commerce, internet banking, and technology acceptance, this publication explores the understanding of today's e-services in a dynamic and complex environment, as well as the methods within the field of information systems and information technologies. This book is ideally designed for academics, students, managers, and scholars interested in the up-and-coming research surrounding the field of information technology.

Islamic Perspectives on Marketing and Consumer Behavior: Planning, Implementation, and Control Academic Conferences Limited

The 13th International Conference on Human-Computer Interaction, HCI International 2009, was held in San Diego, California, USA, July 19-24, 2009, jointly with the Symposium on Human Interface (Japan) 2009, the 8th International Conference on Engineering Psychology and Cognitive Ergonomics, the 5th International Conference on Universal Access in Human-Computer Interaction, the Third International Conference on Virtual and Mixed Reality, the Third International Conference on Internationalization, Design and Global Development, the Third International Conference on Online Communities and Social Computing, the 5th International Conference on Augmented Cognition, the Second International Conference on Digital Human Modeling, and the First International Conference on Human Centered Design. A total of 4,348 individuals from academia, research institutes, industry and governmental agencies from 73 countries submitted contributions, and 1,397 papers that were judged to be of high scientific quality were included in the program.

These papers - dress the latest research and development efforts and highlight the human aspects of the design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas.

Factors Affecting the Adoption of Electronic Health Records by Nurses Wolters Kluwer

Provides research on e-government and its implications within the global context. Covers topics such as digital government, electronic justice, government-to-government, information policy, and cyber-infrastructure research and methodologies.

Factors Affecting the Adoption of Electronic Customer Relationship Management (E-CRM) by Small and Medium Enterprises (SMEs) in Kenya [MBA Thesis] IGI Global

An Electronic Health Record system helps improve medical care and save lives by eliminating medical errors and providing up-to date patient data. However, developing countries are slow in adopting EHR systems despite the huge benefits. Identifying factors affecting the adoption of EHR systems is crucial to manage and overcome the barriers faced in developing countries. This book investigates Factors that are affecting the adoption of EHR systems in medium scale hospitals in Sri Lanka. It further proposes a model for adoption of EHR.

Healthcare Technology Innovation Adoption IOS Press

The purpose of the research is to find the factors which persuade the consumers' trust on e-commerce adoption in Sri Lanka. The creation of the Internet has reduced physical borders and made the world a smaller place where people can able to keep in touch with one another at any time from every nook and corner. This research arise the following research questions. How the security and privacy concerns in online transaction relate with e-commerce adoption? How do the trustworthiness and reliability of the web vendors relate to the consumer's adoption of e-commerce? and How the performance, physical, security, privacy and delivery risk affect consumers to adopt in e-commerce. Questionnaire was used as a research instrument and basically the questionnaire cover two parts; such as 1st part covers questions related to online purchase and adoption of electronic commerce. The 2nd part covers factors affecting ecommerce security, privacy, and trust as well as risk perceptions. The extensive literature survey helped to form the research variables and hypothesis. To measure the questions likert scale measurement was used. The likert scale measurement were ranging from 1 - very unimportant to 5 - very

important. This research shows that, consumer's perceived privacy, security and trustworthiness of Web vendor in e-commerce transaction positively contributes to his/her trust in e-commerce adoption. On the other hand the influence of a consumer's perceived security in e-commerce transaction is mediated by consumer's perceived privacy and consumer's adoption in e-commerce transaction not negatively associated with e-commerce perceived risks.

Handbook of Research on Innovation and Development of E-Commerce and E-Business in ASEAN IGI Global

As financial systems migrate to a pervasive, online environment, business leaders and layman investors alike must adapt to changes in the market brought about by this new age of business. Strategic E-Commerce Systems and Tools for Competing in the Digital Marketplace advances the body of knowledge on electronic business and commerce with an in-depth look at the opportunities and concerns surrounding online business and finance. This cutting-edge reference aids business leaders, financial managers, investors, and consumers looking to build their portfolios and thrive in modern digital business environments.

Decision Factors Affecting the Adoption of Electronic Data Processing Banks in Lebanon IGI Global

Introduction of internet-based electronic commerce contributes significant opportunities for large and small firms to grow their business from customer base perspective, introducing innovative products and rationalise their businesses by competing in the global economy. It has been a slow initiative for small, medium and micro enterprises (SMMEs) to adopt and evaluate electronic commerce. Many SMMEs have been unsuccessful in achieving the levels of adoption required to appreciate the benefits associated with e-commerce during the developmental stages of operations. The study's purpose is to investigate the factors that affect the adoption/ non-adoption of e-commerce in SMMEs.

Factors Influencing Consumers' Trust on E-commerce Adoption in Sri Lanka IGI Global

Provides data on technologically advanced equipment & software categorized into four general areas: design & engineering; fabrication & machining; materials handling; & inspection & quality control.
