A New York Times bestseller and enduring classic, *All About Love* is the acclaimed first volume in feminist icon bell hooks' "Love Song to the Nation" trilogy. *All About Love* reveals what causes a polarized society, and how to heal the divisions that cause suffering. Here is the truth about love, and inspiration to help us instill caring, compassion, and strength in our homes, schools, and workplaces. "The word 'love' is most often defined as a noun, yet we would all love better if we used it as a verb," writes bell hooks as she comes out fighting and on fire in *All About Love*. Here, at her most provocative and intensely personal, renowned scholar, cultural critic and feminist bell hooks offers a proactive new ethic for a society bereft with lovelessness--not the lack of romance, but the lack of care, compassion, and unity. People are divided, she declares, by society's failure to provide a model for learning to love. As

bell hooks uses her incisive mind to explore the question "What is love?" her answers strike at both the mind and heart. Razing the cultural paradigm that the ideal love is infused with sex and desire, she provides a new path to love that is sacred, redemptive, and healing for individuals and for a nation. The *Utne Reader* declared bell hooks one of the "100 Visionaries Who Can Change Your Life." *All About Love* is a powerful, timely affirmation of just how profoundly her revelations can change hearts and minds for the better.

In *Feminism Against Progress*, Mary Harrington argues that the industrial-era faith in progress is turning against all but a tiny elite of women. Women's liberation was less the result of human moral progress than an effect of the material consequences of the Industrial Revolution. We've now left the industrial era for the age of AI, biotech and all-pervasive computing. As a result, technology is liberating us from natural limits and embodied sex differences. Although this shift benefits a small class of successful professional women, it also makes it easier to commodify women's bodies, human intimacy and female reproductive abilities. This is a stark warning against a dystopian future whereby poor women become little more than convenient sources of body parts to be harvested and wombs to be rented by the rich. Progress has now stopped benefiting the majority of women, and only a feminism that is sceptical of it can truly defend female interests in the 21st century.

This book attacks the often implicit and damaging assumption that 'everyone' is online and that 'everyone' is using online resources within the specified parameters of employers, government and national laws. This book summons a critical Web Studies, asking not only who is using

particular applications, but also how and why. This remedial work is required. The concept and label of 'Web 2.0' is part of a wide-ranging suite of assumptions that offer simple answers to difficult questions. The term captures a desire for online collaboration and the sharing of information, performed most visibly through blogs, podcasts and wikis. Other 'products' that capture the Web 2.0 ideology include Google Maps, Facebook, MySpace and Flickr. Within this framework, websites no longer hold information but become a platform to connect applications with users. The business applications have gained the most attention - particularly content syndication - but there are also 'political' initiatives overlaying this project including open communication, the sharing of data and the deep linking of web architecture. Development of innovative concepts and models to manage the digital divide. Evocative studies of the digitally excluded and downloading communities. Attention to digital literacy and online education.

Competition talent shows have been among the most popular on television in the 21st century. The producers of these shows claim to give ordinary people extraordinary opportunities to change their lives by showcasing a specific skill leading to a new career trajectory. Most participants will claim that they entered to get a big break and to develop a career they have always dreamed of. To what extent do these shows deliver on such promises? Following through what happens to leading contestants in singing, entertainment, modelling, cooking and business entrepreneur competitions, this book shows that few go on to achieve lasting success in their chosen career. Many return to obscurity or to their previous lives. Some enjoy a low level career in the new direction delivered by the competition they entered. Just a few become truly successful. The pop and entertainment themed contests have discovered just a handful of major pop stars and entertainers out of many hundreds who have taken part after the initial auditions. Turning to the cookery or business franchises, there are few who go on to achieve lasting success in their chosen career. In these it is equally likely that the winners go on to enjoy success with media careers rather than as chefs or entrepreneurs. The most successful franchise of all is the fashion model competition (Next Top Model), which has yielded a high hit rate in terms of career success. What the analysis here also reveals is that it isn't only the winners who

ultimately benefit the most from their appearances in these shows. Moreover, television picks its own stars by recruiting contestants because they are telegenic or have a good backstory as much as for their relevant talents. In this way, a talent hungry medium has co-opted these franchises to replenish its own needs.
