The Unquenchable Worshipper issues a passionate call for a return to an unadulterated, first-love lifestyle of worship. In his first book release, respected worship leader and songwriter Matt Redman writes: "The

revelation of God is the fuel for the fire of our worship. And there is always more fuel for the fire. When we open the eyes of our heart, God's revelation comes flying at us from so many different angles." Open the eyes of your heart and let the gut-level message of The Unquenchable Worshipper cause you, like martyred missionary Jim Elliot, to say, "Saturate me with the oil of Thy Spirit, that I may be aflame. Make me Thy fuel O flame of God." It's time to dive into the heart of worship—will you

take the plunge?

 Illegal, inhuman, and impervious to recession, there is one trade that continues to thrive, just out of sight. The international sex trade criss-crosses the entire globe, a sinister network made up of criminal masterminds, local handlers, corrupt policemen, willfully blind politicians, eager consumers, and countless hapless women and children. In this ground-breaking work of investigative reporting, the celebrated journalist

Lydia Cacho follows the trail of the traffickers and their victims from Mexico to Turkey, Thailand to Iraq, Georgia to the UK, to expose the trade's hidden links with the tourist industry, internet pornography, drugs and arms smuggling, the selling of body organs, money laundering, and even terrorism. This is an underground economy in which a sex slave can be bought for the price of a gun, but Cacho's powerful first-person interviews with mafiosi, pimps, prostitutes, and those

who managed to escape from captivity makes it impossible to ignore the terrible human cost of this lucrative exchange. Shocking and sobering, Slavery Inc, is an exceptional book, both for the colossal scope of its enquiry, and for the tenacious bravery with which Cacho pursues the truth.

This book presents a geometric theory of complex analytic integrals representing hypergeometric functions of several variables.

Starting from an integrand which is a product of powers of polynomials, integrals are explained, in an open affine space, as a pair of twisted de Rham cohomology and its dual over the coefficients of local system. It is shown that hypergeometric integrals generally satisfy

a holonomic system of linear differential equations with respect to the coefficients of polynomials and also satisfy a holonomic system of linear difference equations with respect to the exponents. These are deduced from Grothendieck-Deligne's rational de Rham cohomology on the one hand, and by multidimensional extension of Birkhoff's classical theory on analytic difference equations on the other. *A Guide to Form 1040*
