Students understand (or "get it") right after you do a problem in class. However, as soon as they leave class, their ability to do the problems and complete their homework diminishes with each passing hour. Often times this results in students struggling to complete their homework on their own. Even worse, the frustration can lead to students quitting on the material altogether and falling behind in the course. As a result, an entire class can fall behind as instructors attempt to keep everyone on the same page. With the Accounting 8e Student Learning System, all features of the student textbook, study resources and online homework system are designed to

work together to provide students with more “I Get It!” moments. The consistency, repetition and strong details throughout the entire student learning system allow students to achieve success both inside and outside the classroom while keeping both instructors and students on track.

Accountants' Handbook, Financial Accounting and General Topics McGraw-Hill Education

This book, first published in 1982, gathers together a series of articles and editorials written in response to the Accounting Research Program of the early 1960s. Accounting Research Study No. 1 and No. 3 sprang from the American Institute of Certified Public Accountants' desire to keep up with 'economic and social changes which affect accounting' and the research studies into 'postulates' and 'principles' proved to be controversial. These articles analyse the findings and provide vital historical insight into the profession of the time, and its further development.

The Writings of Willard J. Graham Houghton Mifflin School

The accountant is responsible for many activities, which may require years of training and experience to fully comprehend. The breadth of knowledge required can seem overwhelming. The Accountants' Guidebook is designed to simplify matters by providing the accountant with a practical knowledge of how to complete many accounting tasks, while also imparting an understanding of the more critical accounting standards. Topics covered include accounting procedures, GAAP for common transactions, closing the books, producing financial statements and other reports, collection tactics, payroll management, budgeting, and much more. In short, this is the essential desk reference for the accountant.
