The paper reports the results of a survey of the content and learning materials used in courses in financial statement analysis in Europe and the United States. Courses in Europe and undergraduate courses in the US exhibit similar characteristics with respect to course content (heavy emphasis on basic tools of analysis). Graduate courses in the US place heavier emphasis on coverage of generally accepted accounting principles and on applications of basic analytical tools. Differences in course content appear related to where the financial statement analysis course lodges within the accounting curriculum.

Financial Statement Analysis and the Prediction of Financial Distress discusses the evolution of three main streams within the financial distress prediction literature:

the set of dependent and explanatory variables used, the statistical methods of estimation, and the modeling of financial distress. Section 1 discusses concepts of financial distress. Section 2 discusses theories regarding the use of financial ratios as predictors of financial distress. Section 3 contains a brief review of the literature. Section 4 discusses the use of market price-based models of financial distress. Section 5 develops the statistical methods for empirical estimation of the probability of financial distress. Section 6 discusses the major empirical findings with respect to prediction of financial distress. Section 7 briefly summarizes some of the more relevant literature with respect to bond ratings. Section 8 presents some suggestions for future research and Section 9 presents concluding remarks. *Principles of Accounting Volume 1 - Financial Accounting* Cengage AU While focusing on the underlying theories of financial analysis and valuation, this work aims to answer the question, "What is this company really worth?". It takes the view that sound forecasts of financial statements are the key input to a good valuation, and that other aspects of the valuation process are mechanical.

Financial Statement Analysis and Business Valuation for the Practical Lawyer John Wiley & Sons

Financial Strategy for Public Managers is a new generation textbook for financial management in the public sector. It offers a thorough, applied, and concise introduction to the essential financial concepts and analytical tools that today's effective public servants need to know. It starts "at the beginning" and assumes no prior knowledge or experience in financial management. Throughout the text, Kioko and Marlowe emphasize how financial information can and should inform every aspect of public sector strategy, from routine procurement decisions to budget

preparation to program design to major new policy initiatives. They draw upon dozens of real-world examples, cases, and applied problems to bring that relationship between information and strategy to life. Unlike other public financial management texts, the authors also integrate foundational principles across the government, non-profit, and "hybrid/for-benefit" sectors. Coverage includes basic principles of accounting and financial reporting, preparing and analyzing financial statements, cost analysis, and the process and politics of budget preparation. The text also includes several large case studies appropriate for class discussion and/or graded assignments.
