[PDF] Gordon Conway Full Download-BOOK The methods of rapid rural appraisal (RRA) and agroecosystem analysis (AA) are presented. The theoretical framework for these methods is described using a number of basic organizing concepts. The philosophy, history and techniques of RRA are highlighted and the methods of agroecosystem analysis as well as those of topical, participatory and monitoring RRA are described. Rapid rural appraisal and agroecosystem analysis. Agroecosystem analysis is a thorough analysis of an agricultural environment which considers aspects from ecology, sociology, economics, and politics with equal weight. There are many aspects to consider; however, it is literally impossible to account for all of them. This is one of the issues when trying to conduct an analysis of an agricultural environment.  Sustainable agriculture: the trade-offs with productivity ...
 Agroecology (a-grō-ē-'kă-lə-jē) is an applied science that studies ecological processes applied to agricultural production systems. Bringing ecological principles to bear can suggest new management approaches in agroecosystems. The term is often used imprecisely, as the term can be used as a science, a movement, or an agricultural practice.
