Age Estimation of the Human Skeleton

Charles C Thomas Publisher

Paleodemography is the field of enquiry

that attempts to identify demographic parameters from past populations (usually skeletal samples) derived from archaeological contexts, and then to make interpretations regarding the health and well-being of those populations. However,

paleodemographic theory relies on several assumptions that cannot easily be validated by the researcher, and if incorrect, can lead to large errors or biases. In this book, physical anthropologists, mathematical demographers and statisticians tackle these methodological issues for reconstructing demographic structure for skeletal samples. Topics discussed include how skeletal morphology is linked to chronological age, assessment of age from the skeleton, demographic models of mortality and their interpretation, and biostatistical approaches to age structure estimation from archaeological samples. This work will be of immense importance to anyone interested in paleodemography, including biological and physical

anthropologists, demographers, geographers, evolutionary biologists and statisticians.

Fixing Sex Feiwei & Friends

This volume of essays is concerned with the discrimination against older people that results from a failure to recognise their diversity. By considering the unique combinations of discrimination that arise from the interrelationship of age and gender, pensions, ethnicity, sexual orientation, socio-economic class and disability, the contributors demonstrate that the discrimination suffered is multiple in nature. It is the combination of these characteristics that leads to the need for more complex ways of tackling age discrimination.

A Manifesto Against Ageism Celadon Books

"The Need for Theory speaks to the burgeoning need for critical thinking in social gerontology. The editors have brought together some of the foremost contributors to theoretical advances in the field. This volume incorporates state-of-the-art theorizing with a focus on selected topical areas facing gerontologists around the world. Using their keen insights into substantive issues, the contributors examine personal and structural changes affecting individuals over the life course. Extolling the need for theory is not enough; the contributors focus their insights on a panoply of substantive issues, linking the personal with the political and with the structural parameters that shape the process of aging, no matter where it occurs.

Sex, Gender and Society John Wiley & Sons

What happens when a baby is born with "ambiguous" genitalia or a combination of "male" and "female" body parts? Clinicians and parents in these situations are confronted with complicated questions such as whether a girl can have XY chromosomes, or whether some penises are "too small" for a male sex assignment. Since the 1950s, standard treatment has involved determining a sex for these infants and performing surgery to normalize the infant's genitalia. Over the past decade intersex advocates have mounted unprecedented challenges to treatment, offering alternative perspectives about the meaning and appropriate medical response to intersexuality and driving

the field of those who treat intersex conditions into a deep crisis. Katrina Karkazis offers a nuanced, compassionate picture of these charged issues in *Fixing Sex*, the first book to examine contemporary controversies over the medical management of intersexuality in the United States from the multiple perspectives of those most intimately involved. Drawing extensively on interviews with adults with intersex conditions, parents, and physicians, Karkazis moves beyond the heated rhetoric to reveal the complex reality of how intersexuality is understood, treated, and experienced today. As she unravels the historical, technological, social, and political forces that have culminated in debates surrounding intersexuality, Karkazis exposes the

contentious disagreements among theorists, physicians, intersex adults, activists, and parents—and all that those debates imply about gender and the changing landscape of intersex management. She argues that by viewing intersexuality exclusively through a narrow medical lens we avoid much more difficult questions. Do gender atypical bodies require treatment? Should physicians intervene to control the “sex” of the body? As this illuminating book reveals, debates over treatment for intersexuality force reassessment of the seemingly natural connections between gender, biology, and the body.

Studies in Creativity Routledge

The first official companion book to HISTORY® network’s hit series Ancient

Aliens®: a powerful journey through human history that explores fascinating unanswered questions about the origins of our civilizations. With a foreword by Series Creator, Kevin Burns. Millions of people around the world believe we have been visited in the past by extraterrestrial beings. What if it were true? And if so, what if there were clues left behind? Each week, hundreds of thousands of viewers tune in to the wildly popular Ancient Aliens® television series to seek insight into those very questions—and to become part of a thrilling, probing exploration of the mysteries at the heart of world civilizations. The first official companion book to the hit show, Ancient Aliens® takes readers even deeper into the mysteries that have made the show a

pop culture phenomenon. Filled with exciting insights and behind-the-scenes stories from the show's creators and leading experts in ancient alien theory, the book explores the key questions at the heart of the series: Who were they? Why did they come? What did they leave behind? Where did they go? Will they return? Transporting readers around the globe, Ancient Aliens® explores the fascinating enigmas and mysterious artifacts our ancestors left behind, from incredible objects to amazingly accurate ancient maps; from the Great Pyramid of Giza and stone megaliths at Gobekli Tepe to the Nazca Plains and mysterious structures of Puma Punku. Accompanied by lavish 4-color photography throughout, the book allows armchair archaeologists to examine the evidence

up close for the first time. Both the ultimate-fan book and the perfect gift for readers new to the show, *Ancient Aliens®* is a compelling journey through the mysteries of our ancient civilizations and the possibility of alien influence on our cultures.

Stereotyping and Prejudice Against Older Persons Cambridge University Press

This text emphasizes changing gender roles and relationships, gender identity and an examination of masculinities in midlife and later life. It covers the need to reconceptualize partnership status, in order to understand the implications of both widowhood and divorce for older women and men.

Analysis and Synthesis Rutgers University Press

Age Estimation of the Human Skeleton is

a needed up-to-date book providing anthropologists and anatomists with a broad spectrum of techniques focused on aging human skeletal remains. It represents the most current reference book devoted entirely to estimating age at death for skeletonized and decomposed human remains and is a convenient starting point for practical and research applications. This book is a valuable reference for all individuals interested in the identification or analysis of human remains including forensic anthropologists, bioarchaeologists, forensic odontologists, pathologists and anatomists at student and professional levels. *Age Estimation of the Human Skeleton* would serve as an ideal supplemental textbook for introductory

and advanced osteology and forensic anthropology courses. *Age Estimation of the Human Skeleton* is a collection of some of the latest research in age estimation techniques of human skeletal remains. It compiles recent scientific research on age at death estimation using dental and gross skeletal morphological indicators of age, as well as histological and multifactorial age estimation techniques. Age estimation methods from all life-stage categories, including: fetal, sub-adult, and adult are included in the book. *Age Estimation of the Human Skeleton* also includes chapters that evaluate and review the older, more traditional aging techniques as well as information that explores future directions and considerations for research in this area. Overall, *Age*

Estimation of the Human Skeleton bolsters the references available to researchers in academic, laboratory, and medicolegal facilities and is an attractive text to a sizable spectrum of analysts. *Successful Aging Postal Services Bill* Amendment to be Moved on Report The Bill provides for the Post Office to be converted from a statutory corporation to a public limited company, with ownership remaining with the Crown. It introduces a new system of licensing and regulation for postal services operators and providers, and gives the independent regulator, the new Postal Services Commission, new powers and duties to protect and promote the interests of users. The Post Office Users' National Council is replaced by the Consumer Council for Postal

Services, to bring postal services into line with consumer representation in the other utilities. Culinary Recipes Culinary recipes How to Make a Million in Nursing The First 5 Steps

“Wow. This book totally rocks. It arrived on a day when I was in deep confusion and sadness about my age. Everything about it, from my invisibility to my neck. Within four or five wise, passionate pages, I had found insight, illumination, and inspiration. I never use the word empower, but this book has empowered me.” —Anne Lamott, New York Times bestselling author

Author, activist, and TED speaker Ashton Applewhite has written a rousing manifesto calling for an end to discrimination and prejudice on the basis of age. In our youth obsessed culture, we’re bombarded by media

images and messages about the despairs and declines of our later years. Beauty and pharmaceutical companies work overtime to convince people to purchase products that will retain their youthful appearance and vitality. Wrinkles are embarrassing. Gray hair should be colored and bald heads covered with implants. Older minds and bodies are too frail to keep up with the pace of the modern working world and elders should just step aside for the new generation. Ashton Applewhite once held these beliefs too until she realized where this prejudice comes from and the damage it does. Lively, funny, and deeply researched, *This Chair Rocks* traces her journey from apprehensive boomer to pro-aging radical, and in the process debunks myth after myth about

late life. Explaining the roots of ageism in history and how it divides and debases, Applewhite examines how ageist stereotypes cripple the way our brains and bodies function, looks at ageism in the workplace and the bedroom, exposes the cost of the all-American myth of independence, critiques the portrayal of elders as burdens to society, describes what an all-age-friendly world would look like, and offers a rousing call to action. It's time to create a world of age equality by making discrimination on the basis of age as unacceptable as any other kind of bias. Whether you're older or hoping to get there, this book will shake you by the shoulders, cheer you up, make you mad, and change the way you see the rest of your life. Age pride!

The Official Companion Book Random House Large Print Publishing
The president of New York's Mount Sinai Hospital and a professor of public health present the findings of a MacArthur Foundation Study, showing healthy aging is dependent on diet, exercise, and self-esteem rather than on genes. (Health & Medicine).

Fighting the New Ageism in America Duke University Press
Contributors use a feminist perspective to explore the impact of ageing on gender roles in the workplace and in retirement; in marital and other relationships; in community support networks and in older women's own perceptions. A range of research approaches are used, including qualitative studies giving a voice to older

women. A concluding chapter draws out the implications of the book.

A Multidisciplinary Approach Cambridge University Press

What are the differences between the sexes? That is the question that Ann Oakley set out to answer in this pioneering study, now established as a classic in the field. To answer it she draws on the evidence of biology, anthropology, sociology and the study of animal behaviour to cut through popular myths and reach the underlying truth. She demonstrates conclusively that men and women are not two separate groups: rather each individual takes his or her place on a continuous scale. She shows how different societies define masculinity and femininity in different and even opposite ways, and discusses

how far observable differences are based on biology and psychology and how far on cultural conditioning. Many books have discussed these vital issues. None, however, have drawn on such an impressively wide range of evidence or discussed it with such clarity and authority. Now newly reissued with a substantial introduction which highlights its continuing relevance, this work will continue to inform and shape dialogues around sex and gender for a new generation of scholars and students.

How to Make a Million in Nursing MIT Press

In this book cultural critic the author reveals that much of what we dread about aging is actually the result of ageism-which we can battle as strongly as we do racism, sexism, and other forms of bigotry. Drawing on provocative and under-reported evidence from biomedicine, literature, economics, and personal stories, Gullette probes the ageism that drives discontent with our bodies, our selves, and our

accomplishments-and makes us easy prey for marketers who want to sell us an illusory vision of youthful perfection. Even worse, ageism causes society to discount the wisdom and experience acquired by people over the course of adulthood. The costs of this culture of decline are almost incalculable, diminishing our workforce, robbing younger people of hope for a decent later life, and eroding the satisfactions and sense of productivity that should animate our later years. Once we open our eyes to the pervasiveness of ageism we can begin to fight it.

Nemesis Routledge
Age Estimation: A Multidisciplinary Approach is the only reference in the field covering all techniques and methods involving age estimation from

different perspectives. This book provides comprehensive coverage of all aspects of age estimation, including aging the living and the dead, human rights, scientific rationale of the estimates, and skeletal, dental age and biochemical techniques and methods. Each chapter is written by internationally known expert contributors, making this book a one-of-a-kind resource for those involved in estimating the age of the living and the dead. Presents a concentration of all techniques and methods involving age estimation in a single volume Provides a multidisciplinary approach that lends itself to researchers, practitioners and students from a variety of different fields Includes contributions by world renowned forensic specialists

Taylor & Francis

Current findings on the origins and effects of ageism, as well as ways to reduce it.

The Need for Theory McGraw-Hill Education (UK)

The princess didn't expect to fall in love--with her nemesis. Princess Sepora of Serubel is the last Forger in all the five kingdoms. The spectorium she creates provides energy for all, but now her father has found a way to weaponize it, and his intentions to incite war force her to flee from his grasp. She escapes across enemy lines into the kingdom of Theoria, but her plans to hide are thwarted when she is captured and placed in the young king's servitude. Tarik has just taken over rulership of Theoria, and must now face a new

plague sweeping through his kingdom and killing his citizens. The last thing he needs is a troublesome servant vying for his attention. But mistress Sepora will not be ignored. When the two finally meet face-to-face, they form an unlikely bond that complicates life in ways neither of them could have imagined. Sepora's gift could save Tarik's kingdom from the Quiet Plague. But should she trust her growing feelings for her nemesis, or should she hide her gifts at all costs? A thrilling futuristic fantasy in which the fate of the world's energy source is in the hands of a prince and princess who are rivals, by the New York Times-bestselling author of the Syrena Legacy.

Ancient Aliens University of Chicago Press

This volume of original chapters is designed to bring attention to a neglected area of feminist scholarship - aging. After several decades of feminist studies we are now well informed of the complex ways that gender shapes the lives of women and men. Similarly, we know more about how gendered power relations interface with race and ethnicity, class and sexual orientation. Serious theorizing of old age and age relations to gender represents the next frontier of feminist scholarship. In this volume, leading national and international feminist scholars of aging take first steps in this direction, illuminating how age relations interact with other social inequalities, particularly gender. In doing so, the authors challenge and transform feminist

scholarship and many taken for granted concepts in gender studies.

Postal Services Bill Routledge

Presents an examination of demographic tools. Explains the analytical tools themselves, and also the relationships between general population dynamics and their natural, economic, social,

political, and cultural environments.

Covers subjects that range from the core building blocks of population change to the consequences of demographic changes in the biological and health fields, population theories and doctrines, observation systems, and the teaching of demography.
