Following WWII, the authoritarian and morally austere dictatorship of General Francisco Franco's Spain became the playground for millions of carefree tourists from Europe's prosperous democracies. This book chronicles how this helped to strengthen Franco's regime and economic and political standing.

Local aristocracies were crucial to the administrative and social assimilation of provincial communities in the Roman world. Leonard Curchin focuses on local political elites in the Iberian Peninsula, providing the first comprehensive and up-to-date prosopographical catalogue of all known local magistrates in Roman Spain. Curchin makes full use of the latest epigraphic discoveries, including not only the recorded careers of local magistrates but also the new Lex Irnitana. In his introduction he examines both the political role of the magistrates and the social mechanics of elite romanization. Among the traditional assumptions he challenges are the standard size of the local senates, the fixed order of offices, and the nature of the 'quattuorvirate.' He also discusses magistrates' origins, career progression, duties, social status, personal nomenclature, and private wealth. Entries in the catalogue are arranged alphabetically by city within each province. Indexes of names and

magistracies facilitate cross-referencing. The volume includes statistical tables as well as maps.

The automobile is an icon of modern technology because it includes most aspects of modern engineering, and it offers an exciting approach to engineering education. Of course there are many existing books on introductory fluid/aero dynamics but the majority of these are too long, focussed on aerospace and don't adequately cover the basics. Therefore, there is room and a need for a concise, introductory textbook in this area. Automotive Aerodynamics fulfils this need and is an introductory textbook intended as a first course in the complex field of aero/fluid mechanics for engineering students. It introduces basic concepts and fluid properties, and covers fluid dynamic equations. Examples of automotive aerodynamics are included and the principles of computational fluid dynamics are introduced. This text also includes topics such as aeroacoustics and heat transfer which are important to engineering students and are closely related to the main topic of aero/fluid mechanics. This textbook contains complex mathematics, which not only serve as the foundation for future studies but also provide a road map for the present text. As the chapters evolve, focus is placed on more applicable examples, which can be solved in class using elementary algebra. The approach taken is designed to make the mathematics more approachable and easier to understand. Key features: Concise textbook which provides an introduction to fluid mechanics and aerodynamics, with automotive applications Written by a leading author in the field who has experience working with motor sports teams in industry Explains basic concepts and equations before progressing to cover more advanced topics Covers internal and external flows for

automotive applications Covers emerging areas of aeroacoustics and heat transfer Automotive Aerodynamics is a must-have textbook for undergraduate and graduate students in automotive and mechanical engineering, and is also a concise reference for engineers in industry.

Innovation and Technology — Strategies and Policies Gale / Cengage Learning

Innovation and Technology - Strategies and Policies contains a selection of outstanding contributions by world experts on how a culture of innovation is able to produce a response to fast global changes affecting society. The book describes major evolutionary directions and foreseen trends in: environment versus industry; technology breakthroughs; energy planning; education and research; intangible investment requirements; new health technologies; and economics and management of innovative actions at strategic, organisational and technological levels. The actual percolation of the innovative process throughout the multiple facets of society is presented in relation to the main challenges facing us in the 21st Century. The book is addressed to all those concerned with innovation in dynamic terms as a creative response to the ongoing changes in society integrating sciences, technologies, humanities, life-long education and training, and other disciplines.

Nearly every country that produces cars views the automobile industry as strategically important because of its direct economic significance and because it serves as a bellwether for innovation in employment conditions. In this book, industrial relations experts from eleven countries consider the state of the industry worldwide. They are particularly interested in assessing whether

the loudly heralded model of lean production initiated by Toyota has become pervasive. The contributors focus on employment practices: the way work is organized, how workers and managers interact, the way worker representatives respond to lean production strategies, and the nature of the adaptation and innovation process itself.

The Cambridge Prehistory of the Bronze and Iron Age

Mediterranean offers new insights into the material and social practices of many different Mediterranean peoples during the Bronze and Iron Ages, presenting in particular those features that both connect and distinguish them. Contributors discuss in depth a range of topics that motivate and structure Mediterranean archaeology today, including insularity and connectivity; mobility, migration, and colonization; hybridization and cultural

encounters; materiality, memory, and identity; community and household; life and death; and ritual and ideology. The volume's broad coverage of different approaches and contemporary archaeological practices will help practitioners of Mediterranean archaeology to move the subject forward in new and dynamic ways. Together, the essays in this volume shed new light on the people, ideas, and materials that make up the world of Mediterranean archaeology today, beyond the borders that separate Europe, Africa, and the Middle East.
