others. Biotechnology of Marine Fungi | SpringerLink Two groups of multicellular fungi contain over 95% of all species. One of these two groups is called 'basidiomycetes' which includes the mushroom producing fungi. The study of fungi is known as mycology. Mycology is a very important field of biology because fungi are important for a number of ecological and economic reasons. Consequently, understanding these little organisms is very important to the well-

being of humans. Fungi | Basic Biology Get this from a library! Biology of marine fungi.
