Disruption in Financial Reporting Wiley Global Education

Financial Accounting and Reporting courses today need to recognize both the diversity of national traditions and the trend towards accounting harmonization. The profile of students in Financial Accounting courses in European and international business programs is changing. Student bodies are now real melting pots of cultures. English has become the lingua franca of business for most MBA and many undergraduate students. More and more business programs are taught in part or completely in International English. Students today need to be trained to appreciate, understand and analyze a variety of Accounting and Reporting problems from a theoretical and pragmatic point of view, rather than just memorize the local regulatory solution prescribed in one given country or context. *Corporate Financial Reporting: A Global Perspective* provides an introduction to financial accounting for today's international business student. It provides a user perspective. *Financial Accounting and Reporting* is a universal knowledge base required from all students intending to become economic actors. Whether they will use accounting and financial information as internal managers or executives, or as external users (investors, credit analysts, etc.) they will need to interpret accounting data. Rather than providing a regulatory solution to a reporting or measurement issue, *Corporate Financial Reporting* examines the economic logic of the problem and identifies generic possible solutions and shows the impact each might have on a company's or decision maker's decisions. Rather than adopting a 'national' approach to accounting issues, *Corporate Financial Reporting* offers an international perspective, guiding students through IAS, US GAAP and different local standards where they provide an interesting and relevant lesson. Financial Accounting: The Impact on Decision Makers Cengage Learning

The Global Financial Crisis has re-ordered how the EU intervenes in the EU financial market, both with respect to regulation and with respect to supervision. After 5 years of a behemoth reform agenda, the new landscape is now clear. Rule-making power has decisively moved to the EU and radical reforms have been made to the organization of supervision. EU Securities and Financial Markets Regulation provides the first comprehensive, critical, and contextual account of the vast new rule-book which now applies to the EU financial market in the aftermath of the seismic

reforms which have followed the financial crisis. Topics covered in-depth include the AIFMD, EMIR, the Short Selling Regulation, the new market abuse and transparency regimes, the rating agency regime, the UCITS IV-VI reforms, and MiFID II/MiFIR; the analysis is wide-reaching, extending to secondary legislation and relevant soft law. The book also examines the far-reaching institutional changes which have followed and considers in detail the role and impact of the European Securities and Markets Authority and the potential impact of the Single Supervisory Mechanism for euro area banks on the supervision of the EU financial market. EU Securities and Financial Markets Regulation is the third edition of the highly successful and authoritative monograph first published as EC Securities Regulation. Almost entirely recast and re-written from the 2008 second edition to reflect the changes wrought by the Global Financial Crisis, it adopts the in-depth contextual and analytical approach of earlier editions and so considers the market, political, international, institutional, and constitutional context of the new regulatory and supervisory regime, and the underlying forces which have (and will continue to) shape it.

Wiley IFRS 2008 Routledge

Since the global financial crisis of 2007–8, new laws and regulations have been introduced with the aim of improving the transparency in financial reporting. Despite the dramatically increased flow of information to shareholders and the public, this information flow has not always been meaningful or useful. Often it seems that it is not possible to see the wood for the trees. Financial scandals continue, as Wirecard, NMC Health, Patisserie Valerie, going back to Carillion (and many more) demonstrate. Financial and corporate reporting have never been so fraught with difficulties as companies fail to give guidance about the future in an increasingly uncertain world aided and abetted by the COVID-19 pandemic. This concise book argues that the changes have simply masked an increase in the use of corporate PR, impression management, bullet points, glossy images, and other simulacra which allow poor performance to be masked by misleading information presented in glib boilerplate texts, images, and tables. The tone of the narrative sections in annual reports is often misleading. Drawing on extensive research and interviews with insiders and experts, this book charts what has gone wrong with financial reporting and offers a range of solutions to improve information to both investors and the public. This provides a framework for a new era of forward-looking corporate reporting and guidance based on often conflicting multiple corporate goals. The book also examines and contrasts the latest thinking by the regulatory authorities. Providing a compelling exploration of the industry's failings and present difficulties, and the impact of future disruption, this timely, thought-provoking book will be of great interest to students, researchers, and professionals as well as policy makers in accounting, financial reporting, corporate reporting, financial statement analysis, and governance.
