Intergroup Processes Springer

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need to know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk>.

The SAGE Handbook of Intercultural Competence RTI Press

The shortage of nurses nationwide has contributed to the huge demand for nurses in the hospital setting, the home health industry, adult community care, nurse case management, utilization review and outpatient physician practices. Health care organizations are relying on nurse staffing agencies to fill their staffing needs. Industry experts report the dire need for nurses will continue to grow, as existing health care organizations expand to meet the health care demand of the aging population. Create a successful nurse staffing or nurse e registry business with this step by step start up handbook. The How to Start a Nurse Staffing or Nurse Registry Business is a comprehensive and easy to use business book. Written by industry experts with over 20 years of experience, this book is comprehensive and easy to use. The book contains current information on travel nursing, contract nurses, license verification, bill rate process, contracting process, marketing strategies, nurse staffing software reviews, much more.

A Handbook for Mental Health Professionals The Healthcare Quality HandbookA Professional Resource and Study Guide

See faster results through everyday feedback. The Feedback Imperative: How to Give Everyday Feedback to Speed Up Your Team's Success reveals the hidden reasons why giving feedback to employees can be so difficult and yet so urgently needed in today's workplace, and provides the definitive steps for overcoming feedback avoidance and taking great leaps forward with employee engagement, retention, and performance. Anna Carroll applies her extensive research and expertise in business consulting and psychology to illustrate how brain science, generational

trends, our information economy, limiting beliefs, and organizational culture collide in the new workplace, creating a huge gap between the supply and demand of helpful professional feedback. In her "Seven Steps to Everyday Feedback" and sixteen tools for self-assessment and planning, Carroll provides detailed instructions for leaders to execute a feedback turnaround that will quench their team members' thirst for helpful feedback and build a culture in which employee-to-leader and peer-to-peer feedback are welcome as well.

It is my hope that this text, when properly used will be of great benefit to the individual aide or aide in training in mastering the required skills that would make the individual a good home health aide. The book has been specially tailored as a teaching tool for home health aides. The book has two sections, the tutorial section one and the practical hands on section two. The second section is a good aide or good training tool for practical demonstration purposes. For the purpose of understanding only, a home health aide does not have to be a Certified Nurses Aide. As a result this book can be used to train and prepare an individual to function in the capacity of a home health aide. The agency must prepare a set of standardized tests for the aides to ensure that the individual have fully internalized the reaching and training that they have been put through. This book further addresses the rule and regulation (federal and State) that the home health aide must be familiar with. This book is an excellent tool for the home health aide. I strongly encourage all individual who practice and plans to practice as an aide in the home health field to read this book. **Three Little Pigs (Floor Book)** SAGE

The SAGE Handbook of Rhetorical Studies surveys the latest advances in rhetorical scholarship, synthesizing theories and practices across major areas of study in the field and pointing the way for future studies. Edited by Andrea A. Lunsford and Associate Editors Kirt H. Wilson and Rosa A. Eberly, the Handbook aims to introduce a new generation of students to rhetorical study and provide a deeply informed and ready resource for scholars currently working in the field.

Graduate Medical Education Directory National Academies Press

"This book aims to help healthcare management students and working professionals find ways to improve the delivery of healthcare, even with its complex web of patients, providers, reimbursement systems, physician relations, workforce challenges, and intensive government regulation. Taking an integrated approach, the book puts the tools and techniques of operations improvement in the context of healthcare so that readers learn how to increase the effectiveness

and efficiency of tomorrow's healthcare system." -- back of the book

Pay for Performance in Health Care Mometrix Media LLC

Slips, trips and falls are a chronic health problem in the US and around the world. Fall injuries are the number one cause of emergency room visits and the fourteenth leading cause of death in the US. The average person is 7 times more likely to die from a fall than from the flu and 3 times more likely to die from a fall than by a firearm. Since 1999, we have reduced deaths from heart disease 15%. Deaths caused by auto accidents are down 12%. But during that same time period deaths from falls have increased over 150%. Both injuries and deaths caused by falls are at record highs and the problem continues to grow. We've learned how to fix the human heart and we have made driving safer. Now is the time to focus on preventing fall injuries. The good news is that fall injuries are preventable. Everyone falls, but falls don't just happen, they're preceded by other events. When you eliminate those events, you reduce the risk of falling. Stop the Slip shows how you can avoid these injuries. Following the simple five step A-L-E-R-T System(TM) discussed in the book you will reduce your risk of falling. Thom Disch provides an entertaining and engaging look at: Why we fall; where we fall; the business side of falls; and most importantly how we can prevent and avoid fall injuries. The book is a comprehensive mix of research on the topic of falls and fall injuries mixed with real world stories and experiences about falls and their consequences. As you read this book you'll also discover many interesting and surprising facts. For example: -Fall injuries are not just a problem for the elderly. 75% of all fall injuries happen to people under the age of 68. -The annual economic impact of fall injuries in the US exceeds \$150 billion, or more than 1% of our gross domestic product. -Falls are the number one cause of traumatic brain injuries. -Winter weather appears to be a much smaller cause of fall deaths than you might expect. -Falls cause nearly 4 times more emergency room visits than auto accidents. This is a topic that affects everyone. Reading this book is the first step to making your family and friends safer.

Evidence-Based Nursing is a resource designed to teach nursing students how to engage in evidence-based practice (EBP). This text helps students acquire a basic knowledge of research methodology and it teaches them to critically appraise published research.

An Evidence-based Handbook for Nurses SAGE

The fresh and lively narrative and imaginative drawings ensure that children can follow as you read to them, or try for themselves. The large format is perfect for show-and-tell reading.

A Professional Resource and Study Guide Lippincott Williams & Wilkins

This book provides a balanced assessment of pay for performance (P4P), addressing both its promise and its shortcomings. P4P programs have become widespread in health care in just the past decade and have generated a great deal of enthusiasm in health policy circles and among legislators, despite limited evidence of their effectiveness. On a positive note, this movement has developed and tested many new types of health care payment systems and has stimulated much new thinking about how to improve quality of care and reduce the costs of health care. The current interest in P4P echoes earlier enthusiasms in health policy—such as those for capitation and managed care in the 1990s—that failed to live up to their early promise. The fate of P4P is not yet certain, but we can learn a number of lessons from experiences with P4P to date, and ways to improve the designs of P4P programs are becoming apparent. We anticipate that a “second generation” of P4P programs can now be developed that can have greater impact and be better integrated with other interventions to improve the quality of care and reduce costs.
