*Harmonized commodity description and coding system* United Nations The Globally Harmonized System of Classification and Labelling of Chemicals (GHS) addresses classification and labelling of chemicals by types of hazards. It provides the basis for worldwide harmonization of rules and regulations on chemicals and aims at enhancing the protection of human health and the environment during their handling, transport and

use by ensuring that the information about their physical, health and environmental hazards is available. The sixth revised edition includes, inter alia, a new hazard class for desensitized explosives and a new hazard category for pyrophoric gases; miscellaneous amendments intended to further clarify the criteria for some hazard classes (explosives, specific target organ toxicity following single exposure, aspiration hazard, and hazardous to the aquatic environment) and to complement the information to be included

in section 9 of the Safety Data Sheet; revised and further rationalized precautionary statements; and an example of labelling of a small packaging in Annex 7. **Interim Report on the Harmonized Commodity Description and Coding System** Harmonized commodity description and coding system Alphabetical Index to the Harmonized System and Its Explanatory Notes "To facilitate the location of references in the Harmonized System (HS) Nomenclature or in the Explanatory Notes to any of the products or articles
