This report represents the conclusions of a Joint FAO/WHO Expert Committee convened to evaluate the safety of various food additives, with a view to recommending acceptable daily intakes (ADIs) and to prepare specifications for the identity and purity of food additives. The first part of the report contains a general discussion of the principles governing the toxicological evaluation of food additives (including flavoring agents) and contaminants, assessments of intake, and the establishment and revision of specifications for food additives. A summary follows of the Committee's evaluations of toxicological and intake data on various specific food additives (A-amylase from *Bacillus licheniformis* containing a genetically engineered A-amylase gene from *B. Licheniformis*, annatto extracts, curcumin, diacetyl and fatty acid esters of glycerol, D-tagatose, laccase from *Myceliophthora thermophila* expressed in *Aspergillus oryzae*, mixed xylanase, B-glucanase enzyme preparation produced by a strain of *Humicola insolens*, neotame, polyvinyl alcohol, quillaia extracts and xylanase from *Thermomyces lanuginosus* expressed in *Fusarium venenatum*), flavouring agents, a nutritional source

of iron (ferrous glycinate, processed with citric acid), a disinfectant for drinking-water (sodium dichloroisocyanurate) and contaminants (cadmium and methylmercury). Annexed to the report are tables summarizing the Committee's recommendations for ADIs of the food additives, recommendations on the flavouring agents considered, and tolerable intakes of the contaminants considered, changes in the status of specifications and further information requested or desired.

Preventing Micronutrient Malnutrition Macmillan

The demand for natural gas rises annually, straining existing suppliers, and emerging markets often aren't accessible by pipeline. Here in everyday language and real-world examples is the clear presentation of LNG as the most viable energy answer. Using even the most conservative estimates, demand for LNG internationally will double by 2020, and billions of dollars will be needed for the infrastructure investment. This straightforward explanation of a complex industry proves that LNG can deliver a critical link in the energy demands of international economies. With a proven track record of safety and reliability, the LNG industry stands ready to bridge the international gap between supply and demand in energy transport. Readers will realize the complexity of this industry, which involves an intricate link of critical companies, governments and stand-alone facilities.

"One of the finest, most compelling accounts of what happened to corporate America and Wall Street in the 1980's." —New York

Times Book Review A #1 New York Times bestseller and arguably the best business narrative ever written, Barbarians at the Gate is the classic account of the fall of RJR Nabisco. An enduring masterpiece of investigative journalism by Bryan Burrough and John Helyar, it includes a new afterword by the authors that brings this remarkable story of greed and double-dealings up to date twenty years after the famed deal. The Los Angeles Times calls Barbarians at the Gate, "Superlative." The Chicago Tribune raves, "It's hard to imagine a better story...and it's hard to imagine a better account." And in an era of spectacular business crashes and federal bailouts, it still stands as a valuable cautionary tale that must be heeded.

Anthropometric Assessment of Nutritional Status Routledge

As the curtain rises Mr. Arcularis lies on the operating table in a surgical amphitheater, surrounded by doctors and nurses and watched by unseen medical students. Then Mr. Arcularis drifts into his ether dream, a strange, cold, ocean voyage which makes up the heart of the play. Finally in the growing chill and the gradual slowing of the ships engines the scene returns to the operating room and the death of Mr. Arcularis. --Harvard Crimson 3/01/1957.

An experimental investigation was conducted in a Mach 5 free-jet tunnel to assess the problem of establishing supersonic flow with a high blockage model and to devise a model tunnel test-section configuration which would allow flow establishment ("tunnel starting") at low pressure ratios. The model had a cross-sectional area equal to approximately 50 percent of the nozzle exit area. Two tunnel diffuser sizes with some combinations of model

shroud configurations, and Mach 4 annular injectors at the nozzle exit and the diffuser entrance were investigated. Starting pressure ratios on the order of 50 and ratios of chamber pressure to free-stream static pressure of 1.0 were obtained during these tests.

Chronic non-communicable diseases (NCDs) such as hypertension, stroke, diabetes and cancers, are major causes of disability and death in Ghana. NCDs are not only public health problems. They are also developmental problems, because the rising prevalence of long-term chronic conditions has major social and financial implications for affected individuals, families, healthcare providers and the government. This University of Ghana Readers volume from the Regional Institute for Population Studies presents social and medical science research on Ghana's NCD burden. The body of multidisciplinary research spans the last fifty years and offers important insights on NCD prevalence and experience as well as cultural, health systems and policy responses. This volume will be an essential resource for researchers and students in the health sciences, healthcare providers, health policymakers, and lay individuals with an interest in Ghana's contemporary public health challenges.

On the basis of a comprehensive literature review and analysis, *Nutrition During Lactation* points out specific directions for needed research in understanding the relationship between the nutrition of healthy mothers and the outcomes of lactation. Of widest interest are the committee's clear-cut recommendations for mothers and health care providers. The volume presents data on who among U.S. mothers is breastfeeding, a critical evaluation of methods for assessing the nutritional status of lactating women, and an analysis of how to relate the mother's nutrition to the volume and composition of the milk. Available data on the links between a mother's nutrition and the nutrition and growth of her infant and current information on the risk of transmission through breastfeeding of allergic diseases, environmental toxins, and certain viruses (including the HIV virus) are included. *Nutrition During Lactation* also studies the effects of maternal cigarette smoking, drug use, and alcohol consumption.

Designations of large Particularly Sensitive Sea Areas (PSSAs) triggered a controversial debate within the International Maritime Organisation (IMO) concerning the legal basis of PSSAs, the

relationship between the IMO's PSSA guidelines and UNCLOS, as well as the competency of IMO to adopt mandatory protective measures in these areas. As a result, IMO conducted a review process which led to substantially updated guidelines adopted in late 2005. This book provides a detailed analysis of the PSSA guidelines and protective measures available in PSSAs. Emphasis is placed on their legal basis and the implications for coastal states' jurisdiction over vessel-source pollution.

This single volume contains the Arabic edition, English translation and notes by Dr. Gibril Fouad Haddad of 'Abd Allah b. 'Umar b. Muhammad b. 'Ali al-Baydawi's first hizb of Anwar al-Tanzil wa-Asrar al-Ta'wil (The Lights of Revelation and the Secrets of Interpretation). As a revised and improved version of al-Zamakhshari's landmark Tafsiral-Kashshaf, Anwar al-Tanzil contains the most concise analysis of the Quranic use of Arabic grammar and style to date and was viewed early on as a foremost demonstration of the Qur'an's essential and structural inimitability (i'jaz ma'nawi wa-lughawi) in Sunni literature. Anwar al-Tanzil is important and significant, because of its fame and influence. In Dr. Haddad's own estimation, this work "became and

remained for seven centuries the most studied of all Tafsirs," and it is to be regarded as "the most important commentary on the Qur'an in the history of Islam."
