One of the most dynamic aspects of the Islamic revival during the past two centuries has been the rethinking of Islamic political thought. A broad range of actors, ideas, and ideologies characterize the debate on how Islamic ethics and law should be manifested in modern institutions. Yet this aspect of the "return to Islam" has been neglected by policymakers, the media, and even many scholars, who equate "political Islam" with merely one strand, labeled "Islamic fundamentalism." Bringing together ten essays from six volumes of the Ethikon Series in Comparative Ethics, this book gives a rounded treatment to the subject of Islamic political ethics. The authors explore the Islamic ethics of civil society, boundaries, pluralism, and war and peace. They consider questions of diversity, discussing, among other subjects, Islamic regimes' policies regarding women and religious minorities. The chapters on war and peace take up such crucial and timely issues as the Islamic ethics of jihad, examining both the legitimate conditions for the declaration of war and the proper conduct of war. In their discussions, the contributors analyze the works of classical writers as well as the full range of modern reinterpretations. But beyond these analyses of previous and contemporary thinkers, the essays also reach back to the two fundamental sources of Islamic ethics--the Qur'an and traditions of the Prophet--to develop fresh insights into how Islam and Muslims can contribute to human society in the twenty-first century. The authors are Dale F. Eickelman, Hasan Hanafi, Sohail H. Hashmi, Farhad Kazemi, John Kelsay, Muhammad Khalid Masud, Sulayman Nyang, Bassam Tibi, and M. Raquibuz Zaman. From the foreword by Jack Miles: "Western foreign ministers and secretaries of state may have to learn a little theology if the looming clash between embattled elements both in the West and in the Muslim umma is to yield to disengagement and peaceful coexistence, to say nothing of fruitful collaboration. . . . It is, then, no idle academic exercise that the thinkers whose work is collected here have in hand. The long-term practical importance of their work can scarcely be overstated."

The Islamic Moral Economy is an academic book that analyzes the religious permissibility or lack thereof of the existing repertoire of financial instruments used in Islamic banking and finance. The work is both timely and sound, especially considering the growth of the international Islamic banking and insurance industries, and the Great Recession of 2007-2010. The Islamic Moral Economy is an excellent introductory book for academics and finance professionals wishing to gain a better understanding of Islamic moral constraints on economic transactions and how most current Islamic banking transactions are structured. More specifically, the author examines the utopian nature of the Islamic moral economy with a special emphasis on riba (i.e., financial interest and illogical increase), which is inescapable in the global interconnected economy, and therefore insoluble within the

framework of the Islamic Moral Economy. Unlike other books on the subject, The Islamic Moral Economy places a special emphasis on the ubiquity of financial interest and illogical increase in both current Islamic banking and finance as well as conventional economics.

In this book, Omar Farahat presents a new way of understanding the work of classical Islamic theologians and legal theorists who maintained that divine revelation is necessary for the knowledge of the norms and values of human actions. Through a reconstruction of classical Ash'ari-Mu'tazili debates on the nature and implications of divine speech, Farahat argues that the Ash'ari attachment to revelation was not a purely traditionalist position. Rather, it was a rational philosophical commitment emerging from debates in epistemology and theology. He further argues that the particularity of this model makes its distinctive features helpful for contemporary scholars who defend a form of divine command theory. Farahat's volume thus constitutes a new reading of the issue of reason and revelation in Islam and breaks new ground in Islamic theology, law and ethics. *Cross-cultural Perspectives in Medical Ethics* Columbia University Press

"This book articulates a religious rationale for political secularism in the Iranian/shi'i context. The genealogy of Twelver shi'i political theology shows that the bitter experience and lack of success of the shi'ia in the field of governance in the early centuries of Islamic history led them to link the realisation of their ideal political system to transcendental factors. Belief in theocracy has always been the basis of shi'i political theology, but with the messianic conception of the 12th Imām in the fourth/tenth century, its realisation came to depend on the will and intervention of the divine. As a result, shi'i leaders, while awaiting the return of the 12th Imām, not only do not have the authority or responsibility to take over the institution of government, but have been forbidden from doing so. For more than 1300 years, the political thought and action of shi'i religious leaders was shaped by the political theology formulated in this book as Theocratic secularism. In opposition to orthodox shi'i theology, a new politico-religious discourse emerged at the initiative of Ayatollah Khomeini in the last decades of the twentieth century, which in this book is referred to as governmental-shi'ism. In sharp contrast to shi'i orthodoxy, governmental-shi'ism considers the occupation of the government apparatus as the duty of shi'i religious leaders. In this book, it is argued that governmental-shi'ism was neither the product of a theological transformation of shi'i orthodoxy nor used as a blueprint to establish the Islamic Republic. Rather, the formation of the Islamic Republic and the clergy's rise to power led to the birth of governmental-shi'ism and bestowed importance on Khomeini's doctrine of wilāyat-i faqih"--

This work provides a typology of Islamic ethics, without overlooking the chronological development. Four types of ethical theory are isolated: the scriptural, the theological, the philosophical and the religious. This edition contains extra material from Ibn Sina's writings, translated into English. The book should interest Islamic scholars, philosophers and historians of ethics.

The Impossible State Princeton Review

This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice – the maqa' sid – which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

In a multi-faith world, Islam is widely regarded as dogmatic and exclusivist. Yet in the Qur'an we have a great and worthy example of how to live in diversity, of powerful scriptural tenets that lend themselves precisely to engagement with those of other faiths. As such Islam has much to add to the debate on Religious Pluralism. For Muslims the issue is a delicate one. Aside from being tolerant and respectful of other faiths, advocating freedom of faith, and peaceful coexistence for all humanity, Muslims have to intellectually engage on matters of religious truth whilst defending the validity of their own Islamic tenets. This study is focused on the Qur'anic text. It explores the Qur'anic conception of normative religious pluralism with a view to providing answers to questions such as whether the Qur'an itself regards normative religious pluralism as a value system or simply a method through which the Qur'anic world view can be actualized. In doing so the author corrects some highly controversial misquoted, mistranslated, and/or quoted out of context verses of the Qur'an, including the so-called verse of the sword and the perception of not taking non-Muslims as friends. In reality, the Qur'an calls for freedom of faith and peaceful coexistence, but condemns oppression, religious persecution, and those who initiate hostilities. In this way it not only invokes human dignity, but restores it when it is violated.

This book presents 25 selected papers from the International Conference on "Developing Synergies between Islam & Science and Technology for Mankind's Benefit" held at the International Institute for Advanced Islamic Studies Malaysia, Kuala Lumpur, in October 2014. The papers cover a broad range of issues reflecting the main conference themes: Cosmology and the Universe, Philosophy of Science and the Emergence of Biological Systems, Principles and Applications of Tawhidic Science, Medical Applications of Tawhidic Science and Bioethics, and the History and Teaching of Science from an Islamic Perspective. Highlighting the relationships between the Islamic religious worldview and the physical sciences, the book challenges

secularist paradigms on the study of Science and Technology. Integrating metaphysical perspectives of Science, topics include Islamic approaches to S&T such as an Islamic epistemology of the philosophy of science, a new quantum theory, environmental care, avoiding wasteful consumption using Islamic teachings, and emotional-blasting psychological therapy. Eminent contributing scholars include Osman Bakar, Mohammad Hashim Kamali, Mehdi Golshani, Mohd. Kamal Hassan, Adi Setia and Malik Badri. The book is essential reading for a broad group of academics and practitioners, from Islamic scholars and social scientists to (physical) scientists and engineers.

Since Edward Said's foundational work, Orientalism has been singled out for critique as the quintessential example of Western intellectuals' collaboration with oppression. Controversies over the imbrications of knowledge and power and the complicity of Orientalism in the larger project of colonialism have been waged among generations of scholars. But has Orientalism come to stand in for all of the sins of European modernity, at the cost of neglecting the complicity of the rest of the academic disciplines? In this landmark theoretical investigation, Wael B. Hallaq reevaluates and deepens the critique of Orientalism in order to deploy it for rethinking the foundations of the modern project. Refusing to isolate or scapegoat Orientalism, Restating Orientalism extends the critique to other fields, from law, philosophy, and scientific inquiry to core ideas of academic thought such as sovereignty and the self. Hallaq traces their involvement in colonialism, mass annihilation, and systematic destruction of the natural world, interrogating and historicizing the set of causes that permitted modernity to wed knowledge to power. Restating Orientalism offers a bold rethinking of the theory of the author, the concept of sovereignty, and the place of the secular Western self in the modern project, reopening the problem of power and knowledge to an ethical critique and ultimately theorizing an exit from modernity's predicaments. A remarkably ambitious attempt to overturn the foundations of a wide range of academic disciplines while also drawing on the best they have to offer, Restating Orientalism exposes the depth of academia's lethal complicity in modern forms of capitalism, colonialism, and hegemonic power.

ASAP Human Geography: A Quick-Review Study Guide for the AP Exam Oxford University Press

Wael B. Hallaq boldly argues that the "Islamic state," judged by any standard definition of what the modern state represents, is both impossible and inherently self-contradictory. Comparing the legal, political, moral, and constitutional histories of premodern Islam and Euro-America, he finds the adoption and practice of the modern state to be highly problematic for modern Muslims. He also critiques more expansively modernity's moral predicament, which renders impossible any project resting solely on ethical foundations. The modern state not only suffers from serious legal, political, and constitutional issues, Hallaq argues, but also, by its very nature, fashions a subject inconsistent with what it means to be, or to live as, a Muslim. By Islamic standards, the state's technologies of the self are severely lacking in moral substance, and today's Islamic state, as Hallaq shows, has done little to advance an acceptable form of genuine Shari'a governance. The Islamists' constitutional battles in Egypt and Pakistan, the Islamic legal and political failures of the Iranian Revolution, and similar disappointments underscore this fact. Nevertheless, the state remains the favored template of the Islamists and the ulama (Muslim clergymen). Providing Muslims with a path toward realizing the good life, Hallaq turns to the rich moral resources of Islamic history. Along the way, he proves political and other "crises of Islam" are not unique to the Islamic world nor to the Muslim religion. These crises are integral to the modern condition of both East and West, and by acknowledging these parallels, Muslims can engage more productively with their Western counterparts.
