Educational Reform in Post-Soviet Russia
MHRA

"This study of the political manipulation of the media in Serbia, Croatia, Bosnia, and Hercegovina before and during the war argues that political struggles for media control are early warnings of war and a form of preparation for it. When a government severely restricts or prohibits opposition voices, this book asserts, the manipulation of public opinion by government-controlled media is itself a means of denying the free exchange of information and ideas."

Radioactive Tracer Techniques Peter Lang GmbH, Internationaler Verlag Der Wissenschaften

The Cambridge University Press published (1945-1967) in six volumes Professor Bailey's transcriptions of Saka manuscripts found in Sin Kiang and Kansu (of the ancient kingdom of

Khotan). They are central to any study of Old Iranian and the Iranian dialects; and they are also important for further understanding of the religious tradition in the sacred Avesta of the Zoroastrians, and for the history of the peoples of Central Asia generally. This 1979 dictionary represents the fulfilment of a plan formed in 1934 which required first the editing and transcription of the manuscripts, and then the slow elucidation of the whole corpus of texts. It contains a linguistic analysis and translation of all the Iranian words used in the texts. It is the necessary key to the understanding of the texts, to the mastery of the language itself, and to the linking of Khotan Saka into the Indo-European linguistic tradition.

The Emperor Romanus Lecapenus and His Reign Cambridge University Press

The purpose of this volume is to explore the medieval inheritance of modern international relations. Recent years have seen a flourishing of work on the history of international political thought, but the bulk of this has focused on the

early modern and modern periods, leaving continuities with the medieval world largely ignored. The medieval is often used as a synonym for the barbaric and obsolete, yet this picture does not match that found in relevant work in the history of political thought. The book thus offers a chance to correct this misconception of the evolution of Western international thought, highlighting that the history of international thought should be regarded as an important dimension of thinking about the international and one that should not be consigned to history departments. Questions addressed include: what is the medieval influence on modern conception of rights, law, and community? how have medieval ideas shaped modern conceptions of self-determination, consent, and legitimacy? are there 'medieval' answers to 'modern' questions? is the modern world still working its way through the Middle Ages? to what extent is the 'modern outlook' genuinely secular? is there a 'theology' of international relations? what are the implications of continuity for predominant historical narrative of the emergence and expansion of international society? Medieval and modern are certainly different; however, this collection of essays proceeds from the conviction that the modern world was not built on a new plot with new building materials. Instead, it was constructed out of the rubble, that is, the raw materials, of the Middle Ages. This will be of great interest to students and scholars of IR, IR theory and political theory. .

A History of Byzantium BRILL

A collection of reports on the situation of urban archaeology in 22 European countries. All the reports of the situation in the separate countries give amongst

others attention to definitions of urban archaeology, to previous research, databases, maps and evaluation techniques in the field, to the legal framework, financial support and numbers, status and qualifications of those who work in urban archaeology, to the balance between preservation and use, the contribution of urban archaeology to education and the understanding of the historic environment. The book is the result of decisions made during the 3th International Conference of Ministers responsible for the cultural heritage, held in Malta in 1992, where the revised European Convention on the protection of the Archaeological Heritage was signed. To promote the implementation of this convention the ministers recommend a number of actions which together might form a 'European Archaeology'. This handbook was one of those actions.

Morphology is the study of how words are put together. A lively introduction to the subject, this textbook is intended for undergraduates with relatively little background in linguistics. Providing data from a wide variety of languages, it includes hands-on activities such as 'challenge' boxes, designed to encourage students to gather their own data and analyze it, work with data on websites, perform simple experiments, and discuss topics with each other.

There is also an extensive introduction to the terms and concepts necessary for analyzing words. Unlike other textbooks it anticipates the question 'is it a real word?' and tackles it head on by looking at the distinction between dictionaries and the mental lexicon. This second edition has been thoroughly updated, including new examples and exercises as well as a detailed introduction to using linguistic corpora to find and analyze morphological data.

The Rise of the Fatimids Gregorian Biblical BookShop

A reissue of Sir Steven Runciman's classic account of the Dualist heretic tradition in Christianity from its Gnostic origins, through Armenia, Byzantium, and the Balkans to its final flowering in Italy and Southern France. The chief danger that early Christianity had to face came from the heretical Dualist sect founded in the mid-third century AD by the prophet Mani. Within a century of his

death Manichaeism churches were established from western Mediterranean lands to eastern Turkestan. Though Manichaeism failed in the end to supplant orthodox Christianity, the Church had been badly frightened; and henceforth it gave the hated epithet of 'Manichaeism' to the churches of Dualist doctrines that survived into the late Middle Ages.

This volume consists of a collection of essays devoted to study of the most recent educational reform in Russia. In his first decree Boris Yeltsin proclaimed education a top priority of state policy. Yet the economic decline which accompanied the collapse of the Soviet Union dealt a crippling blow to reformist aspirations, and to the existing school system itself. The public lost faith in school reform and by the mid-1990s a reaction had set in. Nevertheless, large-scale changes have been effected in finance, structure, governance and curricula. At the same time, there has been a renewed and widespread appreciation for the positive aspects of the Soviet legacy in schooling. The essays presented here compare current educational reform to reforms of the past, analyze it in a broader cultural, political and social context, and study the shifts that have occurred at the different levels of schooling 'from political decision-making and changes in school administration to the rewriting textbooks and teachers' everyday problems. The authors are both Russian educators, who have played a leading role in implementation of the reform, and Western scholars, who have been

studying it from its very early stages. Together, they formulate an intricate but cohesive picture, which is in keeping with the complex nature of the reform itself.
