The Challenge of Religion Oxford University Press

The twentieth century has witnessed an unprecedented 'crisis in the foundations of mathematics', featuring a world-famous paradox (Russell's Paradox), a challenge to 'classical' mathematics from a world-famous mathematician (the 'mathematical intuitionism' of Brouwer), a new foundational school (Hilbert's Formalism), and the profound incompleteness results of Kurt Gödel. In the same period, the cross-fertilization of mathematics and philosophy resulted in a new sort of 'mathematical philosophy', associated most notably (but in different ways) with Bertrand Russell, W. V. Quine, and Gödel himself, and which remains at the focus of Anglo-Saxon philosophical discussion. The present collection brings together in a convenient form the seminal articles in the philosophy of mathematics by these and other major thinkers. It is a substantially revised version of the edition first published in 1964 and includes a revised bibliography. The volume will be welcomed as a major work of reference at this level in the field.

Contains The Discourses/Fragments/Enchiridion 'I must die. But must I die bawling?' Epictetus, a Greek Stoic and freed slave, ran a thriving philosophy school in Nicopolis in the early second century AD. His animated discussions were celebrated for their rhetorical wizardry and were written down by Arrian, his most famous pupil. The Discourses argue that happiness lies in learning to perceive exactly what is in our power to change and what is not, and in embracing our fate to live in harmony with god and nature. In this personal, practical guide to the ethics of Stoicism and moral self-improvement, Epictetus tackles questions of freedom and imprisonment, illness and fear, family, friendship and love. Translated and Edited with an Introduction by Robert Dobbin

What is the status of belief in God? Must a rational case be made or can such belief be properly basic? Is it possible to reconcile the concept of a good God with evil and suffering? In light of great differences among religions, can only one religion be true? The most comprehensive work of its kind, Reason and Religious Belief, now in its fourth edition, explores these and other perennial questions in the philosophy of religion. Drawing from the best in both classical and contemporary discussions, the authors examine religious experience, faith and reason, the divine attributes, arguments for and against the existence of God, divine action (in various forms of theism), Reformed epistemology, religious language, religious diversity, religion and science, and much more. Retaining the engaging style and thorough coverage of previous editions, the fourth edition adds a critical new chapter on the ontological status of religion and the nature of religious claims. It also features revised treatments of omnipotence, miracles, and providence and updated suggestions for further reading. Recent years have seen growing popular absorption with "spirituality" in all its forms. But as this study shows, it is largely separated from theology. Spirituality has grown more self-referential and is subverted by consumerist mentality, while theology has grown critically proficient but uneasy in speaking from or to the heart of Christian mysteries. Through a study of exemplary writers such as Gregory of Nyssa, McIntosh recovers an understanding of the inner integrity of mystical consciousness and theological expression. The final chapters test the possibility of renewed conversation between spirituality and theology by drawing on spiritual traditions to re-think contemporary problems in Trinitarian thought, Christology, and the understanding of the self. This book offers not only an analysis of spirituality and theology in the eras of their united activity, but also a hermeneutic for the theological appropriation of spirituality and a sustained argument for the renewal of mystical theology.

Li Zhi's iconoclastic interpretations of history, religion, literature, and social relations have fascinated Chinese intellectuals for centuries. His approach synthesized Confucian, Buddhist, and Daoist ethics and incorporated the Neo-Confucian idealism of such thinkers as Wang Yangming (1472-1529). The result was a series of heretical writings that caught fire among Li Zhi's contemporaries, despite an imperial ban on their publication, and intrigued Chinese audiences long after his death. Translated for the first time into English, Li Zhi's bold challenge to established doctrines will captivate anyone curious about the origins of such subtly transgressive works as the sixteenth-century play The Peony Pavilion or the eighteenth-century novel Dream of the Red Chamber. In A Book to Burn and a Book to Keep (Hidden), Li Zhi confronts accepted ideas about gender, questions the true identity of history's heroes and villains, and offers his own readings of Confucius, Laozi, and the Buddha. Fond of vivid sentiment and sharp expression, Li Zhi made no distinction between high and low literary genres in his literary analysis. He refused to support sanctioned ideas about morality and wrote stinging social critiques. Li Zhi praised scholars who risked everything to expose extortion and misrule. In this sophisticated translation, English-speaking readers encounter the best of this heterodox intellectual's vital contribution to Chinese thought and culture.

Philosophy of Religion McGraw-Hill Humanities, Social Sciences & World Languages

Of all the issues in the philosophy of religion, the problem of reconciling belief in God with evil in the world arguably commands more attention than any other. For over two decades, Michael L. Peterson's The Problem of Evil: Selected Readings has been the most widely recognized and used anthology on the subject. Peterson's expanded and updated second edition retains the key features of the original and presents the main positions and strategies in the latest philosophical literature on the subject. It will remain the most complete introduction to the subject as well as a resource

for advanced study. Peterson organizes his selection of classical and contemporary sources into four parts: important statements addressing the problem of evil from great literature and classical philosophy; debates based on the logical, evidential, and existential versions of the problem; major attempts to square God's justice with the presence of evil, such as Augustinian, Irenaean, process, openness, and *felix culpa* theodicies; and debates on the problem of evil covering such concepts as a best possible world, natural evil and natural laws, gratuitous evil, the skeptical theist defense, and the bearing of biological evolution on the problem. The second edition includes classical excerpts from the book of Job, Voltaire, Dostoevsky, Augustine, Aquinas, Leibniz, and Hume, and twenty-five essays that have shaped the contemporary discussion, by J. L. Mackie, Alvin Plantinga, William Rowe, Marilyn Adams, John Hick, William Hasker, Paul Draper, Michael Bergmann, Eleonore Stump, Peter van Inwagen, and numerous others. Whether a professional philosopher, student, or interested layperson, the reader will be able to work through a number of issues related to how evil in the world affects belief in God.
