Complex Analysis and Applications,
Second Edition explains complex

analysis for students of applied mathematics and engineering. Restructured and completely revised, this textbook first develops the theory of complex analysis, and then examines its geometrical interpretation and application to Dirichlet and Neumann boundary value problems. A discussion of complex analysis now forms the first three chapters of the book, with a description of conformal mapping and its application to boundary value problems for the two-dimensional Laplace equation forming the final two chapters. This new structure enables students to study theory and applications separately, as needed. In order to maintain brevity and clarity, the text limits the application of complex analysis to two-dimensional boundary value

problems related to temperature distribution, fluid flow, and electrostatics. In each case, in order to show the relevance of complex analysis, each application is preceded by mathematical background that demonstrates how a real valued potential function and its related complex potential can be derived from the mathematics that describes the physical situation.

First he'll learn her most intimate secrets. Then he'll arouse her deepest passions. He's the lover she's been waiting for: the man who can rescue her from her wicked past—for a price—in Madeline Hunter's tale of sin, seduction,

and irresistible, impossible love. He catches her eye across the dining room—a handsome stranger who stands out among the lewd noblemen and bawdy painted women. But their worlds are about to collide in a way Roselyn Longworth could never have imagined. For before the night is out, she will be auctioned off to the highest bidder...and Kyle Bradwell will lead her from one kind of hell to another. Yet from the moment he wins her, Kyle treats Rose with a gentleness she hasn't known since a family scandal destroyed her reputation. And when she finally learns what is really driving Kyle, it's too late. For Rose has fallen for the man who knows her most intimate secrets. Now he has stunned her with a proposal of marriage—the first step in a seduction

that will demand nothing less than her complete surrender....

The Genus Cymbidium Akashic Books Palm Springs now joins Los Angeles, San

Diego, Orange County, San Francisco, Oakland, and Berkeley in California's Noir Series arena. "An appealing anthology of 14 stories about life and crime in the Mojave Desert's playground to the stars." --MysteryScene Magazine "As editor DeMarco-Barrett points out, it's hard to think 'noir' in a landscape that offers 300 days of sunshine a year. But unrelenting heat and light can do funny things to your brain...An engaging mix of the good, the bad, and the off-kilter." --Kirkus Reviews Included in Publishers Weekly's Adult 2021 Announcements (Mysteries & Thrillers) Akashic Books continues its award-winning series of original noir anthologies, launched in 2004 with Brooklyn Noir. Each book comprises all new stories, each one set in a distinct

location within the geographic area of the book. Palm Springs Noir features brand-new stories by: T. Jefferson Parker, Janet Fitch, Eric Beetner, Kelly Shire, Tod Goldberg, Michael Craft, Barbara DeMarco-Barrett, Rob Roberge, J.D. Horn, Eduardo Santiago, Rob Bowman, Chris J. Bahnsen, Ken Layne, and Alex Espinoza. From the introduction: The best noir writers make us feel the heat of the sun, the touch of a lover. Setting can be gritty but can also be sublime, no longer relegated to urban locales and seedy hotel rooms but also mansions and swimming pools. Hence, Palm Springs, which may seem like an odd setting for a collection of dark short stories--it's so sunny and bright here. The quality of light is unlike anywhere else, and with an average of three

hundred sunny days a year, what could go wrong?... The stories in this collection come on like the wicked dust storms common to the area. More than half are by writers who live here full-time; all have homes in Southern California. They know this place in ways visitors and outsiders never will. These are not stories you'll read in the glossy coffee-table books that feature Palm Springs's good life. There is indeed a lush life to be found here, but for the characters in these stories, it's often just out of reach.

The US decision to drop an atomic bomb on the Japanese city of Hiroshima on 6 August 1945 remains one of the most controversial events of the twentieth century. However, the controversy over the rights and wrongs of dropping the

bomb has tended to obscure a number of fundamental and sobering truths about the development of this fearsome weapon. The principle of killing thousands of enemy civilians from the air was already well established by 1945 and had been practised on numerous occasions by both sides during the Second World War. Moreover, the bomb dropped on Hiroshima was conceived and built by an international community of scientists, not just by the Americans. Other nations (including Japan and Germany) were also developing atomic bombs in the first half of the 1940s,

albeit haphazardly. Indeed, it is difficult to imagine any combatant nation foregoing the use of the bomb during the war had it been able to obtain one. The international team of scientists organized by the Americans just got there first. As this fascinating new history shows, the bomb dropped by a US pilot that hot August morning in 1945 was in many ways the world's offspring, in both a technological and a moral sense. And it was the world that would have to face its consequences, strategically, diplomatically, and culturally, in the years ahead.
