The *Essential Guide to Critical Development Studies* provides an up-to-date and authoritative introduction to the field, challenging mainstream development discourse and the assumptions that underlie it. Critical development studies lays bare the economic, political, social, and environmental crises that characterise the current global capitalist system, proposing instead systemic change and different pathways for moving beyond capitalism into a new world of genuine progress where economic and social justice and ecological integrity prevail. In this book, the authors challenge market-driven, neoliberal development agendas, incorporating analyses of class, gender, race, and the dynamics of uneven capitalist development. This thoroughly revised and expanded second edition includes: • 18 new chapters, including on topics such as philanthrocapitalism, race, the energy transition, Indigenous resistance and resilience, and global health • Expanded global coverage, including new chapters on South Africa, North Africa, and the Gulf Arab states • A new section on resistance and alternatives • Additional pedagogical features, including a glossary of key terms, discussion questions, and expanded guides for further reading. This textbook will be essential reading for students of global development, political science, sociology, economics, gender studies, geography, history, anthropology, agrarian studies,

Corporate Social Responsibility (CSR) has become an important concept in the last few decades. Although it originated in the developed countries of the West, the concept has been embraced and adapted by corporations and policy-making agencies in many developing countries. Not surprisingly, given the importance of growth and development as policy objectives in these countries, CSR has had a significant impact on sustainable development. Sustainable Development and Corporate Social Responsibility explores the evolution of CSR across the developed and developing world, with a particular focus on China and sustainable development. Through an extensive review of the literature and relevant case studies, the book examines whether CSR can make a contribution to sustainable development, how the patterns of CSR in developed Western economies compare to that in the rapidly growing economy of China, what trade-offs take place between CSR and economic growth as well as the future of CSR and its possible impact on the global sustainable development agenda. This book is a valuable resource for academics and upper-level undergraduate and postgraduate students in the fields of human/social geography, economics, business studies, sustainable development, development studies and environmental studies.

*The Political Economy of Agro-Food Markets in China* China Books

If you look carefully at how things are actually made in China - from shirts to toys, apple juice to oil rigs - you see a reality that contradicts every widely-held notion about the world's so-called

economic powerhouse. From the inside looking out, China is not a manufacturing juggernaut. It's a Lilliputian. Nor is it a killer of American jobs. It's a huge job creator. Rising China is importing goods from America in such volume that millions of U.S. jobs are sustained through Chinese trade and investment. In *Unmade in China*, entrepreneur and Georgetown University business professor Jeremy Haft lifts the lid on the hidden world of China's intricate supply chains. Informed by years of experience building new companies in China, Haft's unique, insider's view reveals a startling picture of an economy which struggles to make baby formula safely, much less a nuclear power plant. Using firm-level data and recent case studies, *Unmade in China* tells the story of systemic risk in Chinese manufacturing and why this is both really bad and really good news for America.

Most consumer products come primarily from the Pearl River Delta, the "factory of the world" with the largest industrial region on earth. The delta has attracted millions of poor rural residents to settle in factory towns in hopes for a better life. *Factory Towns of South China* opens a window on these walled compounds, exposing the gritty establishments, crowded dormitories and monotonous labor carried out by workers. Some function as self-contained cities, with their own fire brigade, hospital, bank, TV station and as many as half a million workers living within the compounds. Other factories are scattered in larger villages to mask their existence and evade governmental crackdowns on the production of fake consumer goods and illegal casino machines. Contributors include David Bray, Minnie Chan, Jia-Ching Chen, Paul Chu Hoi Shan, Eli Friedman, Claudia Juhre, Laurence Liauw, Paul Lin, Ting Shi, Casey Wang, Rex Wong, and Chun Yang. Stefan Al is director of the Urban Design Program at the University of Hong Kong.

The respective chapters present research by top-tier communication scholars from prominent Chinese universities and offer revealing findings on the interplay between media / social media, economics and politics. To that end, both qualitative and quantitative methods based on classical theories of communication and economics are drawn upon. The book explores four main areas: the challenges and opportunities for Chinese journalism and communications, changes in Chinese economic development, influences and forecasts for Chinese politics, and the impacts on Chinese culture. As the chapter contributors hail from diverse regions within China and represent three generations of communication scholars, the book offers a comprehensive guide, helping readers understand the impact of social media on China's development from a broad range of perspectives, and sharing insights on its impacts around the world.
