Challenging Puzzles-Earth Science S.
Chand Publishing

**This is the chapter slice

"Constellations" from the full lesson plan
"Solar System" ** Thrill young

astronomers with a journey through our Solar System. Find out all about the Inner and Outer Planets, the Moon, Stars, Constellations, Asteroids, Meteors and Comets. Using simplified language and vocabulary, concepts such as planetary orbits, the asteroid belt, the lunar cycle and phases of the moon, and shooting stars are all explored. Chocked full of reading passages, comprehension questions, and hands-on activities, our resource is written for remedial students in grades five to eight. Science concepts are presented in a way that makes them accessible to students and easier to understand. Use our resource effectively for whole-class, small group and independent work. Color mini posters, Rubric, Crossword, Word Search, Comprehension Quiz and Answer Key are all included. All of our content meets the

Common Core State Standards and are written to Bloom's Taxonomy and STEM initiatives.

Earth Science Resources in the Electronic Age

On The Mark Press Readers will want to grab a telescope and explore the night skies after finishing this overview of our solar system. Our solar system consists of eight planets, as well as numerous moons, comets, asteroids, and meteoroids. For thousands of years, humans believed that Earth was at the center of the Universe, but all of that changed in the 17th century.

Astronomers like Nicolaus Copernicus, Galileo Galilei, Johannes Kepler, and Isaac Newton proposed the unthinkable theory that Earth and the other planets actually revolved around the Sun. This engaging book chronicles the beginning of the modern age of astronomy, then follows later discoveries, including NASA's current missions in space.

The Web is notoriously unreliable, yet it is the first place many students look for information. How can students, teachers, parents, and librarians be certain that the information a Web site provides is accurate and age appropriate? In this unique book, experienced science educator Judith A. Bazler reviews hundreds of the most reliable earth science-related Web sites. Each review discusses the most appropriate grade level of the site, analyzes its accuracy and usefulness, and provides helpful hints for getting the most out of the resource. Sites are organized by topic, from Air Movements to Wetlands, making it easy to locate the most useful sites. A handy summary presents the best places on the Web to find information on science museums, science centers, careers in the earth sciences, and supplies.

Our Universe Gr. 5-8 (US Version)

Penguin

Does your child love word puzzles and testing their vocabulary? Do they enjoy crosswords and working out clues? This book provides endless fun with these interesting conundrums! Where Is Our Solar System? Carson-Dellosa Publishing

Thrill young astronomers with a journey through our Solar System. Our resource presents science concepts in a way that makes them accessible to students and easier to understand. Introduce students to the solar system. Explain how it is made up of planets, moons and asteroids. Then, travel to each of the inner and outer planets. Build a scale model of the solar system, and plan your trip to one of its planets. Your next stop, the moon. Learn the different phases of the moon and figure out what a Blue Moon is. Take a look at the stars and compare yellow dwarfs with blue giants. Create a presentation detailing the story behind your favorite constellation.

Finally, compare asteroids, meteors and comets as they travel through our solar system. Aligned to the Next Generation State Standards and written to Bloom's Taxonomy and STEAM initiatives, additional hands-on experiments, crossword, word search, comprehension quiz and answer key are also included.
