Originally published in 1952, this seminal work is reproduced here with a new introduction by Professor Mark Perlman, a well-known Schumpeterian scholar. The essays, written between 1910-50 were primarily commemorative pieces marking the achievement of a celebrated economist. Those covered include: * Marx * Walras * Menger * Marshall * Pareto * Bohm-Bawerk * Taussig * Fisher * Mitchell * Keynes The appendix includes articles on lesser-known economists Knapp, Von Wieser; Von Bortkiewicz. With the exception of Marx, Schumpeter himself selected the ten main essays for inclusion in this volume and was personally acquainted with all but two of his subjects. Initially considering them unworthy for publication he relented in the face of public demand since the journals in which they originally appeared were difficult to obtain. The new introduction places this work in its contemporary context and highlights its importance for students unfamiliar with the original.

The International Study of Written Composition II explores many aspects of the writing conventions used by national and regional communities and the community of school writing and teachers as it intersects with the other communities that students inhabit. The study begins from the premise that the school subject writing is unique in that it represents a culturally-determined system in which a common set of practices are used by teachers, students and society. Individual chapters take up the nature of the beliefs and conventions of the school writing community as they are expressed in general curricular statements, in the beliefs and practices of teachers, the perceptions of students, the resultant performance of students, and the scoring practices of the IEA raters.

Leadership in universities is physically, intellectually and emotionally demanding work. It involves multiple and complex tasks and responsibilities such as staff management, strategic management, operational planning, financial and resources management, policy development, quality assurance processes, improving student outcomes, and engaging with community and the professions/industry. Leadership is not simply the act of being a leader, it is the act of leadership that projects 'success' and 'desirable' attributes. Leadership has the capacity to be deeply seductive yet it is not an immediately attractive option for women, particularly for those who carry the burden of family and domestic responsibilities, for whom finding a space for leading is no easy task. Yet despite the almost pessimistic research evidence, women are in senior leadership positions in higher education, however precarious their numbers. There can be little doubt that universities benefit from diversity in their student and staff population This book addresses the central questions; Who are the women who survive and occupy elite leadership roles in universities? How might their leadership be shaped by and a consequence of institutional climate? What strategies do they learn and adopt and how do they lead and manage their female colleagues? What about those women who do not 'fit' the gender script? The chapters overview the changing policy landscape in higher education; provide a critical commentary on the interplay between gender, leadership, higher education, and organisational diversity, and draw on education and critical management literatures in order to offer a broader understanding of gender and elite leadership; This book will be essential reading for anyone involved or interested in higher education policy and management, academic leadership, organisational diversity and gender studies.
