Teaching isn't merely transmitting knowledge to students; it's also about teaching students to approach learning in engaging and unexpected ways. In *Sparking Student Creativity: Practical Ways to Promote Innovative Thinking and Problem Solving*, author and researcher Patti Drapeau explores and explains research related to creativity and its relevance in today's standards-based, critical thinking-focused classroom. The book vividly and comprehensively shows \* How creative lessons can meet and extend the expectations of curriculum standards such as the Common Core State

Standards, \* How to incorporate creativity and assessment into daily classroom practices, \* How to develop a "Creativity Road Map" to guide instruction, and \* How to design lessons that prompt and support creative thinking. In addition, the book includes 40 "grab and go" ideas that infuse lesson plans with a spirit of exploration. No matter what grade levels or content areas you teach, *Sparking Student Creativity* will help you to produce creative lesson components that directly address critical content, target specific standards, and require thoughtful products from students as they grow into independent learners and become successful students and adults.

Timurid Art and Culture BRILL

Abu Bakr Muhammad ibn al-Narshakhi of Bukhara wrote the history of his city and presented it to the Samanid ruler Nuh ibn Nasr in 943 C.E. (A.H. 332). This is the only book he is known to have written. Narshakhi's History of Bukhara is unusual among histories of Middle Eastern cities because it provides a broad and perceptive overview of urban life of the time, as opposed to the standard biographies of religious leaders. Richard

Frye's translation from the Persian presents an engaging, readable narrative that recreates the lively intellectual and commercial life of this vibrant ancient city. In the tenth century, Bukhara was a cultural center that rivaled Baghdad, and was known as "the dome of learning in the East." It was a dynamic metropolis, capital of the semi-independent dynasty that ruled most of present-day Iran and Central Asia. It was in Bukhara that the so-called Persian Renaissance began, with its far-reaching literary implications. Narshakhi portrays not only rulers, but also everyday life in cities and villages. This primary source affords insights into life in Eastern Iran and Central Asia during a period of change in the Islamic world. *About Richard Frye: Richard N. Frye, Harvard University, is the author of The Heritage of Central Asia, Ibn Fadlan's Journey to Russia, and numerous other books.*

**A History** Yale University Press

The demise of the Soviet Union in 1991 resulted in new state-led nation-building projects in Central Asia. The emergence of independent republics spawned a renewed Western scholarly interest in the region's nationality issues. Presenting a detailed

study, this book examines the state-led nation-building projects in the Soviet republics of Kazakhstan and Uzbekistan. Exploring the degree, forms and ways of the Soviet state involvement in creating Kazakh and Uzbek nations, this book places the discussion within the theoretical literature on nationalism. The author argues that both Kazakh and Uzbek nations are artificial constructs of Moscow-based Soviet policy-makers of the 1920s and 1930s. This book challenges existing arguments in current scholarship by bringing some new and alternative insights into the role of indigenous Central Asian and Soviet officials in these nation-building projects. It goes on to critically examine post-Soviet official Kazakh and Uzbek historiographies, according to which Kazakh and Uzbek peoples had developed national collective identities and loyalties long before the Soviet era. This book will be a useful contribution to Central Asian History and Politics, as well as studies of Nationalism and Soviet Politics.

**The Modern Uzbeks** Read Books Ltd Bringing his perennially popular course to the page, Yale University Professor Paul H. Fry offers in this welcome book a guided

tour of the main trends in twentieth-century literary theory. At the core of the book's discussion is a series of underlying questions: What is literature, how is it produced, how can it be understood, and what is its purpose? Fry engages with the major themes and strands in twentieth-century literary theory, among them the hermeneutic circle, New Criticism, structuralism, linguistics and literature, Freud and fiction, Jacques Lacan's theories, the postmodern psyche, the political unconscious, New Historicism, the classical feminist tradition, African American criticism, queer theory, and gender performativity. By incorporating philosophical and social perspectives to connect these many trends, the author offers readers a coherent overall context for a deeper and richer reading of literature.

**One Belt, One Road** Hoover Inst Press This textbook, written by a dedicated and successful pedagogue who developed the

present undergraduate algebra course at Moscow State University, differs in several respects from other algebra textbooks available in English. The book reflects the Soviet approach to teaching mathematics with its emphasis on applications and problem-solving -- note that the mathematics department in Moscow is called the "Mechanics-Mathematics" Faculty. In the first place, Kostrikin's textbook motivates many of the algebraic concepts by practical examples, for instance, the heated plate problem used to introduce linear equations in Chapter 1. In the second place, there are a large number of exercises, so that the student can convert a vague passive understanding to active mastery of the new ideas. These problems are intended to be challenging but doable by the student; the harder ones have hints at the back of the book. This feature also makes the book ideally suited for learning algebra on one's own outside of the framework of an organized course. In the third place, the author treats material which is usually not part of an elementary course but which is fundamental in applications. Thus, Part II includes an introduction to the classical

groups and to representation theory. With many American colleges now trying to bring their undergraduate mathematics curriculum closer to applications, it seems worthwhile to translate Soviet textbooks which reflect their greater experience in this area of mathematical pedagogy. *Language and the Sexes* Springer  
The ninth edition of *Operating System Concepts* continues to evolve to provide a solid theoretical foundation for understanding operating systems. This edition has been updated with more extensive coverage of the most current topics and applications, improved conceptual coverage and additional content to bridge the gap between concepts and actual implementations. A new design allows for easier navigation and enhances reader motivation. Additional end-of-chapter, exercises, review questions, and programming exercises help to further reinforce important concepts. WileyPLUS, including a test bank, self-check exercises, and a student solutions manual, is also part of the comprehensive support package. *Sogdian Traders* Cambridge University Press

The Language of the Birds Cambridge University Press

The Nazi regime and local collaborators killed 800,000 Belorussian Jews, many of them parents or relatives of young Jews who survived the war. Thousands of young girls and boys were thus orphaned and struggled for survival on their own. This book is the first systematic account of young Soviet Jews' lives under conditions of Nazi occupation and genocide. These orphans' experiences and memories are rooted in the 1930s, when Soviet policies promoted and sometimes actually created interethnic solidarity and social equality. This experience of interethnic solidarity provided a powerful framework for the ways in which young Jews survived and, several decades after the war, represented their experience of violence and displacement. Through oral histories with several survivors, video testimonies, and memoirs, Anika Walke reveals the crucial roles of age and gender in the ways young Jews survived and remembered the Nazi genocide, and shows how shared

experiences of trauma facilitated community building within and beyond national groups. *Pioneers and Partisans* uncovers the repeated transformations of identity that Soviet Jewish children and adolescents experienced, from Soviet citizens in the prewar years, to a target of genocidal violence during the war, to a barely accepted national minority in the postwar Soviet Union.

Instead of robbing a bank, Dortmunder tries to steal the whole building. Encyclopedias are heavy, and John Dortmunder is sick of carrying them. While in between jobs, the persistent heist-

planner is working an encyclopedia-selling scam that's about to blow up in his face. The cops are on their way when his friend Kelp pulls up in a stolen Oldsmobile, offering a quick escape from the law and a job that's too insane to turn down. Kelp's nephew is an FBI washout who's addicted to old-time pulp novels and adventure stories. He tried being a cop, and now he

wants to be a robber. His target: a Main Street bank that has temporarily relocated to a large mobile home. Breaking in is impossible—there are seven guards and a police station down the street—but mobile homes were meant to be driven. Dortmunder just has to drive the bank away.
