## **AGUIRRE RIGGS**

---

### **Gerontological Nursing Review and Resource Manual**

Oxford University Press

Awarded a 2012 AJN Book of the Year Award! Why focus on the negative aspects of growing old while most older adults are

leading positive, fulfilling, and active lives even while dealing with the changes associated with aging and chronic illnesses? Promote healthy aging; learn what it means to age successfully; and develop the tools and resources that can optimize well-being during the later years in life with the guidance you'll find inside. The author, a nationally recognized expert in the field of gerontology addresses the physical, psychosocial, and spiritual needs of older adults based on a holistic, mid-range nursing theory of successful aging. Contributions from healthcare professionals in exercise physiology, nutrition, pharmacy and

elder law help you understand how these disciplines work together to benefit patients.

*A Nursing Care Guide in a Nutshell* Prentice Hall

GERONTOLOGICAL NURSING, 3/e is a comprehensive, research-based, and up-to-date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging; healthy aging; common diseases of aging; and key psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence-based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses "add life to years," not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications; the text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long-term care, and hospice settings.

*A Patient-Centered Guide for Advanced Practice Registered Nurses and Related Health Professions* Mosby Incorporated

"In this book, the tools and clear presentation of information related to the actual testing process provide the learner with a framework for confidence as he or she prepares for the exam. More important, however, is the elaborate presentation of the certification content and the attention to the important physical and psychosocial elements of the human aging process." --

Geraldine Bednash, PhD, RN, FAAN Executive Director American Association of Colleges of Nursing This is the only certification review for the gerontology nursing specialty exam that has it all-- a comprehensive review section covering key content included on the exam, well-honed test-taking strategies, and an extensive number of exam-style questions with answers and rationales. The second edition is completely updated to mirror the new format and content of the 2015 certification exam. It now features rationales for all review questions to promote critical thinking and includes new or expanded sections on health promotion and person-centered care, state-of-the-art drug information, and instruction on leadership, management, patient education, and population health. Concise and to the point, this resource contains all of the information required for test success, including step-by-step directives on how to best prepare for the certification exam, a meticulous content review presented according to the test blueprint, and 500 questions with answers and rationales that mirror the type of questions included on the exam. The dissection and analysis of a variety of questions likely to appear reinforce crucial test-taking strategies, and clues for memorizing information and tips for prioritizing answers offer additional tactics for exam success. An unrivalled resource for test preparation, the book will also be useful for students and teachers of gerontology and practicing nurses working with older adults. Key Features: Mirrors the new 2015 certification test plan Provides expanded content on health promotion and person-centered care Offers updated information on new medications and treatments Presents new content on leadership, management, patient education, and population health New to

the second edition, are rationales for all 500 questions  
*Gerontologic Nursing* Wolters Kluwer Law & Business  
Prepare for a successful career in caring for geriatric populations!  
Williams' Basic Geriatric Nursing, 7th edition is an easy-to-read text which presents the theories and concepts of aging along with appropriate nursing interventions. This comprehensive book helps you understand the unique physiologic and psychosocial changes that affect the elderly adult. Threaded throughout this new edition are practical QSEN boxes and Nurse Alert features, which highlight safety, cultural considerations, health promotion, coordinated care, and home care specific to elderly patients. In addition, an online Study Guide, NCLEX®-PN review questions, and real-world clinical situation boxes help you to study for exams and apply concepts to practice. Coordinated Care boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. Clinical Situation boxes present patient scenarios with lessons for appropriate nursing care and patient sensitivity. UNIQUE! A FREE Study Guide, presented in a comprehensive PDF format on Evolve, reinforces your understanding. 10th grade reading level makes learning easier for you. Nursing Care Plans include Critical Thinking boxes to help you to assimilate and synthesize information. Nursing Process sections provide a framework for the discussion of the nursing care of the elderly patient as related to specific disorders. Cultural Considerations throughout text cover biocultural variations as well as health promotion for specific ethnic groups so you can provide culturally competent care. Health Promotion and Patient Teaching boxes highlight

health promotion, disease prevention, and age-specific interventions. Home Health Considerations boxes provide information on home health care for the older adult. NEW! QSEN boxes provide you with the knowledge, skills, and attitudes necessary to continuously improve the quality and safety of care of the older adult. NEW! Nurse Alert feature emphasizes important safety and health promotion content specific to the elderly patient. NEW! Updated and expanded art program makes learning the material easier through clear and timely photographs and illustrations.

Matteson & McConnell's Gerontological Nursing American Dietetic Associati

Underscores the complexity of prescribing drugs for older adults while providing state-of-the-art guidelines for safe patient care An evidence-based, quick-access reference for adult gerontology nurse practitioners and related healthcare providers, this text describes a holistic, patient-centered approach to prescribing drugs to older adults. Comprehensive yet concise writing distills timely guidance on the complexities of safely prescribing to this unique population. This book opens with physiologic changes and assessment considerations for older adults, followed by a discussion of pharmacokinetics and pharmacodynamics, then a final section on guidelines for drug selection, drug interactions, and multimorbidities. Each chapter presents information in a consistent, easy-to-read template. Patient Care Pearls alert readers to crucial information and relevant case studies with examples of inappropriate medical prescribing provide context for drug delivery. Key points and chapter summaries help reinforce information. Additional features include the provision of

guidelines for psychotropic medications in LTC facilities, special considerations for frail older adults, and the role of pharmacists as a resource for other practitioners. Key Features: Decision-making guidance on prescribing practices in varied settings Discusses in depth physiological considerations including multimorbidity and polypharmacy Presents Beer's Criteria and its implications Guidelines for psychotropic medications in LTC facilities Special considerations for frail older adults Patient Care Pearls, case studies, key points, and chapter summaries  
Textbook of Geriatric Dentistry John Wiley & Sons

The third edition of POCKET GUIDE TO GERONTOLOGIC NURSING is designed to serve as a practical reference for nurses assessing the health status of older adults in a variety of traditional and nontraditional settings. This book guides the nurse in the performance of a basic, comprehensive health assessment that covers all body systems. Well-organized, it provides a quick, ready reference when conducting either a focused assessment related to a specific body system or a complete health assessment. New to this edition is a chapter on nutritional assessment, a section identifying drugs that may influence assessment of the older client, sample documentation boxes at the end of each body system chapter that show how to record the collected subjective and objective data in an organized format, and a section on foot assessment. A new appendix includes a sample write-up of a complete history and physical examination. \* Presents normal, variations of normal, and deviations from normal findings to help the nurse make accurate assessments. \* Includes functional, cognitive, affective, and social assessment screening tools to augment traditional health assessment tools. \*

Offers a brief overview of anatomy and physiology and age-related changes to identify unique differences of the older adult population. \* Features Client Teaching boxes to provide practical advice on health promotion and illness prevention. \* Includes a sample health history format that is comprehensive and adaptable to any client population and setting. \* Presents an assessment approach that maintains a nursing focus that is adaptable to any setting and useful at any point in the continuum of care. \* Emphasizes aged-specific and aged-appropriate assessment techniques throughout the book. \* Makes generous use of tables and boxes to provide quick reference of key information. \* Presents physical examination in a two-column format to assist the nurse in performing assessment in an orderly, head-to-toe manner. \* Uses a consistent format and practical use of second color to make information easy to find and use. \* Includes numerous detailed illustrations to highlight assessment techniques. \* Serves both the novice nurse learning the skills of older adult health assessment and the experienced practitioner in a portable, easy-to-use reference. Explores four components of older adult nutritional assessment in a clear, concise format. Includes a sample exam write-up to show how to document findings in a clear, concise manner using accepted terminology and abbreviations. Features a new section on obtaining the health history that identifies drugs that may influence assessment of the older client. Expands content on the musculoskeletal system to include current information on foot assessment of the older adult. Includes a sample write-up of a complete history and physical examination. A Volume in the Nursing Pocket Guides Series

Jones & Bartlett Learning

Completely revised with new chapters and sections covering everything the health-care provider needs to know when working with the older adult either at home or in nursing and long-term care facilities. Chapters cover factors affecting nutrition, nutrition and disease, nutritional assessment, dining challenges and regulatory compliance. This scientifically sound and practical resource for new and experienced nutrition professionals includes new forms, resources, the food guide pyramid for older adults and an index of tales.

Gerontological Nursing Springer Publishing Company

Living with Chronic Illness and Disability: Principles for Nursing Practice provides the knowledge and skills necessary for nursing and allied health students to provide quality, competent care to people living with a chronic illness or disability. The text has a strong evidence base, but is founded in reality. It includes practical, useful principles for holistic care, self-management, and a multidisciplinary approach. It also covers a range of issues affecting patients, carers and families, with a focus on empowering individuals as they adjust to the life-changing journey of chronic disease and disability. Edited by Esther Chang and Amanda Johnson, and written by a multidisciplinary team of expert clinicians and academics, this book will enhance your confidence when caring for people with a range of major and common conditions, including heart disease, stroke, cancer, asthma, diabetes, obesity, dementia, mental illness and palliative care. Case studies and accompanying exercises give insights into lived experience Links to latest journal articles, media, further reading and online resources to enhance learning Questions to

help you reflect on your practice Exercises and learning activities to understand context eBook included with every print purchase Additional resources on Evolve eBook on VitalSource Student and instructor resources Links to multimedia resources and reflective questions to assist learning and promote self-inquiry Fully updated and refreshed to reflect current knowledge, data and perspectives

**Issues and Trends in Nursing** Springer Publishing Company Includes care plans by body system for disorders often seen in the elderly population. Nursing care begins with a comprehensive review and assessment of each individual patient. The data is then analyzed and a specific plan of care developed.

Concepts and Practice Mosby Incorporated

"Gerontologic Nursing" is best known for its comprehensive coverage of health promotion and basic and complex gerontologic concepts and issues, as well as the most common medical-surgical problems associated with the older adult. The book follows a body systems organization similar to a medical-surgical nursing text.

Essentials of Gerontological Nursing Jones & Bartlett Learning Matteson & McConnell's Gerontological Nursing, 3rd Edition provides comprehensive, research-based information on nursing care of older adults. Beginning with the basics, the text uses a systems approach to describe the aging process from wellness to illness. It also describes physiological and psychological aspects of aging in detail, as well as assessment and practice in all settings using the nursing process. Each chapter incorporates a research and theory-based approach to the aging process. Content is comprehensive and focuses on caring for the older

adult. The text examines the differences between normal aging conditions and clinical problems/conditions. Competencies and Roles in Gerontological Nursing section focuses on the process that nurses, especially clinical nurse specialists, use to impact gerontological nursing care. Nursing care plans provide the practitioner with nursing care scenarios applied to clinical practice. Expanded content on functional assessment, including addressing communication issues, both verbal and non-verbal, alerts the reader to vital issues that may affect the patient's plan of care. Color insert visually complements material on the integumentary section as it illustrates some of the major integumentary conditions affecting the gerontologic population. Reflections boxes written by experts across different nursing fields share personal experiences related to the chapters' content. Toward Better Health boxes provide key considerations for promoting healthy lifestyles. Assessment boxes emphasize specific physical tests and observations to make when assessing a patient. Age-Related Changes boxes detail the ways in which particular body systems are affected by the aging process. New chapters on End of Life Care, Evidence-Based Practice, and Assisted Living Care give the reader a more comprehensive look at gerontological nursing care.

*Oxford Textbook of Geriatric Medicine* Elsevier Health Sciences  
Ebersole & Hess' *Gerontological Nursing and Healthy Aging* is the only gerontological nursing text that follows a wellness-based, holistic approach to older adult care. Designed to facilitate healthy aging regardless of the situation or disease process, this text goes beyond simply tracking recommended treatments to address complications, alleviate discomfort, and help older adults

lead healthy lives. Featuring evidence-based practice boxes, safety alerts, expanded tables, and careful attention to age, gender, and cultural differences, Ebersole & Hess' *Gerontological Nursing and Healthy Aging* is the most complete text on the market. Focus on health and wellness helps you gain an understanding of the patient's experience. AACN and the Hartford Institute for Geriatric Nursing core competencies integrated throughout. Consistent chapter organization and pedagogy, including Learning Objectives, Glossary, and Research and Study Questions/Activities. Evidence-Based Practice boxes summarize research findings that confirm effective practices or identify practices with unknown, ineffective, or harmful effects. Careful attention to age, cultural, and gender differences helps you understand these important considerations in caring for older adults. Expanded tables, boxes, and forms, including the latest scales and guidelines for proper health assessment make information easy to find and use. Activities and discussion questions at the end of every chapter equip you with the information you need to assess the patient. UPDATED! Healthy People 2020 boxes integrate information about healthy aging. NEW! Safety Alerts highlight safe practices and quality of care QSEN competencies. NEW! Chapter on Neurologic Compromise expands content on stroke and Parkinson's disease.

**Principles for nursing practice** Springer Publishing Company  
GERONTOLOGIC NURSING provides comprehensive coverage of health promotion, gerontologic concepts and issues, and medical-surgical problems associated with the older adult. Divided into seven parts, each chapter follows a consistent organization including learning objectives, emergency boxes, client and family

teaching boxes, research boxes, key points, special insights, and new health promotion and nutrition boxes. The second edition also includes a new chapter on health promotion, expanded chapters on nutrition and functional assessment, and a dedicated MERLIN which provides the student and instructor with additional up-to-date tools and resources to enhance and expand their content knowledge. Highlights fundamental aging theories to provide a basis for biological and psychosocial aspects of quality nursing care. Provides complete and comprehensive coverage of assessment recapping normal, deviations from normal and abnormal findings. Uses a 5-step nursing process format to provide the consistent framework for presentation of nursing care. Features care plans with clinical situations for those disorders most prevalent in the elderly. Includes a separate chapter on cultural influences and integrates cultural awareness boxes throughout to focus on specific customs related to how a nurse might care for the aging client. Includes separate chapters focusing on acute, home and long term care to provide a complete discussion of care in each of these settings. Provides detailed coverage of pain, infection, cancer, chronic illness, loss, death and dying, and substance abuse to explain potentially complex aspects of aging and the related care. Provides a consistent chapter pedagogy including learning objectives, summary, key points, and critical thinking exercises. Includes Client/Family teaching boxes that emphasize key aspects of practice and teaching for self-care. Highlights Home Care Tips Boxes to promote practical, effective care for the home-bound older client. Integrates Insight boxes that provide realistic vignettes on caring for the elderly and helpful hints from today's

practicing gerontological nurses. Provides Emergency Treatment boxes that alert the student to danger signs and list immediate interventions. Includes research boxes with abstracts of current research and implications for practice. Provides a nuts-and-bolts guide to blood-product administration for adult and pediatric patients. Outlines and explains transfusion reactions. Describes the effect of different types of fluids used in resuscitation. Includes formulas used in fluid administration. Provides the most up-to-date information about oxygen delivery devices. Presents information on how to help a Spanish-speaking child identify his/her level of pain. Includes the pediatric coma scale. Features the pediatric trauma score which is used to help evaluate the severity of injury. Provides information about domestic violence in the Mental Health Conditions chapter. Includes a section on the role of the Sexual Assault Nurse Examiner (SANE) and the latest findings on sexual assault. Presents additional information on mammalian bites and anaphylactic shock. Highlights major points of care for quick reference with bold or italicized text. Presents pediatric and adult content separately in the reference section of the book for fast and easy access. Includes stroke and hypothermia algorithms. Covers the latest information on conscious sedation according to JCAHO standards, including a table on deep sedation. Features several new and updated tables which include the following information: conversion of Centigrade and Fahrenheit, updated normal lab values, updated medication tables, etc. (Includes a FREE MERLIN website at: [www.harcourthealth.com/MERLIN/Lueckenotte/](http://www.harcourthealth.com/MERLIN/Lueckenotte/))  
*Gerontological Nursing* American Nurses Association  
Important Notice: The digital edition of this book is missing some

of the images or content found in the physical edition. Gerontological Nursing: Competencies for Care, Second Edition is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. It is the first of its kind to have more than 40 contributing authors from many different disciplines. Some of the key features include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

#### Genetics/genomics Nursing Cengage Learning

This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders)

hospitals, are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles

#### **Gerontologic Nursing** F.A. Davis

Named a 2013 Doody's Core Title! "The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely...The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice."--The Gerontologist "Now more than ever, nurses are called upon to lead efforts to embed evidence-based practice in

daily operations. As the IOM report states, 'nurses have key roles to play as team members and leaders for a reformed and better-integrated, patient-centered health care system.' The process of implementing sweeping change in health care will likely take years; however, nurses must start pragmatically and focus on these critically important protocols that have demonstrated improved outcomes for older adults. Simply stated, 'Pick this book up and use it.'" From the Foreword, Susan L. Carlson, MSN, APRN, ACNS-BC, GNP-BC, FNGNA President, National Gerontological Nursing Association "As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice." Score: 97, 5 Stars. --Doody's One of the premier reference books for geriatric nurses in hospital, long-term, and community settings, this 4th edition has been thoroughly updated to provide the most current, evidence-based protocols for care of common clinical conditions and issues in elderly patients. Designed to improve the quality, outcomes, and cost-effectiveness of health care, these guidelines are the result of collaboration between leading practitioners and educators in geriatric nursing and New York University College of Nursing. Protocols for each clinical condition have been developed by experts in that particular area, and most have been systematically tested by over 300 participating hospitals in "Nurses Improving Care for Health System Elders" (NICHE). Evidence is derived from all levels of care, including community, primary, and long-term care. A systematic method in compliance with the AGREE appraisal process was used to rate the levels of

evidence for each protocol. Protocols are organized in a consistent format for ease of use, and each includes an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, each protocol is embedded within chapter text, which provides the context and detailed evidence for the protocol. Each chapter contains resources for further study. Key Features: Updated to provide a wide range of evidence-based geriatric protocols for best practices Contains new chapters on function-focused care, catheter-associated urinary tract infections, mistreatment detection, acute care models, and transitional care Illustrates application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known leaders in geriatric nursing education and practice, who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Encompasses the contributions of 58 leading practitioners of geriatric care Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles [Aging and Diversity](#) Taylor & Francis Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities and assessments, a full suite of instructor resources, and learning analytics reporting tools. Gerontological Nursing: Competencies for Care, Fourth Edition focuses on caring for the elderly by employing a holistic and inter-disciplinary approach. The Fourth Edition will feature a greater emphasis on healthy aging and continues to follow the framework of the Core Competencies of the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric

Nursing. This framework allows students to learn and develop all aspects of nursing care in a familiar and structured learning platform.

**Living with Chronic Illness and Disability** Springer Publishing Company

"Are you looking into how to advance your professional development through certification? Need a reliable and credible reference resource? No matter where you are in the process, make sure you have the most valuable review and resource tool at your disposal. The Gerontological Nursing Review and Resource Manual, 4th Edition is a must-have tool for nurses planning to take the American Nurses Credentialing Center's (ANCC's) Gerontological Nursing certification exam. Based on the official ANCC certification exam test content outline, this review and resource manual will help you: Study and analyze comprehensive material and concepts written by nursing experts. Develop a recommended seven-step plan to equip you for the exam and map out what to do on the day of the exam. Prepare for and familiarize yourself with gerontological nursing standards of practice. And much more ... Make the Gerontological Nursing Review and Resource Manual a key resource in your certification preparation"--

Nutrition Care of the Older Adult: a Handbook for Dietetics Professionals Working Throughout the Continuum of Care  
Saunders

Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by

nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars —Doody's Medical Reviews "[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice." —The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills." —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas

prepare students to appropriately respond to “gray area” situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases

addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client’s needs infused throughout exercises
