teaching assistants alike will find this book invaluable. HHMI Professor Jo Handelsman and her colleagues at the Wisconsin Program for Scientific Teaching (WPST) have distilled key findings from education, learning, and cognitive psychology and translated them into six chapters of digestible research points and practical classroom examples. The recommendations have been tried and tested in the National Academies Summer Institute on Undergraduate Education in Biology and through the WPST. Scientific Teaching is not a prescription for better teaching. Rather, it encourages the reader to approach teaching in a way that

captures the spirit and rigor of scientific research and to contribute to transforming how students learn science. *A novel* Peterson's "In this ... guide to the ever-changing modern workplace, Kathryn Minsheu and Alexandra Cavoulacos, the co-founders of [the] career website TheMuse.com, show how to play the game by the New Rules, [explaining] how to figure out exactly what your values and your skills are and how they best play out in the marketplace ... Fast Facts for the Clinical Nursing Instructor University of Michigan Press
 A Best Book of the Year: NPR and Boston Globe Finally a novel that puts the "pissed" back into "epistolary." Jason Fitger is a beleaguered professor of creative writing and literature at Payne University, a small and not very distinguished liberal arts college in the midwest. His department is facing draconian cuts and squalid quarters, while one floor above them the Economics Department is getting lavishly remodeled offices. His once-promising writing career is in the doldrums, as is his romantic life, in part as the result of his unwise use of his private affairs for his novels.

His star (he thinks) student can't catch a break with his brilliant (he thinks) work Accountant in a Bordello, based on Melville's Bartleby. In short, his life is a tale of woe, and the vehicle this droll and inventive novel uses to tell that tale is a series of hilarious letters of recommendation that Fitger is endlessly called upon by his students and colleagues to produce, each one of which is a small masterpiece of high dudgeon, low spirits, and passive-aggressive strategies. We recommend Dear Committee Members to you in the strongest possible terms.

Should I go to graduate school? How do I choose where to apply? Are my grades and

accomplishments good enough to get in? Who should I ask to write recommendation letters for me, and how should I approach these people? How do I write my "personal statement?" When will I hear my fate, and how should I make my final decision? These are just a few of the many questions to which this well-researched, thorough, and extremely user-friendly book offers answers. Students who are contemplating graduate training in psychology, counseling, and related fields are often apprehensive and confused about applying to graduate school, but this book takes the guesswork and anxiety out of the process. The tone and features (such as the

Q&A format, timeline for application-related tasks and activities, and special advice for special populations) that made the first edition so successful, eliciting hundreds of thank-you notes and e-mail messages to the author, are just as evident in this new edition. The book has been thoroughly updated to include coverage of new topics such as use of the internet and e-mail, as well as changing trends in the professions. The most obvious difference is that the book is now significantly shorter as a result of meticulous rewriting, making it even easier to use. There have been attempts since the publication of the first edition to copy the format of this book, but

none of the others have successfully duplicated the depth of research-based advice and the supportive style that make this book the guide of choice for thousands of graduate-school bound students and their advisors.

Professor Is InThe Essential Guide To Turning Your Ph.D. Into a Job

The definitive career guide for grad

students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves

up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site *The Professor is In*, she has helped countless Ph.D.'s turn themselves into

stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: - When, where, and what to publish - Writing a foolproof grant application - Cultivating references and crafting the perfect CV - Acing the job talk and campus interview - Avoiding the adjunct trap - Making the leap to nonacademic work, when the time is right

The Professor Is In addresses all of these issues, and many more.
