wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental , and public health issues surrounding one of America's most dangerous

pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these

technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers , Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of

life and loss of habitat. *Kapal* In his revealing and frank autobiography , David G. Atwood, II takes us into a world of government corruption, back-stabbing politicians and an all too familiar tour of the criminal justice system. Persecuted by a corrupt sheriff's department for exposing a cabal of local corruption that reached into the upper echelon of international politics;

prosecuted and sent to federal prison for a crime he didn't commit; and discriminated against for being gay, David leads us on a journey through the life of a prisoner that only an insider could tell and captivates us with a story of courage that will inspire everyone who reads it. Whether revealing the drug connections that for years have padded the pockets of the local cops and exposing how

government-sanctioned drug deals in Vicksburg, Mississippi helped illegally fund the Nicaraguan Contras in the 1980's, David leaves no hole's barred as he takes aim at those who would misuse their political power for personal gain.
