In *Psychiatric Power*, the fourth volume in the collection of his groundbreaking lectures at the Collège de France, Michel Foucault addresses and expands upon the ideas in his seminal *Madness and Civilization*, sketching the genealogy of psychiatry and of its characteristic form of power/knowledge. *Madness and Civilization* undertook the archeology of the division according to which, in Western Society, the madman found himself separated from the sane. That book ends with the medicalization of madness at the beginning of the nineteenth century. *Psychiatric Power* continues this discourse up to the end of the nineteenth century, and the double "depsychiatrization" of madness, now dispersed between the neurologist and the psychoanalyst. Presented in a conversational tone, *Psychiatric Power* brings fresh access and light to the work of one of the past century's preeminent thinkers.

Someone has hacked into the pope's personal computer—not to spy on the Vatican or to spread a virus, but to send an urgent plea for help: SAVE OUR LADY OF THE TEARS. The crumbling Baroque church in the heart of Seville is slated for demolition—and two of its defenders have suddenly died. Accidents? Or murders? And was the church itself somehow involved? The Vatican promptly dispatches Father Lorenzo Quart, their worldly and enormously attractive emissary, to investigate the situation, track down the hacker—known only as

"Vespers"—and stay alive. Thus begins a sophisticated and utterly suspenseful page-turner that has taken its readers by storm. "An elegant thriller that is as much about the elusive quest for happiness as it is about solving the murders." —The Denver Post "An indelible tale of love, faith, and greed." —People, Page-Turner of the Week

Michel Foucault examines the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity.

*Women Who Love Too Much* HarperCollins

Is IQ destiny? Not nearly as much as we think. This fascinating

and persuasive program argues that our view of human intelligence is far too narrow, ignoring a crucial range of abilities that matter immensely in terms of how we do in life. Drawing on groundbreaking brain and behavioral research, Daniel Goleman shows the factors at work when people of high IQ flounder and those of modest IQ do well. These factors add up to a different way of being smart -- one he terms "emotional intelligence." This includes self-awareness and impulse control, persistence, zeal and self-motivation, empathy and social deftness. These are the qualities that mark people who excel in life, whose relationships flourish, who are stars in the workplace. Lack of emotional intelligence can sabotage the intellect and ruin careers. Perhaps the greatest toll is on children, for whom risks include depression, eating disorders, unwanted pregnancies, aggressiveness and crime. But the news is hopeful. Emotional intelligence is not fixed at birth, and the author shows how its vital qualities can be

nurtured and strengthened in all of us. And because the emotional lessons a child learns actually sculpt the brain's circuitry, he provides guidance as to how parents and schools can best use this window of opportunity in childhood. The message of this eye-opening program is one we must take to heart: the true "bell curve" for a democracy must measure emotional intelligence. [Quince miradas, Diario docente](#) Houghton Mifflin Harcourt For those interested in South American literature, this is a "tour-de-force". Clever and gripping from beginning to end, "El Tunel" reveals how an intelligent and educated man can be driven to insanity and even crime by his own doubts and the obsessive drive for the love of a woman.
