## CABRERA HART

*Dubai Explorer, 2001* Explorer Publishing & Distribution  
Despite the fact that the Arabic world marks Al-Hijra at the start of Muharram (the first month in the lunar Islamic calendar) and the Chinese community celebrate the "Spring Festival" at the turn of the Chinese lunisolar year in late January/early February, the Gregorian calendar's New Year marks a new beginning for millions of individuals across the globe. The way in which we celebrate this varies from place to place - in parts of South America, the colour of one's clothing is said to symbolize hopes and desires for the year to come (red for love, yellow for wealth), whereas in Spain it is believed that consumption of grapes on the strike of midnight will bring prosperity over the coming twelve month. The same may be said of wearing polka dots in the Philippines, and burning torches and fireballs are believed to drive out the impurities of the dying year at the Scottish festival Hogmanay. However the underlying principle is the same - it's out with the old and in with the new. Yet some things never change. Like your trusty, innovative and high-quality legal publication, Court Uncourt. Marking the New Year with a new volume, our team of lawyers in UAE and globally at STA promise to continue in our efforts to bring you the latest legal news with our trademark bespoke twist. We wish you a blessed New Year and an enjoyable read.

Staggering skylines and boastful architecture make Dubai famous—this book traces them back to a twentieth-century plan for survival. In 1959, experts agreed that if Dubai was to become something more than an unruly port, a plan was needed.

Specifically, a town plan was prescribed to fortify the city from obscurity and disorder. With the proverbial handshake, Dubai's ruler hired British architect John Harris to design Dubai's strategy for capturing the world's attention—and then its investments. Showpiece City recounts the story of how Harris and other hired professionals planned Dubai's spectacular transformation through the 1970s. Drawing on exclusive interviews, private archives, dog-eared photographs, and previously overlooked government documents, Todd Reisz reveals the braggadocio and persistence that sold Dubai as a profitable business plan. Architecture made that plan something to behold. Reisz highlights initial architectural achievements—including the city's first hospital, national bank, and skyscraper—designed as showpieces to proclaim Dubai's place on the world stage. Reisz explores the overlooked history of a skyline that did not simply rise from the sands. In the city's earliest modern architecture, he finds the foundations of an urban survival strategy of debt-wielding brinkmanship and constant pitch making. Dubai became a testing ground for the global city—and prefigured how urbanization now happens everywhere.

*Managing Organizations in the United Arab Emirates* McGraw Hill Professional

This volume provides an authoritative and comprehensive state-of-the-art review of hot desert terrains in all parts of the world, their geomaterials and influence on civil engineering site investigation, design and construction. It primarily covers conditions and materials in modern hot deserts, but there is also coverage of unmodified ancient desert soils that exhibit engineering behaviour similar to modern desert materials. Thorough and up-to-date guidance on modern field evaluation and ground investigation techniques in hot arid areas is provided, including reference to a new approach to the desert model and

detailed specialized assessments of the latest methods for materials characterization and testing. The volume is based on world-wide experience in hot desert terrain and draws upon the knowledge and expertise of the members of a Geological Society Engineering Group Working Party comprising practising geologists, geomorphologists and civil engineers with a wealth of varied, but complementary experience of working in hot deserts. This is an essential reference book for professionals, as well as a valuable textbook for students. It is written in a style that is accessible to the non-specialist. A comprehensive glossary is also included.

This is the first book to fully present, analyse and interpret the Dubai real estate market. Dubai is fast becoming one of the world's most attractive places to invest in real estate and this book examines the market from three interlinked sectors that drive its performance: occupiers, investors and developers. It examines the market's historical growth and lays the foundations to examine future trends. The book provides a synopsis of Dubai's market practices, economic trends and social change that impacts the value of real estate. Chapters also debate issues such as property investment, house price performance, local valuation practices, spatial planning, the economics of the city, market practices and regulation, property-led economic growth and future trends such as sustainability and digitalization. This book offers a comprehensive, in-depth and up-to-date account of the

Dubai property market and presents a full assessment of the investment potential of Dubai real estate. It is a must read for students, academics and real estate professionals interested in this fascinating real estate market that has implications for both Dubai and wider GCC markets as well as the international investment market and senior professionals who come to work in the region.

**Hot Deserts** ASTM International

The book has been thoroughly revised to reflect the impact of built infrastructure on the environment, social concerns, new technologies and scientific developments, and the impacts of natural and man-made disasters.

**The City Record** Stanford University Press

Completely revises and updated, this latest edition of the Dubai Explorer offers a unique perspective on this fast-changing city. Dozens of new activities, hotels and restaurants have been tirelessly visited and reviewed in this indispensable guide for visitors, who are expected to number over 3 million in 2001. Nine packed color-coded sections covering everything from culture and heritage, leisure, sports and nightlife to information for new residents and independent reviews of over 550 bars, restaurants, and cafes -- even where to smoke shisha pipes. All food and entertainment venues have been independently reviewed giving the reader a realistic and useful idea of what each place is really like.

Transportation Research Record Geological Society of London  
Comprehensive, fun and easy to use, this book covers everything worth knowing about Dubai and where to do it. Meticulously updated by a resident team of writers, photographers and lovers of life, the result is the most in-depth, practical and accurate coverage and recommendations around. Ideal for residents, short-term visitors and tourists; essential for anyone in this vibrant and surprising city. It contains New Resident tips and advice; Independent reviews of over 500 restaurants, bars and cafes; Leisure and sporting activities from Abseiling to Entertainment to Zoology; Exploring - from museums and heritage to the latest shopping malls; Everything fully referenced to 30 pages of photographic maps; Plus a pull-out city map. This is the insiders' guide to what's hot and what's not in Dubai and the Emirates!

**Public Transport International** STA Law Firm

Computer Aided Highway Engineering is aimed at developing professional knowledge in the field of highway engineering with adequate skills in planning, designing and implementation of the highway project with an exposure of hands on training of computer software in designing the worldwide road infrastructures. It discusses Digital Terrain Model (DTM) using satellite data including highway geometric, pavement and tunnel design, supported by relevant tutorials. Quantity estimation, cost estimation and production of various types of construction drawings are described in detail with theory and tutorials backed by real project data. Recognizes the role of information and

computer technology in various aspects of highway design. Reviews different tasks for feasibility studies and DPR with software applications. Explores topographic survey, Digital Terrain Model (DTM) and highway geometrics and, pavement and drainage design. Discusses project estimations for various revisions of the engineering work. Includes HEADS Pro along with chapter wise tutorials containing design and field data, tutorial guides and various tutorial videos. This volume is aimed at Professionals in Civil Engineering, Highway Engineering, Transport Planning and Town Planning and Traffic Engineering.
