**More Than Just Bad Handwriting, a Parent's Perspective**

David & Charles Publishers

It's time to say NO to trying to fit square-peg kids into rounds holes, and YES to raising them from a place of acceptance and joy. Today millions of kids are stuck in a world that doesn't embrace who they really are. They are the one in five "differently wired" children with ADHD, dyslexia, giftedness, autism, anxiety, or other neurodifferences, and their challenges are many. And for the parents who love them, the challenges are just as numerous, as they struggle to find the right school, the right support, the right path. But now there's hope. Differently Wired is a revolutionary book—weaving together personal stories and a tool kit of expert advice from author Deborah Reber, it's a how-to, a manifesto, and a reassuring companion for parents who can so often feel that they have no place to turn. At the heart of Differently Wired are 18 paradigm-shifting ideas—what the author calls "tilts," which include how to accept and lean in to your role as a parent (#2: Get Out of Isolation and Connect). Deal with the challenges of parenting a differently wired child (#5: Parent from a Place of Possibility Instead of Fear). Support yourself (#11: Let Go of Your Impossible Expectations for Who You "Should" Be as a Parent). And seek community (#18: If It Doesn't Exist, Create It). Taken together, it's a lifesaving program to shift our thinking and actions in a way that not only improves the family dynamic, but also allows children to fully realize their best selves. "In this generous and urgent book, Deborah Reber lets the light in. She helps parents see that they're not alone, and even better, delivers a positive action plan that will change lives."—Seth Godin, author of Linchpin "Differently Wired will help parents of children who think differently to accept their child for who they are and facilitate their successful development."—Temple Grandin, author of Thinking in Pictures and The Autistic Brain

The definitive resource for teaching kids with Asperger syndrome the life skills that build independence, confidence, and self-esteem. Children with autism spectrum disorders learn differently. Our kids' choices are too often limited and their paths to success restricted, not by a lack of intellectual ability but by deficits in acquiring, applying, and generalizing basic life skills. Success in school, at home, on the playground, and beyond depends on mastering countless basic living skills that most other kids just "pick up" almost by osmosis. This book shows parents how to teach these so-called easy skills to complex learners. This is the first book for parents and caregivers of kids with Asperger syndrome and similar learning profiles that features strategies based on applied behavior analysis--the most widely accepted, evidence-based, and effective teaching method for learners with ASDs--including how to: -Identify critical skills appropriate for your child's age--how to teach them and why -Implement new techniques that can replace, mimic, prompt, override, or impose missing order on your child's learning style -Design a curriculum for your child that reduces reliance on prompts (including parents) and promotes new learning, new behaviors, and independence

This is the first comprehensive guide for parents of children with Dual and Multiple Exceptionality (DME, sometimes called Twice Exceptionality or 2E). Children with high learning potential may also have conditions such as ASD, ADHD, dyslexia and dyspraxia, having 'flashes of brilliance' in some areas whilst needing additional support in others. As a result, their abilities may not always be recognised in an educational setting. This book takes a strengths-based approach towards helping parents recognise and focus on their child's areas of potential to support them towards better attainment and self-esteem, and build on these abilities while also identifying and addressing areas of difficulty. It provides an understanding of the mixed learning profile of DME children, explaining why they excel in some areas but not others, as well as guidance for parents on working positively with schools and providing their child with the support they need. With stories, quotes from parents and examples throughout, this is an essential guide to helping DME children achieve their full untapped potential.

This book is designed to help you move forward in identifying and accommodating your child's learning needs, one step at a time.
