Enter the mind of French literary giant Honoré de Balzac through a study of nine of his greatest characters and the novels they inhabit. Balzac's Lives illuminates the writer's life, era, and work in a completely original way. Balzac, more than anyone, invented the nineteenth-century novel, and Oscar Wilde went so far as to say that Balzac had invented the nineteenth century. But it was above all through the wonderful, unforgettable, extravagant characters that Balzac dreamed up and made flesh—entrepreneurs, bankers, inventors, industrialists, poets, artists, bohemians of both sexes, journalists, aristocrats, politicians, prostitutes—that he brought to life the dynamic forces of an era that ushered in our own. Peter Brooks's Balzac's Lives is a vivid and searching portrait of a great novelist as revealed through the fictional lives he imagined. *Consumer Economics* National Academies Press
Family Communication: Cohesion and Change encourages students to think critically about family interaction patterns and to analyze them using a variety of communication theories. Using a

framework of family functions, current research, and first-person narratives, this text emphasizes the diversity of today's families in structure, ethnic patterns, gender socialization, and developmental experiences. New for the tenth edition are expanded pedagogical features to improve learning and retention, as well as updates on current theory and research integrated throughout the chapters for timely analysis and discussion. Cases and research featured in each chapter provide examples of concepts and themes, and a companion website offers expanded resources for instructors and students.  The Process of Parenting describes the many ways parents and caregivers can translate their love for children into effective parenting behavior. The book has strong emphasis on the development process in terms of children's and parents' growth as complex individuals, and in the changing nature of their relationships over time. Because parents and children are distinct individuals, the book includes a problem-solving approach that can help parents arrive at solutions that fit them, their children, and their life circumstances. The ninth edition includes new first person narrative boxes and more emphasis on social context, new evidence-based parenting programs, and international parenting.

 Today's children face a multitude of pressures, from the everyday challenges of life to the increasing threats of poverty, exploitation, and trauma. Central to growing up successfully is learning to deal with stress, endure hardships, and thrive despite adversity. Resilience – the ability to cope with and overcome life's difficulties – is a quality that can potentially be nurtured in all young people. The second edition of the *Handbook of Resilience in Children* updates and expands on its original focus of resilience in children who overcome adversity to include its development in those not considered at risk, leading to better outcomes for all children across the lifespan. Expert contributors examine resilience in relation to environmental stressors, as a phenomenon in child and adolescent disorders, and as a means toward positive adaptation into adulthood. New and revised chapters explore strategies for developing resilience in the

family, the therapist's office, and the school as well as its nurturance in caregivers and teachers. Topics addressed include: Resilience in maltreated children and adults. Resilience and self-control impairment. Relational resilience in young and adolescent girls. Asset-building as an essential component of treatment. Assessment of social and emotional competencies related to resilience. Building resilience through school bullying prevention programs. Large-scale longitudinal studies on resilience. The second edition of the Handbook of Resilience in Children is a must-have reference for researchers, clinicians, allied practitioners and professionals, and graduate students in school and clinical psychology, education, pediatrics, psychiatry, social work, school counseling, and public health.

Handbook of Resilience in Children

This book provides the information parents need about the most common infections that their children are likely to catch, as well as diseases that are guarded against by vaccines, and some rarer diseases that parents should know about in case of an

emergency. It is intended to help parents identify these diseases and make educated decisions about when a child needs medical intervention or attention, or whether home treatment is warranted.

In a world of modern, involved, caring parents, why are so many kids aggressive and cruel? Where is intelligence hidden in the brain, and why does that matter? Why do cross-racial friendships decrease in schools that are more integrated? If 98% of kids think lying is morally wrong, then why do 98% of kids lie? What's the single most important thing that helps infants learn language? NurtureShock is a groundbreaking collaboration between award-winning science journalists Po Bronson and Ashley Merryman. They argue that when it comes to children, we've mistaken good intentions for good ideas. With impeccable storytelling and razor-sharp analysis, they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring--because key twists in the science have been overlooked. Nothing like a parenting manual, the authors' work is an insightful exploration of themes and

issues that transcend children's (and adults') lives.

Written from a psychological perspective while integrating cross-disciplinary viewpoints, this fully updated Second Edition takes a parent-centered approach to exploring topics such as the reasons behind parental behavior, the effect parents and children have on one another, and social policy's ability to help families. Including the latest statistics on family functioning and with coverage of contemporary issues, George Holden's Parenting conveys the process of parenting in all its complexities.

Fun Home SOS Programs & Parents Pres Social Policy for Child and Family Development: A Systems/Dialectical Perspective is designed to help students think critically and dialectically about social policies that affect children and families. Based on the belief that no single policymaking position has all the answers, the book offers a model that reduces the tendency to present only one viewpoint. As they move through the text, readers use this model to evaluate the effectiveness of specific policies. The book

addresses issues such as alcohol, nicotine, and drug use during pregnancy, social policy and poverty, education, family development, and technology. The material also discusses child abuse and neglect, social media and ethnicity, and the future of social policy on child and family development. Each chapter includes learning objectives, key terms, study questions, a debate activity, additional reading resources, and a list of references. *Social Policy for Child and Family Development* is well suited to courses in child and family studies or consumer sciences. Thomas W. Roberts is a professor in the Department of Child and Family Development at San Diego State University. He teaches courses in family studies and public policy. His research interests include attachment in long-term marriages, parenting, applying neuroscience to marital therapy, and the role of religion and ethical values on family development. World renowned pediatricians T. Berry Brazelton and Joshua Sparrow see discipline as a parent's gift to a child. By following the doctors' unique approach, which emphasizes teaching over punishment, parents will find effective solutions for common behavior problems. Not only will parents feel more confident and at ease but they will also experience the joy of raising children who learn to discipline themselves. The vital advice covers six stages of discipline, the power

of consequences, ways to encourage moral development and empathy, dealing with misbehavior (from biting and fighting to cheating, lying and using foul language), and special disciplinary challenges (including academic pressure, illness, and digital technology).

"This book examines patterns and trends in racial inequality over the past several decades. Iceland finds that color lines have softened over time, as there has been some narrowing of differences across many indicators for most groups over the past sixty years. Asian Americans in particular have reached socioeconomic parity with white Americans. Nevertheless, deep-seated inequalities in income, poverty, unemployment, and health remain, especially among blacks, and, to a lesser extent, Hispanics. The causes for disadvantage for the groups vary, ranging from a legacy of racism, current discrimination, human capital deficits, the unfolding process of immigrant incorporation, and cultural responses to disadvantage."--Provided by publisher.

Humanities/Social Sciences/Languages
Decades of research have demonstrated that the parent-child dyad and the environment of the family--"which includes all primary caregivers--"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the

family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and

practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
