By 250 AD, Christianity had spread throughout India and China. Known as the Shining Religion or the Luminous Teaching, it drew adherents from Buddhism and Hinduism who were seeking a faith that taught the possibility of achieving a society founded on love and compassion for their fellow man. The new doctrine reached the island nation of Japan where it was so well received that Christianity threatened to supplant Buddhism as the dominant religion. By the close of the 16th century Japanese Christians numbered in the millions. Fifty years later Christianity was officially proscribed and Christians faced execution for openly practicing their faith. Jesus and the Samurai tells their fascinating story with facts drawn from ancient and modern sources.

Jupiter's Travels -Ted Simon's astonishing 4 year motorbike journey around the world The book that inspired Ewan McGregor's Long Way Round In the late 1970s Ted Simon set off on a Triumph and rode 63,000 miles over four years through fifty-four countries in a journey that took him around the world. Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGreggor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of Riding Home and The Gypsy in Me.

Advancements in research in psychological science have afforded great insights into how our minds work. Making an Impact on Mental Health and Illnessanalyzes contemporary, international research to examine a number of core themes in mental health, such as mindfulness and attachment, and provide an understanding of the sources of mentally ill health and strategies for remediation. The originality of this work is the embedding of psychological science in an evolutionary approach. Each chapter discusses the context of a specific research project, looking at the methodological and practical challenges, how the results have been interpreted and communicated, the impact and legacy of the research, and the lessons learnt. As a whole, the book looks at how social environments shape who we are and how we form relationships with others, which can be detrimental, but equally a source of flourishing and wellbeing. Covering a range of themes conducive to understanding and facilitating improved mental health, Making an Impact on Mental Health and Illnessis invaluable reading for advanced students in clinical psychology and professionals in the mental health field.

This book is concerned with two areas of mathematics, at first sight disjoint, and with some of the analogies and interactions between them. These areas are the theory of linear differential equations in one complex variable with polynomial coefficients, and the theory of one parameter families of exponential sums over finite fields. After reviewing some results from representation theory, the book discusses results about differential equations and their differential galois groups (G) and one-parameter families of exponential sums and their geometric monodromy groups (G). The final part of the book is devoted to comparison theorems relating G and G of suitably "corresponding" situations, which provide a systematic explanation of the remarkable "coincidences" found "by hand" in the hypergeometric case.
