RAMOS ASHER

A Book Called in Latin *Enchiridion Militis Christiani*, and in English *The Manual of the Christian Knight* Oxford University Press

The Reformation and Counter-Reformation represented the greatest upheaval in Western society since the collapse of the Roman Empire a millennium before. The consequences of those shattering events are still felt today—from the stark divisions between (and within) Catholic and Protestant countries to the Protestant ideology that governs America, the world’s only remaining superpower. In this masterful history, Diarmaid MacCulloch conveys the drama, complexity, and continuing relevance of these events. He offers vivid portraits of the most significant individuals—Luther, Calvin, Zwingli, Loyola, Henry VIII, and a number of popes—but also conveys why their ideas were so powerful and how the Reformation affected everyday lives. The result is a landmark book that will be the standard work on the Reformation for years to come. The narrative verve of *The Reformation* as well as its provocative analysis of American culture’s debt to the period will ensure the book’s wide appeal among history readers.

 The creator of the hit podcast series *Tides of History* and *Fall of Rome* explores the four explosive decades between 1490 and 1530, bringing to life the dramatic and deeply human story of how the West was reborn. In the bestselling tradition of *The Swerve* and *A Distant Mirror*, *The Verge* tells the story of a period that marked a decisive turning point for both European and world history. Here, author Patrick Wyman examines two complementary and contradictory sides of the same historical coin: the world-altering implications of the developments of printed mass media, extreme taxation, exploitative globalization, humanistic learning, gunpowder warfare, and mass religious conflict in the long term, and their intensely disruptive consequences in the short-term. As told through the lives of ten real people—from famous figures like Christopher Columbus and wealthy banker Jakob Fugger to a ruthless small-time merchant and a one-armed mercenary captain—*The Verge* illustrates how their lives, and the times in which they lived, set the stage for an unprecedented globalized future. Over an intense forty-year period, the seeds for the so-called "Great Divergence" between Western Europe and the rest of the globe would be planted. From Columbus's voyage across the Atlantic to Martin Luther's sparking the Protestant Reformation, the foundations of our own, recognizably modern world came into being. For the past 500 years, historians, economists, and the policy-oriented have argued which of these individual developments best explains the West's rise from backwater periphery to global dominance. As *The Verge* presents it, however, the answer is far more nuanced.

 The dawn of humanism in the Renaissance presented privileged women with great opportunities for personal and intellectual growth. Sexual and social roles still determined the extent to which a woman could pursue education and intellectual accomplishment, but it was possible through the

composition of poetry or prose to temporarily offset hierarchies of gender, to become equal to men in the act of creation. Edited by Katharina M. Wilson, this anthology introduces the works of twenty-five women writers of the Renaissance and Reformation, among them Marie Dentière, a Swiss evangelical reformer whose writings were so successful they were banned during her lifetime; Gaspara Stampa, a cultivated courtesan of Venetian aristocratic circles who wrote lyric poetry that has earned her comparisons to Michelangelo and Tasso; Hélisenne de Crenne, a French aristocrat who embodied the true spirit of the Renaissance feminist, writing both as novelist and as champion of her sex; Helene Kottanner, Austrian chambermaid to Queen Elizabeth of Hungary whose memoirs recall her daring theft of the Holy Crown of Saint Stephen for her esteemed mistress; and Lady Mary Sidney Wroth, the first Englishwoman known to write a full-length work of fiction and compose a significant body of secular poetry. Offering a seldom seen counterpoint to literature written by men, *Women Writers of the Renaissance and Reformation* presents prose and poetry that have never before appeared in English, as well as writings that have rarely been available to the nonspecialist. The women whose writings are included here are united by a keen awareness of the social limitations placed upon their creative potential, of the strained relationship between their gender and their work. This concern invests their writings with a distinctive voice—one that carries the echoes of a male aesthetic while boldly declaring battle against it.

A History in Documents Courier Corporation
 This fast-paced survey of Western civilization’s transition from the Middle Ages to modernity brings that tumultuous period vividly to life. Carlos Eire, popular professor and gifted writer, chronicles the two-hundred-year era of the Renaissance and Reformation with particular attention to issues that persist as concerns in the present day. Eire connects the Protestant and Catholic Reformations in new and profound ways, and he demonstrates convincingly that this crucial turning point in history not only affected people long gone, but continues to shape our world and define who we are today. The book focuses on the vast changes that took place in Western civilization between 1450 and 1650, from Gutenberg’s printing press and the subsequent revolution in the spread of ideas to the close of the Thirty Years’ War. Eire devotes equal attention to the various Protestant traditions and churches as well as to Catholicism, skepticism, and secularism, and he takes into account the expansion of European culture and religion into other lands, particularly the Americas and Asia. He also underscores how changes in religion transformed the Western secular world. A book created with students and nonspecialists in mind, *Reformations* is an inspiring, provocative volume for any reader who is curious about the role of ideas and beliefs in history.

 This is a sequel to Richard Viladesau's well-received study, *The Beauty of the Cross: The Passion of Christ in Theology and the Arts* from the Catacombs to the Eve of the Renaissance. It continues his project of presenting theological history by using art as both an independent religious or theological "text" and as a means of understanding the cultural context for academic theology. Viladesau argues that art and symbolism function as alternative strands of theological expression sometimes parallel to, sometimes interwoven with, and sometimes in tension with formal theological reflection on the meaning of crucifixion and its role in salvation history. This book examines the two great revolutionary movements that gave birth to the modern West: the Renaissance and the Protestant Reformation. This period was eventful for both theology and art, and thus particularly fruitful for Viladesau's project. Using individual works of art, over sixty of

which are reproduced in this book, to epitomize particular artistic and theological models, he explores the contours of each paradigm through the works of representative theologians as well as liturgical, poetic, artistic, and musical sources. To name a few examples, the theologies of Savonarola, Luther, Calvin, and the Council of Trent, are examined in correlation to the new situation of art in the era of Fra Angelico, Leonardo, Michelangelo, D?rer, Cranach, and the Mannerists. In this book, Viladesau continues to deepen our understanding of the foremost symbol of Christianity.
