In Germany, political foundations (Stiftungen) play an important role in shaping civil society through political democracy education. The foundations, however, have also committed themselves to strengthening democratic political and societal structures abroad. Their joint mission abroad is the contribution to democratic structures, information and debate in the countries and regions they are working in. They complement the official German foreign policy, but choose their own priorities and strategies. The focus of this thesis is the German political foundations as actors in democracy assistance. 'Democracy assistance' focuses less on the aspects of technical assistance but much more on political parties and the promotion of civil society as the backbone of democracy. Democracy assistance is a relatively recent international development activity of governments and international organizations. In recent years the international community has come to realize the importance of political parties and a well-functioning political party system for the process of democratisation. Here the German political foundations are working internationally as actors in democracy assistance - independent from the German government but at the same time fully state-funded. The objectives of this dissertation are to understand the work and strategies of the German political foundations as actors in the context of democracy assistance abroad, research their partner spectrums on selected countries, to identify their short comings and to give an outlook of the foundations work in the future in the fast-changing global political environment.

In this short, compelling memoir that will appeal to both general readers and fellow scientists, Harry S. Katz offers recollections and lessons learned from more than eight decades of life. In evocative snapshots, he describes early struggles to overcome a severe speech problem; lifelong attempts to develop technical expertise and creativity in his specialty area of materials science; his Army service during World War II; and six decades of marriage with his Holocaust-survivor wife, Toby, who at one point served three four-year terms on their local town council. From the perspective of someone who started two small businesses in different plastics-related fields, Katz discusses a few of the most memorable projects that he worked on, and provides suggestions for making the future use of plastics safer and healthier for human health and the environment. Katz, who is a checkers and chess expert, also discusses why he believes these kinds of challenging and creative activities are crucial for keeping a person's mind sharp.

Ten experts in premodern literature and history examine the style, genre, and performance of sixteenth century Ottoman poetry. A large number of poems, including a newly discovered

imperial poem collection and the work of a poet fallen into oblivion, are discussed with regard to their multifarious functions and their contemporary lyrical appeal. Though most of these poets worked in conventional settings many of the articles in this volume point out how they broke taboos, glossed over violence, and promoted or questioned political rule, even as they appealed to their listeners on an emotional level. The authors provide ample evidence for the importance attributed to certain cities and places, as well as local affiliations and networks. These analyses show how premodern poetry operated as a tool of communication and formed an integral part of premodern social and political life. *Visitors* Campus Verlag

This volume compiles a wealth of information on the composition, properties, utilization, and performance of major classes of additives while alerting formulators to potentially damaging interactions and challenges in the selection and testing of these materials. Completely revised and updated, the *Handbook of Coatings Additives*, Second Edition off *Poppy Koi Fan* Penerbit Universitas Ciputra

This first open access book in a series of three volumes provides an in-depth analysis of social protection policies that EU Member States make accessible to resident nationals, non-resident nationals and non-national residents. In doing so, it discusses different scenarios in which the interplay between nationality and residence could lead to inequalities of access to welfare. Each chapter maps the eligibility conditions for accessing social benefits, by paying particular attention to the social entitlements that migrants can claim in host countries and/or export from home countries. The book also identifies and compares recent trends of access to welfare entitlements across five policy areas: health care, unemployment, family benefits, pensions, and guaranteed minimum resources. As such this book is a valuable read to researchers, policy makers, government employees and NGO's.

An Iridescent Device: Premodern Ottoman Poetry Elsevier

Published ten years after the first edition, this new *Handbook* offers topical, and comprehensive information on the welfare systems of all 28 EU member states and their recent reforms, giving the reader an invaluable introduction and basis for comparative welfare research. Additional chapters provide detailed information on EU social policy, as well as comparative analyses of European welfare systems and their reform pathways. For this second edition, all chapters have been updated and substantially revised, and Croatia additionally included. The second edition of this *Handbook* is most timely, given the often-fundamental welfare state transformations against the background of the financial and economic crises, transforming social policy ideas, as well as political shifts in a number of European countries. The book sets out to analyse these new developments when it comes to social policy. In the first part, all country chapters provide systematic and comparable information on the foundations of the different national welfare systems and their characteristics. In the second part, using a joint conceptual foundation, they focus on policy changes (especially of the last two decades) in different social policy areas, including old-age, labour market, family, healthcare, and social assistance policies. As the comparative chapters conclude, European welfare system landscapes have been in constant motion in the last two decades. While austerity is not to be seen on the aggregate level, the in-depth country studies show that all policy sectors have been characterised by different reform directions and ideas. The findings not only reveal both change and continuity, but also policy reversal as a distinct type that characterises social policy

reform. The book provides a rich resource to the international welfare state research community, and is also useful for social policy teaching.
