History of Islamic Philosophy SUNY Press

This volume gathers together the numerous essays by the Iranian metaphysician and ontologist, Seyyed Hossein Nasr, on Islamic philosophers and the intricate relationship between Persian culture and its philosophical schools. Brought together into a single volume for the first time, these essays span four decades of Nasr's prolific and learned scholarship on the development of Islamic philosophy, as well as the general history of Islam, and expound his belief that philosophy is not merely a rational but a sacred activity.

The Philosophy of Seyyed Hossein Nasr Harper Collins Nasr (Islamic studies, George Washington U.), in a series of ten lectures, argues that, unlike in the West, where scientific thought has been secularized, in the East, knowledge and religious experience have remained unified. Drawing from Buddhist, Hindu, Judaic, Christian, and Islamic traditions, he finds in each the idea of perennial wisdom as a philosophical basis for such unity. Paperback edition (\$10.95) not seen. Against the Modern World is the first history of Traditionalism, an important yet surprisingly little-known twentieth-century anti-modern movement. Comprising a number of often secret but sometimes very influential religious groups in the West and in the

Islamic world, it affected mainstream and radical politics in Europe and the development of the field of religious studies in the United States, touching the lives of many individuals. French writer Rene Guenon rejected modernity as a dark age and sought to reconstruct the Perennial Philosophy - the central truths behind all the major world religions. Guenon stressed the urgent need for the West's remaining spiritual and intellectual elite to find personal and collective salvation in the surviving vestiges of ancient religious traditions. A number of disenchanted intellectuals responded to his call. In Europe, America, and the Islamic world, Traditionalists founded institutes, Sufi brotherhoods, Masonic lodges, and secret societies. Some attempted unsuccessfully to guide Fascism and Nazism along Traditionalist lines; others later participated in political terror in Italy. Traditionalist ideas were the ideological cement for the alliance of anti-democratic forces in post-Soviet Russia, and in the Islamic world entered the debate about the relationship between Islam and modernity. Although its appeal in the West was ultimately limited, Traditionalism has wielded enormous influence in religious studies, through the work of such Traditionalists as Ananda Coomaraswamy, Huston Smith, Mircea Eliade, and Seyyed Hossein Nasr.

This indispensable reference tool includes a comprehensive bibliography and an extensive index.

The Study Quran World Wisdom, Inc

This is the only book to deal with classical Islamic cosmology as it was formulated by the Ikhwan al-S'afa al Biruni and Ibn Sina during the tenth and eleventh centuries. These figures influenced all the later centuries of Islamic history and in fact created the cosmological framework within which all later scientific activity in the Islamic world was carried out--the enduring image of the cosmos within which Muslims have lived during the past millennium. Nasr writes from within the Islamic tradition and demonstrates how, based on the teachings of the Quran and the Prophet, the figures treated in this work integrated elements drawn from various ancient schools of philosophy and the sciences. This book is unique in its treatment of classical Islamic cosmology as seen from within the Islamic world-view and provides a key for understanding of traditional Islamic thought. -- Back cover.

Introduction to Islamic Cosmological Doctrines, An SUNY Press

The current ecological crisis is a matter of urgent global concern, with solutions being sought on many fronts. In this book, Seyyed Hossein Nasr argues that the devastation of our world has been exacerbated, if not actually caused, by the reductionist view of nature that has been advanced by modern secular science. What is needed, he believes, is the recovery of the truth to which the

great, enduring religions all attest; namely that nature is sacred. Nasr traces the historical process through which Western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans. His goal is to negate the totalitarian claims of modern science and to re-open the way to the religious view of the order of nature, developed over centuries in the cosmologies and sacred sciences of the great traditions. Each tradition, Nasr shows, has a wealth of knowledge and experience concerning the order of nature. The resuscitation of this knowledge, he argues, would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth.

The Garden of Truth Routledge

"Ever since the growth of Islam as a religious and political movement, Muslim thinkers have sought to understand the theoretical aspects of their faith by using philosophical concepts. Leaman outlines this history and demonstrates that, although the development of Islamic philosophy is closely linked with Islam itself, its form is not essentially connected to any particular religion, and its leading ideas and arguments are of general philosophical significance. The author illustrates the importance of Islamic thought within philosophy through the use of many modern examples. He describes and contrasts the three main movements in Islamic philosophy - Peripatetic, Sufi and Illuminationist - and examines the Persian as well as the Arabic traditions. Wide coverage is given to key aspects of Islamic philosophy, including epistemology, ontology, politics, ethics and philosophy of language, providing readers with a balanced view of the discipline. The second edition has been thoroughly revised and updated throughout, including the addition of two new chapters on recent debates surrounding Islam's need for an enlightenment, and on the future of Islamic philosophy."--Pub. desc.

Against the Modern World State University of New York Press
With remarkable breadth of vision, Seyyed Hossein Nasr reveals

for both Western and Muslim readers how each art form in the Islamic tradition is based upon a science of nature concerned, not with the outer appearance of things, but with their inner reality. Ranging across calligraphy, painting, architecture, literature, music, and the plastic arts, Nasr penetrates to the inner dimension of Islam and shows the role art plays in the life of individual Muslims and the community as a whole—the role of inspiring the remembrance and contemplation of God. Once the author establishes art as an aid and support to the spiritual life, he traces the creative act to its ultimate source: inner knowledge and barakah, or grace, which make the crystallization of inner realities in form and space and time possible. Through this knowledge and grace, the author asserts, unity manifests upon the plane of multiplicity, making archetypal realities perceivable by the senses. Through this knowledge and grace, art functions as a ladder for the journey of the soul from the visible to the invisible. How Islamic art leads man to the inner chamber of divine revelation forms the substance of much of this important work. An especially close look is given to the Sufi tradition within Islam, for its mystical teachers have often clearly demonstrated in their works the spiritual significance of beauty and served as the source of inspiration for art. By rediscovering the root of art in the Islamic tradition, Seyyed Hossein Nasr opens doors to new dimensions of unity which have seemingly been obscured in recent Western art. In so doing, he extends the significance of this book beyond the Islamic belief system to touch the hearts and creative impulses of readers from all traditions.

History of Islamic Philosophy SUNY Press

This book is an attempt to explain how, in the face of increasing religious authoritarianism in medieval Islamic civilization, some Muslim thinkers continued to pursue essentially humanistic,

rational, and scientific discourses in the quest for knowledge, meaning, and values. Drawing on a wide range of Islamic writings, from love poetry to history to philosophical theology, Goodman shows that medieval Islam was open to individualism, occasional secularism, skepticism, even liberalism.

The headlines are filled with the politics of Islam, but there is another side to the world's fastest-growing religion. Sufism is the poetry and mysticism of Islam. This mystical movement from the early ninth century rejects worship motivated by the desire for heavenly reward or the fear of punishment, insisting rather on the love of God as the only valid form of adoration. Sufism has made significant contributions to Islamic civilization in music and philosophy, dance and literature. The Sufi poet Rumi is the bestselling poet in America. But in recent centuries Sufism has been a target for some extremist Islamic movements as well as many modernists. The Garden of Truth presents the beliefs and vision of the mystical heart of Islam, along with a history of Sufi saints and schools of thought. In a world threatened by religious wars, depleting natural resources, a crumbling ecosystem, and alienation and isolation, what has happened to our humanity? Who are we and what are we doing here? The Sufi path offers a journey toward truth, to a knowledge that transcends our mundane concerns, selfish desires, and fears. In Sufism we find a wisdom that brings peace and a relationship with God that nurtures the best in us and in others. Noted scholar Seyyed Hossein Nasr helps you learn the secret wisdom tradition of Islam and enter what the ancient mystics call the "garden of truth." Here, liberate your mind, experience peace, discover your purpose, fall in love with the Divine, and find your true, best self.
