Educational Evaluation, Assessment and Monitoring Springer Science & Business Media

This fascinating compilation of the recent data on gender differences in education presents a wealth of data, analysed from a multitude of angles in a clear and lively way.

Keynote Advanced Springer Nature

Every learner has the potential to achieve great things. Talent helps unlock that potential. Talent offers a combination of language, life and academic skills and fresh, contemporary topics, preparing students for further study, travel or work; wherever their talent may take them! With videos filmed on the streets of London, and contemporary topics like antibiotic resistance and space archaeology, Talent is sure to spark students' interest and promote academic debate. Exam-style exercises and topics help students prepare for a range of international exams, including IGCSE and Cambridge exams.

Compact Preliminary for Schools Student's Book Without Answers with CD-ROM Taylor & Francis

Nasce dalla collaborazione di circa seicento professori che hanno passato almeno un lustro a confrontarsi con le problematiche della figura del preside, un manuale enciclopedico che affronta in modo sintetico ed esaustivo tutti gli argomenti oggetto dei concorsi MIUR. L'inusuale modalità di lavoro di gruppo ha consentito di trattare la materia sia in estensione sia in profondità, rendendo questo manuale uno strumento unico, aggiornato a gennaio 2020.

Pinocchio, the Tale of a Puppet Sense Publishers

This open access book, inspired by the ICME 13 topic study group "Affect, beliefs and identity in mathematics education", presents the latest trends in research in the area. Following an introduction and a survey chapter providing a concise overview of the state-of-art in the field of mathematics-related affect, the book is divided into three main sections: motivation and values, engagement, and identity in mathematics education. Each section comprises several independent chapters based on original research, as well as a reflective commentary by an expert in the area. Collectively, the chapters present a rich methodological spectrum, from narrative analysis to structural equation modelling. In the final chapter, the editors look ahead to future directions in the area of mathematics-education-related affect. It is a timely resource for all those interested in the interaction between affect and mathematics education.; Presents a selection of current empirical studies, and a visionary chapter on future directions Includes recent developments in the areas of motivation, engagement, and identity Provides a broad spectrum of theoretical and methodological approaches This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Fundamentals of Organic Chemistry National Geographic

Advertising, materialism and consumption are central aspects of contemporary Western culture. We are bombarded with idealised images of the perfect body, desirable consumer goods, and affluent lifestyles, yet psychology is only just beginning to take account of the profound influence these consumer culture ideals have on individuals' sense of identity and worth. Consumer Culture, Identity, and Well-Being documents the negative psychological impact consumer culture can have on how individuals view themselves and on their emotional welfare. It looks at the social psychological dimensions of having, buying and wanting material goods, as well as the pursuit of media-hyped appearance ideals. In particular, it focuses on: the purchasing of material goods as a means of expressing and seeking identity, and the negative consequences of this psychological buying motivations in conventional buying environments and on the Internet the unrealistic socio-cultural beauty ideals embodied by idealized models. Throughout, different approaches from social psychology are integrated, such as self-completion, self-discrepancy and value theory, to create a comprehensive theoretical framework for understanding the impact of internalising core consumer culture ideals on how individuals see themselves and the implications this has for their psychological and physical health. This book is of interest to anybody who wants to find out more about the psychological effects of living in modern consumer societies on children, adolescents, and adults. More specifically, it will be of interest to students and researchers in social psychology, sociology, media studies, communication and other social sciences, as well as to psychologists, health workers, and practitioners interested in the topics of identity, consumption pathologies, body image, and body-related behaviours.

Making Sense of Word Problems Springer

A delightful literary foray for adults and children alike, from the inexhaustible imagination of Booker Prize-winning, best-selling author Ian McEwan. In these seven exquisitely interlinked episodes, the grown-up protagonist Peter Fortune reveals the secret journeys, metamorphoses, and adventures of his childhood. Living somewhere between dream and reality, Peter experiences fantastical transformations: he swaps bodies with the wise old family cat; exchanges existences with a cranky infant; encounters a very bad doll who has come to life and is out for revenge; and rummages through a kitchen drawer filled with useless objects to discover some not-so-useless cream that actually makes people vanish. Finally, he wakes up as an eleven-year-old inside a grown-up body and embarks on the truly fantastic adventure of falling in love. Moving, dreamlike, and extraordinary, *The Daydreamer* marks yet another imaginative departure for Ian McEwan.

Sunny Times. L'inglese Per Le Tue Vacanze. Per la Scuola Media BRILL

'Gripping and well-honed...consummately constructed, humming with tension... a defence of literature's need to shine a light on the darkest aspects of human nature and it does so with a novelist's skill, precision and power' THE GUARDIAN From the author of the globally bestselling, multi-million-copy classic, *The Boy in the Striped Pyjamas*, comes its astonishing and powerful sequel. 'When is a monster's child culpable? Guilt and complicity are multifaceted. John Boyne is a maestro of historical fiction. You can't prepare yourself for the magnitude and emotional impact of this powerful novel!' John Irving 'An incredible feat of storytelling. All the Broken Places is a stark confrontation of evil, an examination of guilt and deflection, and an old-fashioned page-turner. John treads the finest of narrative lines with skill and grace and proves himself yet again to be among the world's greatest storytellers. ' Donal Ryan Ninety-one-year-old Gretel Fernsby has lived in the same

mansion block in London for decades. She leads a comfortable, quiet life, despite her dark and disturbing past. She doesn't talk about her escape from Germany over seventy years before. She doesn't talk about the post-war years in France with her mother. Most of all, she doesn't talk about her father, the commandant of one of the most notorious Nazi concentration camps. Then, a young family moves into the apartment below her. In spite of herself, Gretel can't help but begin a friendship with the little boy, Henry, though his presence brings back memories she would rather forget. One night, she witnesses a violent argument between Henry's mother and his domineering father, one that threatens Gretel's hard-won, self-contained existence. Gretel is faced with a chance to expiate her guilt, grief and remorse and act to save a young boy - for the second time in her life. But to do so, she will be forced to reveal her true identity to the world. Will she make a different choice this time, whatever the cost to herself? All the Broken Places is a devastating, beautiful story about a woman who must confront the sins of her past and a present in which it is never too late for bravery.

Talent. B2-C1. Exam Toolkit. Per Le Scuole Superiori Rubbettino Editore

The OECD Programme for International Student Assessment (PISA) examines not just what students know in science, reading and mathematics, but what they can do with what they know. Results from PISA show educators and policy makers the quality and equity of learning outcomes achieved elsewhere.

The Library Card OECD Publishing

This book looks at the foundations of school self-evaluation from a scientific as from a practical perspective. Planning concepts, restructuring of education systems, organizational theory on schools, evaluation methodology and models of school effectiveness and school improvement are discussed as contributing to the overall conceptualization of school self-evaluation. A broad range of approaches is presented and methodological requirements are discussed. School self-evaluation contains controversial issues that reflect tension between the need for objectivity in a context that is permeated by values and potential conflicts of interests. Similar tensions may be seen to exist with respect to the static and "reductionist" aspects of available data collection procedures in a complex and dynamic situation and the appeal for external accountability on the one hand and improvement oriented self-reflection on the other. The mission of the book is to clarify these tensions and offer ways to deal with them in practical applications. The school effectiveness knowledge base is offered as a substantive educational frame of references that serves an important function in selecting relevant factors for data collection and the use of the evaluation results.

International Handbook of Mathematics Teacher Education: Volume 3 OECD Publishing

Pinocchio, The Tale of a Puppet follows the adventures of a talking wooden puppet whose nose grew longer whenever he told a lie and who wanted more than anything else to become a real boy. As carpenter Master Antonio begins to carve a block of pinewood into a leg for his table the log shouts out, "Don't strike me too hard!" Frightened by the talking log, Master Cherry does not know what to do until his neighbor Geppetto drops by looking for a piece of wood to build a marionette. Antonio gives the block to Geppetto. And thus begins the life of Pinocchio, the puppet that turns into a boy. *Pinocchio, The Tale of a Puppet* is a novel for children by Carlo Collodi is about the mischievous adventures of Pinocchio, an animated marionette, and his poor father and woodcarver Geppetto. It is considered a classic of children's literature and has spawned many derivative works of art. But this is not the story we've seen in film but the original version full of harrowing adventures faced by Pinnocchio. It includes 40 illustrations.

PISA for Development Assessment and Analytical Framework Reading, Mathematics and Science Alba House Society of St. Paul

This volume focuses on the implications of digital technologies for educators and educational decision makers that are not widely represented in the literature. The chapters contained in the volume are based on the presentations at the 2020 edition of the CELDA conference and cover multiple developments in the field such as deploying learning technologies, proposing pedagogical approaches and practices to address digital transformation, and presenting case studies of specific technologies and contexts. The chapters form a lively debate and provide a comprehensive analysis of the contribution of learning technologies designed to improve the learning process and the experience of the students as well as to develop key competences.

Self-Regulated Learning in Technology Enhanced Learning Environments Cambridge University Press

This book presents a literature review of and a state-of-the-art glimpse into current research on affect-related aspects of teaching and learning in and beyond mathematics classrooms. Then, research presented at the MAVI 25 Conference, which took place in Intra (Italy) in June 2019, is grouped in thematic strands that capture cutting-edge issues related to affective components of learning and teaching mathematics. The concluding chapter summarises the main messages and sketches future directions for research on affect in mathematics education. The book is intended for researchers in mathematics education and especially graduate students and PhD candidates who are interested in emotions, attitudes, motivations, beliefs, needs and values in mathematics education.

Theorizing and Measuring Affect in Mathematics Teaching and Learning Random House

This is the overprinted teachers edition of the title of the same name. Materials included in this resource cover ten TOEIC Practice Tests (both listening & reading) the tests have been designed to provide students with the strategies they need in order to familiarise themselves with the format of the 7 different TOEIC exam tasks.

Il Tutto Esercizi. Inglese. Per la Scuola Elementare Springer

This book, addressing mathematics educators, teacher-trainers and teachers, is published as a contribution to the endeavour of renewing the teaching of proof (and theorems) on the basis of historical-epistemological, cognitive and didactical considerations.

Educational Effectiveness and Ineffectiveness Springer

This book is a critical assessment of the knowledge base on educational effectiveness, covering a period of five decades of research. It formulates a "lean" theory of good schooling, and identifies and explains instances of "ineffectiveness", such as low effect sizes of malleable conditions, for which expectations are highly strung. The book presents a systemic outlook on educational effectiveness and improvement, as it starts out from an integrated multi-level model that comprises system level, school level and instructional conditions. It offers a classification of school improvement strategies and scenarios for system level educational improvement. Above all, the analysis is very systematic, comprehensive and strongly grounded in theory. The book includes a

case study analysis of various strands of improvement-oriented educational policy in the Netherlands as an illustration of some of the arguments used.

Life Bre Advanced Combo Split a Random House

Compact Preliminary for Schools is a focused, 50 - 60 hour course for Cambridge English: Preliminary for Schools, also known as Preliminary English Test (PET). The Student's Book features eight topic based units with focused exam preparation to maximise the performance of school-age learners.

Units are divided in the order of the exam with pages on Reading, Writing, Listening and Speaking. A Grammar reference covers key areas in the syllabus and unit based wordlists include target vocabulary with definitions. The Student's Book also features a revision section and full practice test. The accompanying CD-ROM provides interactive grammar, vocabulary and exam skills tasks including listening. Course users also have exclusive access to a further practice test with audio via a URL in the Student's Book.

Ultimate INVALSI. Per Le Scuole Superiori OECD Publishing

This third volume of the International Handbook of Mathematics Teacher Education focuses on teachers, teacher educators, researchers, and others who work to provide effective learning opportunities for teachers, with emphasis on describing and analysing their engagement in

mathematics teacher education collaborations and contexts from various perspectives.

Succeed in TOEIC Springer Nature

This book records the state of the art in research on mathematics-related affect. It discusses the concepts and theories of mathematics-related affect along the lines of three dimensions. The first dimension identifies three broad categories of affect: motivation, emotions, and beliefs. The book contains one chapter on motivation, including discussions on how emotions and beliefs relate to motivation. There are two chapters that focus on beliefs and a chapter on attitude which cross-cuts through all these categories. The second dimension covers a rapidly fluctuating state to a more stable trait. All chapters in the book focus on trait-type affect and the chapter on motivation discusses both these dimensions. The third dimension regards the three main levels of theorizing: physiological (embodied), psychological (individual) and social. All chapters reflect that mathematics-related affect has mainly been studied using psychological theories.
