Nags Head Art, Inc.
Can you climb a tree or fly a kite? Can you sing or play a drum? Some things are

hard and some are easy - for everyone. *Really?* Simon and Schuster Two brothers prepare a birthday surprise for their mother. But her real surprise comes when she sees the mess they have made! *The Pet Vet* Millbrook Press Learning to read is not natural for many individuals, who remain dependent on the skill, knowledge, and persistence of their teachers to acquire

reading proficiency. Reading instruction, however, can be designed with greater validity than ever before because of a solid, converging body of scientific research on reading acquisition, reading processes, and reading disabilities. This special issue presents some of the major advances in methodologically and theoretically sound treatment research by

the use of comprehensive and multivariate treatment protocols and individual growth-curve modeling. *Bit By Bit, Friends Aloft* Routledge Brad loved playing tricks on people. So he got very nervous when the principal called him to her office. The only question was, which trick had gotten him in trouble? Tools for Matching Readers to Texts Millbrook Press This book

story of Adam and Eve was not written as a scientific treatise but as an account of human nature and our relationship with God and one another. Dying to Control offers a fresh and provocative look at the garden of Eden drama, revealing how the story of Adam and Eve is our story. By weaving autobiographical vignettes with cultural observations and biblical exposition, this penetrating work exposes

our obsession with control and the extreme lengths we go to preserve and promote self. Yet, despite our willingness to kill ourselves and one another in an attempt to control our world and eternal destinies, there is hope—extraordinary hope. This overdue commentary on American culture offers a compelling perspective on how to experience the fullness of life in a world dying to

control. What's Going On? First Avenue Editions Bill and his little sister Kay enjoy playing in a big box, which becomes in turn a car, a jet, and the engine of a train.

National Academies Press Mastering Basic Skills(R) Second Grade includes comprehensive content essential to second graders. Topics include reading comprehension, phonics, language arts, grammar, writing, time and money, and math. The Mastering Basic Skills(R) series includes grade-specific math and language arts activities as well as reading lists,

skills checklists, awards, and mini books. The comprehensive content and extra features increase the value of this series making it an appealing choice to parents looking for extra at-home practice for their child. Dress-Up Millbrook Press For word nerds and grammar geeks, a witty guide to the most commonly mispronounced words, along with their

correct pronunciations and pithy forays into their fascinating etymologies and histories of use and misuse. With wit and good humor, this handy little book not only saves us from sticky linguistic situations but also provides fascinating cocktail-party-ready anecdotes. Entries reveal how to pronounce boatswain like an old salt on the deck of a ship, trompe l'oeil like a bona fide art

expert, and haricot vert like a foodie, while arming us with the knowledge of why certain words are correctly pronounced the "slangy" way (they came about before dictionaries), what stalks of grain have to do with pronunciation, and more. With bonus sidebars like "How to Sound like a Seasoned Traveler" and "How to Sound Cultured," readers will be able to speak about foreign foods and

places, fashion, philosophy, and literature with authority. Model Rules of Professional Conduct First Avenue Editions Decades of research have demonstrated that the parent-child dyad and the environment of the family" which includes all primary caregivers" are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on

parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a

trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of

significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting.

Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for

parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of

parenting policy, research, and practice in the United States. That Is Not My Hat! Millbrook Press
This booklet describes techniques classroom teachers can use to do three things to ameliorate behavior for children with ADHD: 1) revise the environment to set the student up for success, 2) replace the behavior, by teaching an alternative behavior that is socially acceptable, and 3)

reframing the response, so the behavior is not fed by the behavior of the adult. We call this the Three R's which are based on the Three T's. The three T's are 1) Trigger (what sets the behavior in motion, 2) Target (what behavior are you wanting to target for change in measurable and observable terms, and 3) impacT (what is the student trying to gain or escape by having this behavior?) So the three T's

(Trigger, Target, impact) form the basis for the three R's (Revise, Replace, Reframe). It's simple and Dr. Riffel's presentation that coincides with this book is color coded to help you remember which of the sections you are addressing with each intervention.

Millbrook Press
A decodable book featuring four phonics stories specially

designed to help children with dyslexia or other language-based learning difficulties find reading success. While Meg and Greg are visiting Greg's family on Stardust Island they find themselves searching for one lost or missing item after another! Join Meg, Greg, cousin Martha and a puppy named Scarlet as they discover the thief who took off with a precious garnet ring at a farmers' market, find

and catch a horse named Popcorn who got lost in a forest, save a surfer who fell from his board and got badly hurt and chase an escaped teddy bear dangling from a helium balloon at a fun fair. Meg and Greg: Scarlet and the Ring is the fourth book in the Orca Two Read series designed for shared reading between a child learning to read and an experienced reader. Inside you'll find four stories that focus on

words with r-controlled vowels. For the first time in the series, readers will also be introduced to multiple spellings for a single sound. Praise for the Orca Two Read series: “A thoughtfully designed storybook adds another

helpful tool to the box for readers who need support.” —Kirkus for Frank and the Skunk “A unique approach to high-interest texts for reluctant burgeoning readers, this book offers phonics fun wrapped in

serious research-based success.” —School Library Journal for A Duck in a Sock “The stories offer both flashes of humor and plenty of action to drive the instructional intent.” —Booklist for A Duck in a Sock
