As a companion to the
undergraduate
textbook "Physical
Chemistry from a
Different Angle", this
workbook offers an
excellent opportunity

to deepen the understanding of the concepts presented in the textbook by addressing specific problems. The workbook is divided into two parts: a first part with nearly 200 exercises and a second part providing the corresponding detailed solutions with helpful comments, enabling students to learn independently.

Modern Quantum Chemistry Prentice Hall
The Solutions Manual to accompany Physical Chemistry for the Life Sciences 2e contains fully-worked solutions to all end-of-chapter discussion questions and exercises featured in the book. The manual provides helpful comments and friendly advice to aid understanding. It is also a

valuable resource for any lecturer who wishes to use the extensive selection of exercises featured in the text to support either formative or summative assessment, and wants labour-saving, ready access to the full solutions to these questions.

Solutions to Exercises
Prentice Hall

This graduate-level text explains the modern in-depth approaches to the calculation of electronic structure and the properties of molecules. Largely self-contained, it features more than 150 exercises. 1989 edition.
