Whether out for an afternoon's sail or embarking on a long offshore passage, there is always an element of chance and uncertainty about being at sea. To be responsible for the wellbeing of both crew and vessel, a good

skipper needs to know their limitations and ensure they are operating well within the margins of safety. Safe Skipper is a practical and thought provoking guide for yacht skippers of all levels of experience, full of invaluable advice and tips on how to reduce to the minimum the risks of mishaps and equipment failure at sea. There's a wide range of information on seamanship, preparation, seaworthiness, gear, boat handling, leadership, teamwork, watch keeping, communications, navigation, weather and emergency procedures, all delivered in a highly practical, lively, non-preachy fashion. Included throughout

are useful checklists, box-outs and case studies of accidents and their causes, with survivors' testimonials and explanations of how disasters were avoided, or could have been, all of which provides valuable lessons for everyone who goes to sea. *Chapman Piloting & Seamanship 69th Edition* Navigation Rules International - Inland Superyacht Master covers the requirements of the navigation and radar modules for the Officer of the Watch (Yachts) and the Master (Yachts) Certificates required for captains and crew of commercial yachts over 24m and under 3,000 tons. It is the only book written specifically for these

modules and will be required reading for all those undertaking a deck career in the superyacht industry or in similar sized commercial craft. This book is intended for the next level of navigators after Yachtmaster and is an extension of the current series of very successful and highly regarded course instruction books available from Adlard Coles Nautical. 'At long last someone has written an in-depth reference manual on radar operation for the masters of large yachts. Every superyacht should have a copy on the bridge!' Collisions are expensive! Learning, understanding and remembering the International Regulations for Preventing Collisions at Sea (COLREGs) is essential for anyone venturing onto the water. Leisure boaters, as much as professional mariners, need to know the rules, and a firm understanding is required to pass many nautical exams. But with the COLREGs stretching to over 12,000 words, this is no small task. This is where Paul Boissier's excellent book comes in. Paul knows the

COLREGs backwards having used them extensively in his career with the Royal Navy - from the bridges of submarines and warships which he has commanded, with each giving a rather different perspective on other shipping! He also knows the other side well with his extensive cruising experience, from his early years with his father to now, sailing his own yacht. These experiences mean that he knows and understands the COLREGs from both sides and this gives him the ability to take you through the COLREGs from a mariners' and sailors' perspective. He brings the vital, but dry, document to life, going through it not in order, but by topics which are

relevant to the mariner and sailor. Paul explains the intention of each rule and how it should be applied when at sea. He includes personal anecdotes (not all favourable to him!) which make everything real and tells us how he remembers different aspects of the Regulations through mnemonics and other devices. Finally, each chapter ends with a self-test to reinforce what has been learnt – other tests are also available online on the Fernhurst Books' website. This new edition has been updated with the 2016 changes to the CLOREGS. Whether you want to increase your confidence, pass an exam, require an on-board reference, or wish to improve your

understanding of the nautical rules of the road, this is the ideal book for you.
