Rabbit raisers will keep their rabbitries hopping and happy with the advice found in *Rabbits, a Hobby Farm book*. Rabbit breeder and exhibitor Chris McLaughlin offers years of experience and guidance on the many aspects of raising rabbits on a hobby farm, a livestock choice she considers perfect due to the limited space rabbits need to thrive. Whether the reader is raising rabbits for pets, fiber, or meat, there is much solid information and useful advice to be found in the pages of *Rabbits*. From the natural and cultural history of rabbits to selecting and purchasing of the right rabbits for a small farm, this book is both practical and enlightening. Individual chapters focusing on housing and feeding, behavior and handling, health care, and breeding and raising young make this an indispensable choice for all rabbit keepers. Handsomely designed with color photographs throughout, *Rabbits* also offers sidebars of helpful tips, fun anecdotes, and quotes from hobby farmers that prove entertaining and edifying. The final chapter of the book, "Making Money with Rabbits" discusses how to turn the rabbit-raising business profitable through producing show and pet rabbits, wool/fiber rabbits, rabbit manure, and rabbit meat. Resources include a glossary of terms and a catalog of associations, books, periodicals, and websites. Fully indexed.

Arranging the transportation of animals at research facilities is often an ordeal. There is a confusing patchwork of local, national, and international regulations; a perceived lack of high-quality shipping services; a dearth of science-based good practices; and a lack of biosafety standards. It's a challenge "and an impediment to biomedical research. *Guidelines for the Humane Transportation of Research Animals* identifies the current problems encountered in the transportation of research animals and offers recommendations aimed at local and federal officials to rectify these problems. This book also includes a set of good practices based on the extensive body of literature on transportation of agricultural animals, universal concepts of physiology, and a scientific understanding of species-specific needs and differences. Good practices were developed by the committee to address thermal environment, space requirements, food and water requirements, social interaction, monitoring of transportation, emergency procedures, personnel training, and biosecurity. *Guidelines for the Humane Transportation of Research Animals* is an essential guide for all researchers, animal care technicians, facilities managers, administrators, and animal care and use committees at research institutions.

The Guide to Nature Storey Publishing

"Molest" is not a concept, not a word, it is a living, breathing agony, a trauma, that eats the mind, the psyche, the past, present and future of a living being. Daily, momentarily, it gnaws on the the heart, the dreams of its victims. It eats the sleep. It erodes the mind. There's no rest for the victim. Also, is it possible we create a powerful illness of the mind - and body - as a way to escape the trauma of the past and the dread of the future? Is illness a distraction, or, a call for help? Can we alleviate the power of trauma by using a sickness of the mind, or the body, to distract from the painful memory of the past? My mind often reflects back to the nightmare of molesting when I was a child. Will I ever wake up? Within our own personal being is the Light to guide us, unique as we are, to Unconditional Love. We each seek to fulfill our life, awaken the true self, our Divine Self. That awakening is, ready, waiting, within us. Read: Psalm 42.1-5 KJV The trauma of molesting destroys who we were meant to be. We're forever a child trapped in that dark room, forever waiting for the dreaded touch, the sick smile, and the soft whisper of a person who opens the door to the nightmare of life.
